Directory of Services

2026

Dear Valued Veterinary Partner,

At Zoetis Reference Laboratories, our commitment to innovation is rooted in a clear purpose: to help you deliver faster, more confident care through diagnostics you can trust. Every investment we make is designed to enhance speed, precision, and consistency—so you can focus on what matters most: your patients.

We're proud to share a major milestone in that journey, the opening of our newest and largest diagnostics reference laboratory at the UPS Healthcare Labport facility in Louisville, Kentucky. This state-of-the-art lab expands our capacity to serve clinics nationwide with greater efficiency and scale.

As part of this expansion, we've begun bringing Molecular testing in-house, marking a key step in broadening our diagnostic capabilities. This enhancement allows us to expand our test menu with greater agility, introduce new offerings more efficiently, and better meet the evolving needs of your practice. We're also actively investing in research and development of new diagnostic tests, ensuring that our portfolio continues to grow in ways that support emerging clinical challenges and deliver deeper insights for veterinary care.

Our team of experienced medical professionals remains dedicated to supporting you at every step, and our quality standards continue to be guided by proven practices from human diagnostic medicine. Together, we're building a stronger foundation for veterinary care, one that empowers your practice and improves outcomes for the animals you serve.

Thank you for your continued trust in Zoetis Reference Laboratories.

Sincerely,

Kavita Bhat

Kavita Bhat, Ph.D.

Vice President of US Zoetis Reference Laboratories, Global Diagnostics

Quality is Key

Expect excellence from our rigorous Quality Management System (QMS)

The Zoetis Reference Laboratories (ZRL) Quality Management System incorporates American Society for Veterinary Clinical Pathology (ASVCP) quality standards¹ as best practice but doesn't stop there. ZRL goes the extra mile by incorporating gold standards from human laboratory diagnostic medicine into our Quality program, including Clinical and Laboratory Standards Institute (CLSI), ISO 15189 and College of American Pathologists (CAP). From timely test results to technical oversight to comprehensive tracking of metrics, we continually strive for excellence in all that we do.

Rigorous quality standards upheld in all locations and departments and through all phases of testing

Our commitment to quality and continuous improvement supports veterinarians in providing a high level of care to their patients. The rigorous ZRL quality program includes:

- Dedicated, experienced Quality team with National and Regional leadership
- Medical leadership, ensuring both service excellence and focus on patient safety and well-being
- Rigorous analytical performance oversight, including robust validation, calibration, quality control (QC) and proficiency testing (PT)
- Comprehensive staff training and competency program
- Semi-annual internal auditing program
- Comprehensive and proactive management of non-conforming events
- Monitoring and incorporation of customer feedback for improvement projects
- Continuous improvement program, incorporating Lean and Six Sigma² principles and tools

The ZRL laboratory team is assembled to ensure quality

Our diligent, well-rounded and diverse laboratory team includes:

- Board-Certified (DACVP) Clinical and Anatomic Pathologists
- Board-Certified (DACVP) Parasitologist
- Clinical Microbiologist (PhD)
- Board-Certified Specialty Consultants
- Extensively credentialed Quality leadership
- Qualified Technicians (MLS/MT/CLS, RVT/CVT and BS/MS)

A Guide to This Directory

Welcome to the 2025 Directory of Services for Zoetis Reference Laboratories!

To ensure our Directory is as helpful as possible, we've rearranged it to make the information you need more easily accessible, including:

- A simplified look at [turnaround times](#) that includes sample collection and submission guidelines
- Information to help you [determine which of our test options best fits your patient's needs](#)
- How you can easily [order tests and view the results digitally](#) anytime, anywhere
- How to [order supplies](#)

Refer to the [Table of Contents](#) for a comprehensive list of the resources available to you in this guide.

Using the interactive features

- Use the Table of Contents or the navigation bar across the bottom of each page to jump directly to sections.
- Click test codes throughout the Directory to navigate to that test.
- **Adobe Acrobat Reader® users:** Click KEY in the upper right corner throughout the Test Menu section to access the table key.
All other users: View the [key](#) here.
- Not sure where to find a test? Locate it within the alphabetical test listing at the back of this Directory, then click the test code to navigate to it.

Need extra support?

We're happy to help. Please feel free to contact us using the numbers listed in our [Dedicated Customer Service](#) section.

Contents

Select a section to jump directly to that page.

Everything you need to know, from our next-day turnaround times to how to choose a test, prepare and submit your sample, and access your results.

A listing of our comprehensive test menu, organized by species, then laboratory section, then by test name.

About Zoetis Reference Laboratories

Your Laboratory Testing Partner

Zoetis Reference Laboratories gives you deeply informed diagnostic insights with a comprehensive test menu and reliable turnaround times, backed by expert support, all easily accessible through innovative connectivity solutions.

Diagnose with **expert medical insights**

- ✓ Dedicated anatomic and clinical pathologists
- ✓ Comprehensive test menu with next-day results
- ✓ Accurate results supported by specialist insights for enhanced patient outcomes

Tailor your diagnostic approach with **flexible solutions**

- ✓ Fully customizable diagnostic workflows, from test to treatment selection
- ✓ Seamlessly integrated with Vetscan Imagyst® and other in-clinic analyzers
- ✓ End-to-end ordering and support managed via your PIMS and the ZoetisDx portal

Optimize your point-of-care with **high-value diagnostics**

- ✓ Maximize efficiency by integrating Zoetis Reference Laboratories into your practice workflow
- ✓ Standardize monthly costs with tiered pricing options
- ✓ Expand your diagnostics and grow your practice with My Zoetis Rewards

Test on Your Terms

From the clinic to the reference lab and everything in between, we've got you covered.

