The image shows the WITNESS™ Lepto product packaging, which includes a box and a test kit. The box is white with orange and black text. The test kit contains several components: a test card with three windows (Control, Test, IgM), a pipette, a tampon, and a small tube. The instructions are provided in three languages: Spanish, English (WITNESS™ Lepto), and Portuguese (WITNESS™ Lepto). The English instructions are detailed, showing step-by-step procedures for sample collection, dispensing, and reading results. It also includes information about the test's sensitivity, specificity, and potential false positives. The Spanish and Portuguese versions are similar summaries of the English instructions.
