AlphaTrak3

BLOOD GLUCOSE MONITORING SYSTEM

Bluetooth

Bluetooth® Setup Guide

1. Enable discovery mode on your meter

⚹ will appear blinking on the screen.
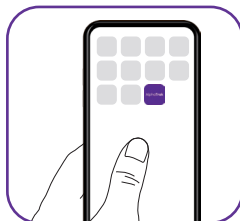

Press Ⓜ for less than 3 sec to turn on your meter.

Press Ⓜ again for less than 3 sec to view result history.

Press and hold both Ⓜ and Ⓒ together for 3 sec to toggle Bluetooth® discovery mode.

2. Pair on your mobile

Application will confirm that you've successfully connected. On the meter, the Bluetooth® icon will stop blinking.
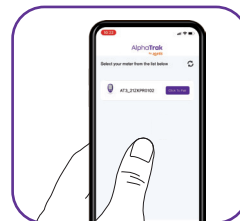

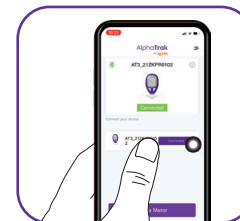

Open the **AlphaTrak** application.

Tap Device at the bottom navigation. Tap Add a Meter to find your meter.

Tap ⟳ if you don't automatically find your meter. Select your meter and tap Click to Pair.

Enter the 6-digit pairing key, now displayed on your meter, to the application.

3. Import test data

When getting test results, if the Bluetooth® mode is set to turn on automatically, you will see the blinking Bluetooth® icon once the result is ready. This indicates that Bluetooth® is on and ready to pair with the AlphaTrak App.
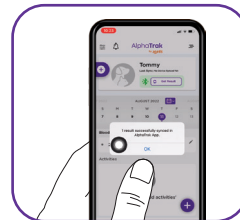

Tap Dashboard at the bottom navigation.

Tap Get Result to fetch test results from your meter.

Application will confirm that test results successfully synced.