Our reference laboratory service is always there as foundational support for your diagnostics practice, with quality, next-day results you can rely on. It's just one part of an innovative Zoetis Diagnostics offering that enables a uniquely integrated, fully customizable workflow for your practice and your patients.

This powerful portfolio of products and services gives you the tools to confidently diagnose and treat any case in the way that best suits your patients' needs. And it's all supported by the Zoetis Virtual Laboratory — an integrated support network of board-certified specialists paired with diagnostic insights that enhances every element of your diagnostic practice.

Wherever and however you test, you'll get the deep insights you need to elevate patient care.

Comprehensive Diagnostics

Full-service reference laboratories and breakthrough point-of-care capabilities for cytology, hematology, fecal testing and more.

Expert Support

Convenient expert review[†] and complimentary specialist consultations on any case via Zoom or email.

Connected Insights

Anytime, anywhere access to digital ordering, test results, expert support and more on the ZoetisDx portal — conveniently integrated with your PIMS*.

* Compatible with select practice information management software (PIMS).

[†] Additional costs may apply.

Turnaround Times

Fast, high-quality results are more important than ever in veterinary diagnostics. Our turnaround times reflect this, helping to ensure you have the results you need when you need them — easily accessed through your ZoetisDx portal — so you can make informed treatment decisions as quickly as possible.

Most common tests performed in our laboratories provide next-day results. Send-out testing, cultures and other tests may take longer. For specific test information, find your desired test in the test menu.

Routine Testing

Test Type	Results Delivery Turnaround Time	Sample Collection and Submission Guidelines For seasonal shipment tips, click here .
Chemistry (e.g., ClinChem 25, Total T4, SDMA)	Next day by 8 AM	- Fasted samples are recommended to avoid lipemia - Collect in SST or RTT - If using a RTT, separate serum from the cellular component within 1 hr of collection - Follow centrifugation best practices - Label aliquoted serum sample as SERUM
Hematology (e.g., CBC)	Next day by 8 AM	- Fasted samples are recommended to avoid lipemia - Use the largest vein and largest needle that can safely be used - Collect in LTT (CBC) or BTT (most coagulation tests) - Fill tubes to the blood tube's volume fill line. Failure to do so may clinically affect results. - Label aliquoted plasma as CITRATED PLASMA, if relevant - Coagulation testing requires special handling and separation of citrated plasma immediately after collection
Infectious Disease Serology (e.g., Heartworm, Lyme)	Next day by 8 AM	- May use whole blood, plasma or serum, as indicated by specific test ordered - Fasted samples are recommended to avoid lipemia - Follow separation/centrifugation best practices - Label aliquoted serum or plasma as such, including the type of plasma (e.g., EDTA PLASMA or CITRATED PLASMA)
Urinalysis	Next day by 8 AM	- Recommend submission of ≥ 5 ml of urine for most accurate results - Urine volume submissions <1 mL may result in incomplete urinalysis testing - Collect in a sterile, single-use yellow top urine tube with no additive or sterile urine collection cup - Label the tube URINE
Fecal Parasite Tests (e.g., Ova & Parasites, Giardia Antigen Test)	Next day by 5 PM	- 3-5 grams of fresh feces in sealed fecal cup

For general guidelines and additional shipping requirements, see [Sample Guidelines & Submission](#) for the type of test you are ordering.

[Core Lab Specimens](#) | [Parasitology Specimens](#) | [Microbiology Specimens](#) | [Histopathology Specimens](#) | [Cytology Specimens](#)

Turnaround Times (cont'd)

Pathology

Test Type	Results Delivery Turnaround Time	Sample Collection and Submission Guidelines For seasonal shipment tips, click here .
Cytopathology	1-2 days, Mon-Fri	- Use new, clean glass slides with frosted edge - Label slides clearly with patient name and site sampled using a pencil on frosted edge - Collect sample using the appropriate method for the lesion type; FNA is most common - Fluid submissions for cytology should be collected into an EDTA tube and refrigerated until sample pickup. - Glass slides should NOT be refrigerated.
Histopathology	Simple 3-7 days, Mon-Fri Complex Level 1 3-9 days, Mon-Fri Complex Level 2 Varies by nature of sample	- Formalin fixed or fresh tissue - History and description of the lesion is essential to a quality interpretation - Indicate the number of containers and specimens being sent - Label containers with the source of specimen - Formalin fixed tissue may be stored at room temperature - Keep fresh tissue refrigerated until sample pickup (do not freeze)

Turnaround Time Policy

Our goal is to meet published turnaround times and ensure results are delivered as quickly as possible.

- Turnaround times for routine testing do not include Sunday.
- Turnaround times for pathology testing do not include Saturday and Sunday.
- Electronic orders are preferred. Manual Paper requisition forms may extend turnaround time.
- If the quality of a sample we receive prevents us from producing quality results within our promised turnaround time, we will notify you.
Examples include samples that are damaged, contaminated, incorrectly preserved or packed, and samples that do not meet volume requirements.
- Once a specimen is received at the lab, we assume any risk of loss or damage.
- We reserve the right to reject any specimen likely to pose an unreasonable health or safety risk to our lab staff.

Send-Out Testing

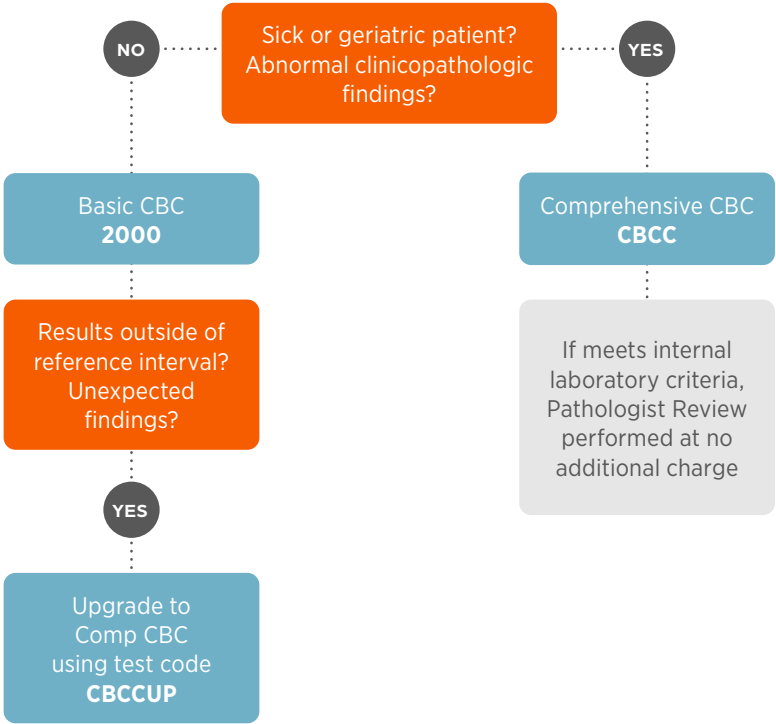

Some tests in our Directory are not performed at Zoetis Reference Laboratories.
Turnaround times for these tests are dependent on the partner laboratory that processes these tests.

Zoetis Reference Labs Testing Options: Hematology

Choose the CBC test that’s best for your patients.

At Zoetis Reference Laboratories, our CBCs are grounded in quality standard operating procedures developed by a team of board-certified clinical pathologists. Expertly trained technicians produce quality results, collaborating directly with pathologists as needed along the way.

	Basic Test code: 2000	Comprehensive Test code: CBCC
	Recommended for wellness screens in non-geriatric, healthy patients	Recommended for sick or geriatric patients
WBC, HGB, RBC, HCT, MCV, MCHC, CHCM, RDW, 5-Part WBC Differential, Platelet Count, MPV	✓	✓
Performed if indicated based on automated results: Spun PCV, Manual WBC Differential, Assessment for Platelet Clumping +/-, Visual Platelet Estimate, and/or Reticulocyte Count	✓	✓
Comprehensive manual smear review by technician		✓
Pathologist review if indicated by laboratory established criteria		✓

Test requirements: EDTA whole blood, air-dried slides

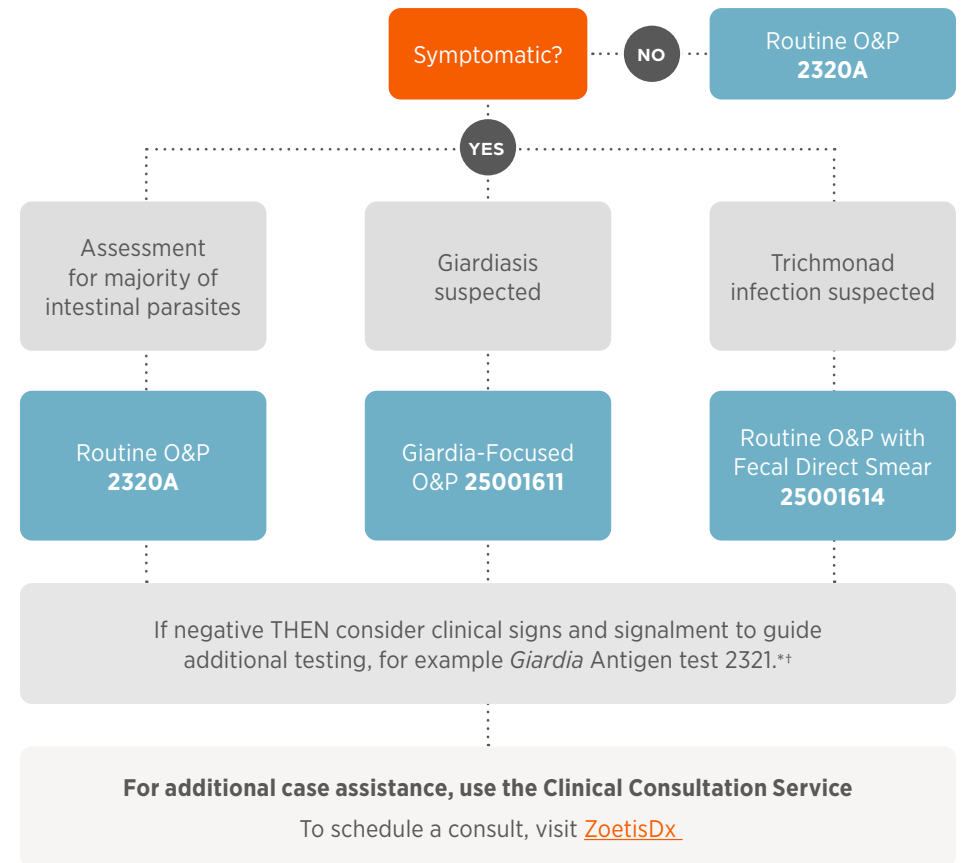

Zoetis Reference Labs Testing Options: Fecal/Parasitology

Solutions tailored to your patients' medical needs

- Ova and Parasite (Centrifugal Fecal Flotation) Test | **2320A**
- *Giardia* Antigen Test | **2321**
- *Giardia* Antigen Test, Canine/Feline Add-on | **A2321**
- Ova and Parasite (Centrifugal Fecal Flotation) Test and *Giardia* Antigen Test | **2320**
- *Giardia*-Focused O&P | **25001611**
- Fecal Direct Smear Test | **25001610**
- Fecal Sedimentation Test | **25001612**
- Baermann Test | **BAER**
- O&P (Centrifugal Fecal Flotation) Panel | **25001613**
- O&P (Centrifugal Fecal Flotation) with Direct Smear | **25001614**

See the full list of Fecal/Parasitology Tests for...

[Canine & Feline](#) | [Large Animals](#)

* If *Giardia* is confirmed and treated, follow-up testing 24-48 hours after completion of treatment is recommended.

† *Giardia*-focused O&P is recommended for both asymptomatic and symptomatic patients. If no ova or parasites are seen in symptomatic patients, recommend *Giardia* Ag test

Zoetis Reference Labs Testing Options: Cytopathology

Solutions tailored to your medical need

Our standard turnaround time is 1-2 days, Mon-Fri.

Cytopathology Simple/Single Site | 7120

For the following sample types:

- Single lesion/tissue (FNA, swab, impression smear)
- Single or multiple lymph nodes
- Single joint (slides only)
- Fluid from mass lesion (cytology only)

Cytopathology Complex | 7201

For the following sample types:

- Multiple lesions/tissues (FNA, swab, impression smear) – up to 7 sites
- Joint fluid in LTT (single or multiple)
- Multiple joints (slides only)
- Cavitory effusion (single or multiple)
- CSF
- Bone marrow
- BAL/TTW
- Other fluids/lavage

Synoptic reporting designed to improve interpretation

We're pleased to tell you about our histopathology report format for malignancies and gastrointestinal biopsies.

This report structure, known as synoptic reporting, breaks down results into easy-to-read tables and checklists. By simplifying data presentation and ensuring consistency of formatting, we're making it easier for you to:

- Locate and evaluate key diagnostic and prognostic features
- Scan and digest report findings
- Communicate effectively with pathologists

Tube Guide

Use this quick reference guide to identify which tubes are appropriate for sample collection, based on sample type and common test usage.

For instructions on how to prepare and submit your sample, please refer to the collection guidelines specific to your sample type.

Tube Type	Additive	Sample Type(s)	Tube Description	Common Uses
Blue-top tube ● BTT 	3.2% sodium citrate anticoagulant	Plasma	Light blue top – Microtube also available for low-volume samples (very small, pediatric, and exotic species)	Coagulation testing (PT, aPTT, coagulation factor assays)
Purple-top or lavender-top tube ● LTT 	Potassium EDTA anticoagulant	Whole blood or plasma (EDTA plasma is rarely required)	Purple or lavender top – Microtube also available for low-volume samples (very small, pediatric, and exotic species)	Most common use: – Whole blood for CBC
Green-top tube ● GRNTT 	Lithium heparin	Whole blood or plasma	Green top – Microtube also available for low-volume samples (very small, pediatric, and exotic species)	Most common use: – Free (ionized) calcium, whole blood for point-of-care chemistry testing Other uses: – Lithium heparin plasma sometimes required for specialized testing
Mint- or light green-top microtube ■ M-GRNTT 	Lithium heparin	Plasma	Mint- or light green-top microtube – Opaque, light yellow gel at bottom of tube – Differs from green-top tube in that it contains a gel barrier that separates RBCs from plasma when centrifuged	Most common use: – Lithium heparin plasma sometimes required for specialized testing
Red-top tube ● RTT 	Clot activator	Serum	Red top with chalky residue (clot activator) in tube Please note: No-additive RTTs are also available. Tubes with clot activator should not be used when a no-additive tube is required.	Most common use: – Serum chemistry testing Other uses: – Immunology – Serology – Many others

Tube Guide (cont'd)

Tube Type	Additive	Sample Type(s)	Tube Description	Common Uses
Serum-separator tube or tiger-top tube ○ SST 	Clot activator (embedded in gel)	Serum	Red top, red and black marble top (tiger top) - Pediatric tube with gold-top microtube also available for low-volume samples (very small, pediatric, and exotic species) - Important not to confuse gold-top tube with yellow-top urine tube - All tubes have opaque light yellow gel at bottom of tube	Most common use: - Serum chemistry testing Other uses: - Immunology - Serology - Many others
White-top tube ○ WTT 	No additive	Serum or Plasma	White top (no additive)	Used when serum or plasma needs to be separated from RBCs and removed from original collection tube to avoid prolonged contact with RBCs or separator gel - Used when special handling of sample required (such as freezing) - Sometimes used for collection of fluids/urine and materials for culture
Yellow-top tube ● YTT 	No additive	Urine	Bright yellow top - May have a conical or tapered base - Do not confuse with gold-top serum tubes used occasionally	Urine for urinalysis and other various tests

Sample Guidelines & Submission

Core Lab Specimens

Core Lab specimens include whole blood, serum, plasma, urine, other liquid samples and blood smears (slides).

- Label all tubes with the patient's first and last name.
- Serum, plasma or sometimes urine cannot be differentiated visibly. Be sure to label the tube with the type of sample it contains. Plasma must be further differentiated as containing EDTA, Citrate or Heparin plasma.
- Refrigerate within 30 minutes of collection and keep refrigerated until sample pickup.
- Do not freeze samples unless expressly indicated in the test menu.
- If shipping refrigerated samples via UPS, include a frozen ice pack in the packaging. Wrap the ice pack in a paper towel or similar covering to avoid direct contact with the sample, which may cause the sample to freeze.
- For CBC submissions, we recommend making a blood smear at the time of sample collection. Store any prepared slides at room temperature. Refrigeration of glass slides causes condensation that can destroy the sample. Submit any prepared slides along with the sample tubes.
- Samples that must be shipped frozen require additional special handling. Consult the [Test Menu](#) or contact [Customer Service](#) for specific shipping recommendations.

See the [full blood sample collection and submission guidelines](#), which includes best practices for whole blood, plasma, serum and urine.

Parasitology Specimens

Parasitology specimens include feces.

- Refrigerate as soon as possible after collection and keep refrigerated until sample pickup.
- Include a frozen ice pack in the packaging.
- Wrap the ice pack in a paper towel or similar covering to avoid direct contact with the sample, which may cause the sample to freeze.

Microbiology Specimens

Microbiology specimens include culture swabs, liquid samples (e.g., urine), tissue and feces.

- Collect specimens as aseptically as possible to prevent overgrowth by normal flora.
- Collect before the administration of microbials, whenever possible.
- Label sample with the patient's first and last name, the source/site, and date of collection.
- Store and ship culture swabs at room temperature.
- Refrigerate urine, feces or tissue being submitted for culture within 30 minutes of collection, and keep refrigerated until sample pickup.
- If shipping refrigerated samples via UPS, include a frozen ice pack in the packaging. Wrap the ice pack in a paper towel or similar covering to avoid direct contact with the sample, which may cause the sample to freeze.
- Do not send needles, razors, broken glass, plastic or anything sharp with your sample or as your sample.
- Please properly discard used needles or other sharps prior to transportation. For the submission of syringes, the needle must be removed and the syringe capped prior to transportation to ensure there is no leakage.

See the [full microbiology sample collection and submission guidelines](#).

Sample Guidelines & Submission (cont'd)

Histopathology Specimens

Histopathology specimens include biopsies — formalin-fixed and fresh tissue.

- Complete the requisition form as indicated for pathology submissions. History and description of the lesion are vital to a quality histopathology report.
- Indicate the number of containers and specimens being sent so the lab can appropriately verify receipt of all samples.
- Label the container(s) with the patient's first and last name, collection date, and source of specimen. Ensure this labeling matches information supplied on the requisition form.
- Fresh tissue must be kept cold with ice packs during shipment to avoid tissue autolysis. See below for additional guidance.
- Place the specimen and any forms in separate, sealed plastic bags. Double bag specimens, whenever possible.
- Ice packs can break or leak during shipping, which is why we stress sealing accompanying forms in separate, sealed plastic bags.

Formalin-fixed tissue

- Always place tissues in 10% neutral buffered formalin to ensure appropriate fixation. A 10:1 formalin to tissue ratio is recommended.
- In extreme cold, add isopropyl or ethyl alcohol to your formalin jars (1 part alcohol to 10 parts formalin) to prevent freezing. Note "alcohol added" on the container or in the submission notes.
- In extreme heat, submit samples in an insulated shipping container with frozen ice packs.

Fresh tissue

- In extreme cold, submit samples in an insulated shipping container and include cold (not frozen) soft gel ice packs.
- In extreme heat, submit samples in an insulated shipping container with frozen ice packs.

See the [full histopathology sample collection and submission guidelines](#).

Cytology Specimens

Cytology specimens include customer-prepared slides and liquid samples.

- Use new, clean glass slides with a frosted edge.
- Using a pencil (ink labeling can wash off), label slides clearly on the frosted edge with the patient name and sites.
- Store any prepared slides at room temperature. Refrigeration of glass slides causes condensation that can destroy the sample.
- For shipping cytology slides, we recommend using hard plastic slide boxes designed for this purpose. Ensure all slides have completely air-dried before packaging. DO NOT enclose slides in slide boxes prior to drying, as this can damage the sample due to humidity.
- Avoid shipping any cytology slides or liquid samples inside packaging that also contains any form of formalin. Fumes can escape from closed formalin containers or liquid formalin can leak en route. Both formalin fumes and liquid formalin can destroy a cytology slide.
- Refrigerate any liquid samples (e.g., cavitory effusion, CSF) until sample pickup.
- If liquid samples are being shipped for cytology, include a frozen ice pack in the packaging. Wrap the ice pack in a paper towel or similar covering to avoid direct contact with the sample, which may cause the sample to freeze.
- If a liquid cytology sample is intended for cytological examination, we recommend using an EDTA tube. If a liquid cytology sample is also intended for culture, submit an additional sterile, no-additive tube aliquot.
- We recommend preparing a direct fluid smear at the time of liquid specimen sample collection. Submit any prepared slides with the sample tubes of liquid samples.

See the [full cytopathology sample collection and submission guidelines](#).

Seasonal Shipment Tips

Tips for Summer

Extreme heat can compromise sample integrity. Follow these guidelines to help maintain sample quality.

Do not place samples in lockboxes or outdoors until close to sample pickup.

Include ice packs for any refrigerated samples and consult the specimen instructions for any frozen sample shipping requirements (dry ice may be required).

Multiple ice packs may be utilized when temperatures are 90°F and above.

Wrap the ice pack in a paper towel or similar covering to avoid direct contact with the sample, which may cause the sample to freeze.

Tips for Winter

Extreme cold can compromise sample integrity. Unintentional freezing of samples can render them useless. Follow these guidelines to help maintain sample quality.

Do not place samples in lockboxes or outdoors until close to sample pickup.

Do not use a frozen ice pack in cold weather. Instead, use a cold (not frozen) soft gel ice pack, placing the pack around the samples. This will help ensure temperature distribution during transit, decreasing the likelihood of sample freezing.

In extremely cold weather consider using a Styrofoam-insulated box for shipping.

Sending Your Sample

Our goal is to offer you the best reference lab experience. To make sure sending samples to us is as convenient as possible, we are covering the cost of transportation fees for qualified customers.*

Next-day Service with UPS®

Please follow the instructions to the right, but feel free to give us a call at **1-888-965-9652** or reach out to your local representatives if you have any questions.

Simple Steps for Sending a Package Via UPS:

1. Request a UPS label

- Call Customer Service at **1-888-965-9652** to create and print a shipping label. We will provide you with UPS shipping labels that are addressed to Zoetis Reference Laboratories.
- You must use these UPS labels on all packages you send to Zoetis Reference Laboratories. This will ensure that your packages are delivered to us as quickly and as safely as possible.

2. Prepare the package

- Put your labeled and packaged samples in the UPS Laboratory Pak and seal.
- We have insulated mailers available for shipping in extreme temperatures. If you are using these, place everything, including ice packs, inside the insulated mailer, place the insulated mailer inside the UPS Laboratory Pak, and seal.
- Peel and affix the UPS label. Multiple samples can go in one UPS Laboratory Pak.
- Keep the separate, smaller “customer copy” label that contains the UPS tracking number for your records. If any issues arise during shipping, having the UPS tracking number is essential when trying to locate your package.
- For seasonal tips, [click here](#).

3. Set up your clinic as a UPS Package Pickup Point

- We recommend setting up your clinic as a UPS Package Pickup Point (UPS-PPP). This is a free service that will be completed for you during the onboarding process.
- If you anticipate sending samples more than 3 times a week, scheduling a daily UPS pickup is recommended.
- Once your package pickup point is activated and a schedule established, the driver will stop by daily within the assigned time frame, with no call or email required. (Note: The UPS driver will pick up any UPS packages at your location.)

* \$55.00 monthly Processing and Handling fee applied to customers spending \$500 or less per month.

To find out if courier service is available for your practice, please contact your Zoetis Diagnostics representative or call us at **1-888-965-9652**.

Access Your Results Anytime, Anywhere, from Any Device

A Zoetis-connected practice means you can access the power of a comprehensive and fully integrated suite of Zoetis products and services from your practice management software, your phone and everywhere in between.

The ZoetisDx portal is the connectivity solution from Zoetis that makes it easy to:

- Order and view test results digitally, eliminating the need for paper transactions
- Access the most up-to-date test menu
- Drive informative discussions to improve pet owner-veterinarian communication
- Connect with a global network of board-certified specialists to support your clinical decisions
- Access Zoetis Reference Laboratories and Zoetis point-of-care results on a single, easy-to-use platform

Easy Supply Ordering

We are happy to provide routine laboratory supplies at no charge to our active Zoetis Reference Laboratories customers. To order supplies, please call Customer Service at **1-888-965-9652** or access eCommerce at shop.zoetis.com for all your supplies.

The screenshot shows the Zoetis website's login and registration interface. At the top, the Zoetis logo is on the left, and the text "SIGN IN OR CREATE AN ACCOUNT" is centered in a white box on an orange background. Below this, there are three main sections: "Already a customer?", "NEW CUSTOMER?", and "REGISTER WITH ZOETIS". The "Already a customer?" section includes fields for "Email" and "Password", a "Remember me" checkbox, a "Login →" button, and a link for "Can't login?". The "NEW CUSTOMER?" section lists benefits of having a Zoetis account, such as "Directly purchase products and services", "Access resources for your business", "Earn education credits", and "And lots more", with a "CREATE AN ACCOUNT" link at the bottom. The "REGISTER WITH ZOETIS" section lists benefits of registration, such as "Shop online anytime" and "Receive animal health updates", with a "GET STARTED" link at the bottom. A vertical "Zoetis Reference Labs" logo is on the right side of the registration section.

Diagnostic Core Panels Overview

Core Panels – Designed for Clarity, Built for Confidence

At Zoetis Reference Laboratories, our Diagnostic Core Panels are thoughtfully designed to simplify test selection while delivering meaningful insights that support confident clinical decisions.

Our Wellness Core Panels by Life Stage help you proactively manage patient health with age-appropriate testing for puppies, kittens, adults, and seniors—ensuring comprehensive care at every stage of life.

Our Clinical Core Panels provide you with the information you need to evaluate organ systems or disease states in your patients. These scenario-based panels are tailored to common presentations such as endocrine disorders and infectious disease—streamlining your workflow and supporting faster, more targeted treatment plans.

Wellness

Named for **life stages** and generally intended for wellness testing:

- ZRL™ Junior
- ZRL™ Adult
- ZRL™ Senior

Clinical

Named for **clinical area of need** and generally intended for evaluation of specific organ systems or investigation of specific disease states.

Upgrade any Core Panel to a Comprehensive CBC. Use test code **CBCCUP**.

Upgrade any Core Panel with a Urinalysis to a Urinalysis with Reflex UPC. Use test code **25001702**.

Junior and Adult Core Panels

Junior Core Panels

All Junior Core Panels include a Basic CBC and a ClinChem 18 with SDMA.

Select each code for full test details.

Components	Test Name	Test Code	Price
Basic CBC, ClinChem 18 with SDMA, Urinalysis	ZRL™ Junior Complete	JWP	\$53.56
+ HW	ZRL™ Junior Complete with HW	25001642	\$60.46
Basic CBC, ClinChem 18 with SDMA, Ova and Parasite	ZRL™ Junior with O&P	25001635	\$75.57
+ HW, Tick	ZRL™ Junior with O&P, HW, Tick	25001636	\$84.03
+ Giardia, HW, Tick	ZRL™ Junior with O&P, Giardia, HW, Tick	25001637	\$86.79
Basic CBC, ClinChem 18 with SDMA	ZRL™ Junior	25001634	\$51.08
+ T4	ZRL™ Junior with T4	25001641	\$68.09
+ HW	ZRL™ Junior with HW	25001638	\$57.60
+ HW, Tick	ZRL™ Junior with HW, Tick	25001639	\$70.19
+ PT/aPTT	ZRL™ Junior with PT/aPTT	25001640	\$64.95

Adult Core Panels

All Adult Core Panels include a Basic CBC and a ClinChem 25 with SDMA.

Components	Test Name	Test Code	Price
Basic CBC, ClinChem 25 with SDMA, Urinalysis	ZRL™ Adult Complete	AWP	\$54.29
+ O&P, HW, Tick	ZRL™ Adult Complete with O&P, HW, Tick	25001631	\$79.34
Basic CBC, ClinChem 25 with SDMA, Ova and Parasite	ZRL™ Adult with O&P	25001630	\$69.96
Basic CBC, ClinChem 25 with SDMA	ZRL™ Adult	25000501	\$45.82
+ HW	ZRL™ Adult with HW	25000502	\$52.72

Upgrade any Core Panel to a Comprehensive CBC Use test code **CBCCUP**.

Upgrade any Core Panel with a Urinalysis to a Urinalysis with Reflex UPC. Use test code **25001702**.

Senior Core Panels

Senior Core Panels

All Senior Core Panels include a Basic CBC, a ClinChem 25 with SDMA, and a T4.

Comprehensive CBC upgrade is recommended for all Senior Core Panels. Use test code **CBCCUP**.

Upgrade any Core Panel with a Urinalysis to a Urinalysis with Reflex UPC. Use test code **25001702**.

Select each code for full test details.

Components	Test Name	Test Code	Price
Basic CBC, ClinChem 25 with SDMA, T4, Urinalysis	ZRL™ Senior Complete	SWP	\$78.63

UA = Urinalysis
Cbl = Cobalamin
Fol = Folate
TLI = Trypsin-Like Immunoreactivity

ClinChem Core Panels

Our ClinChem Core Panels focus on key chemistry values such as liver and kidney function, electrolytes, glucose, and protein levels. Whether used for routine screening or to investigate clinical concerns, these panels offer the clarity and consistency your practice depends on.

Test Name	Test Code	Components	Recommended Use Case	Price
ClinChem 18 with SDMA	25001624	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, TBili, Chol, SDMA	Health screen or undiagnosed sick patient	\$31.69
ClinChem 25 with SDMA	25001625	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, TBili, Chol, CO2, Anion Gap, Mg, AST, GGT, CK, Osmol(c), SDMA	Comprehensive health screen or undiagnosed sick patient	\$34.77
Feline Hyperthyroid ClinChem	25000507	BUN, Creat, K, Phos, Alb, ALT, SDMA, TT4	Monitoring feline hyperthyroid patients	\$24.42
Metabolic ClinChem	25000512	Glu, BUN, Creat, BUN:Creat Ratio, TP, ALP, ALT, Chol, Na, K, Na:K Ratio, Trig, Fructosamine, TT4	Monitoring diabetic patients	\$36.11
Mini Renal ClinChem	25000513	BUN, Creat, K, Phos, Alb	Monitoring renal disease	\$9.57
Renal ClinChem	25000479	Glu, Na, K, Cl, BUN, Creat, BUN:Creat Ratio, Ca, P, CO2, AG, TP, ALB, Chol, Osmol(c), SDMA	Expanded renal disease monitoring	\$23.66
Mature Cat ClinChem	25000482	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, AST, GGT, CK, TBili, Chol, TT4, Fructosamine	Monitoring senior cat health	\$35.14
Critical Care ClinChem, Canine/Feline	25000488	Glu, BUN, Creat, BUN:Creat Ratio, TP, Alb, Na, K, Na:K Ratio, Cl, CO2, Anion Gap, TBili, Osmol(c)	Monitoring electrolytes, acid base, and renal status	\$11.42
Liver ClinChem	25000510	Glu, BUN, TP, Alb, Glob, Alb:Glob Ratio, AST, ALT, ALP, GGT, TBili, Chol	Monitoring liver disease	\$11.42
NSAID ClinChem	25000514	BUN, Creat, BUN:Creat Ratio, ALT	Monitoring effects of NSAID therapy	\$9.57
Phenobarbital ClinChem	25000515	Glu, Na, K, Creat, Ca, TP, Alb, ALT, ALP, TBili, Phenobarbital	Monitoring phenobarbital therapy	\$38.17
Pre-Anesthetic ClinChem	25000516	Glu, Na, K, Creat, Ca, TP, ALT, TBili	Health screen prior to anesthesia/sedation	\$9.57

Core Panels

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
ZRL™ Junior Complete	JWP	●●●● 1 mL serum and 2 mL EDTA whole blood, 5 mL urine in YTT/sterile container	Basic CBC, ClinChem 18 with SDMA, Urinalysis	8 AM next day	\$53.56
ZRL™ Junior Complete with HW	25001642	●●●● 2 mL serum and 2 mL EDTA whole blood (LTT) 5 mL urine in a YTT/sterile container	Basic CBC, ClinChem 18 with SDMA, Urinalysis, Heartworm Antigen	8 AM next day	\$60.46
ZRL™ Junior with O&P	25001635	●●●● 1 mL serum and 2 mL EDTA whole blood (LTT), 3-5g fresh feces	Basic CBC, ClinChem 18 with SDMA, Ova and Parasite	8 AM next day Fecal 5 PM next day	\$75.57
ZRL™ Junior with O&P, HW, Tick	25001636	●●●● 2 mL serum and 2 mL EDTA whole blood (LTT), 3-5g fresh feces	Basic CBC, ClinChem 18 with SDMA, Ova and Parasite, Heartworm Antigen, Tick Panel	8 AM next day Fecal 5 PM next day	\$84.03
ZRL™ Junior with O&P, Giardia, HW, Tick	25001637	●●●● 2 mL serum and 2 mL EDTA whole blood (LTT), 5g fresh feces	Basic CBC ClinChem 18 with SDMA, Ova and Parasite and <i>Giardia</i> Ag ELISA, Heartworm Antigen, Tick Panel	8 AM next day Fecal 5 PM next day	\$86.79
ZRL™ Junior	25001634	●●● 1 mL serum and 2 mL EDTA whole blood (LTT)	Basic CBC, ClinChem 18 with SDMA	8 AM next day	\$51.08
ZRL™ Junior with T4	25001641	●●● 1 mL serum and 2 mL EDTA whole blood (LTT)	Basic CBC, ClinChem 18 with SDMA, T4	8 AM next day	\$68.09
ZRL™ Junior with HW	25001638	●●● 2 mL serum and 2 mL EDTA whole blood (LTT)	Basic CBC, ClinChem 18 with SDMA, Heartworm Antigen	8 AM next day	\$57.60
ZRL™ Junior with HW, Tick	25001639	●●● 2 mL serum and 2 mL EDTA whole blood (LTT)	Basic CBC, ClinChem 18 with SDMA, Heartworm Antigen, Tick Panel	8 AM next day	\$70.19

Core Panels (cont'd)

Hematology/Coagulation

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Basic CBC, Canine/Feline (Healthy, Non-geriatric)	2000	- LTT 2 mL EDTA whole blood, blood smear 	RBC, HCT, HGB, MCV, MCHC, CHCM, RDW, WBC, WBC Differential, Platelet Count, MPV. If results indicate, will include a PCV, Manual Differential, and/or Reticulocyte Count.	8 AM next day	\$19.10
Comprehensive CBC, Canine/Feline	CBCC	- LTT 2 mL EDTA whole blood, blood smear 	CBC with blood smear review by technician. If results indicate, will include a PCV, Manual Differential, Saline Agglutination Test, Reticulocyte Count, and/or Pathologist Review.	8 AM next day*	\$31.46
Pathologist Review	PATH		Blood smear review by pathologist when ordered pre-emptively. Only comprehensive CBCs are eligible for pathologist review.	1-2 days	\$84.26
Comprehensive CBC Upgrade (add to Core Panel)	CBCCUP	- LTT 2 mL EDTA whole blood, blood smear 	CBC with blood smear review by technician. If results indicate, will include a PCV, Manual Differential, Saline Agglutination Test, Reticulocyte Count, and/or Pathologist Review.	8 AM next day*	\$12.36
Reticulocyte	RETIC	- LTT 0.5 mL EDTA whole blood 	RBC, % Reticulocyte, Absolute Reticulocyte	8 AM next day	\$19.47

* Pathologist Review may extend turnaround time by 1-2 days for final report.

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Antithrombin (AT3) [†]	ANTTHRO3	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs. 		3-5 days	\$120.37
Blood Typing	BLTYP	● LTT 0.5 mL EDTA whole blood 		1-2 days	\$120.34
Crossmatch, One Donor	XMTCH1	● ● RTT, LTT 1 mL serum AND 1 mL EDTA whole blood required for recipient and each donor 	Blood pigtails also accepted as donor specimens.	1-2 days	\$66.83
Crossmatch, Two Donors	XMTCH2	● ● RTT, LTT 1 mL serum AND 1 mL EDTA whole blood required for recipient and each donor 	Blood pigtails also accepted as donor specimens.	1-2 days	\$120.34

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Crossmatch, Three Donors	XMTCH3	● ● RTT, LTT 1 mL serum AND 1 mL EDTA whole blood required for recipient and each donor 	Blood pigtailed also accepted as donor specimens.	1-2 days	\$160.49
Crossmatch, Additional Donor	XMTCHX	● ● RTT, LTT 1 mL serum AND 1 mL EDTA whole blood required for recipient and each donor 	Blood pigtailed also accepted as donor specimens.	1-2 days	\$40.09
DIC Panel†	6565	● ○ BTT, WTT 2-3 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs. 	aPTT, PT, Fibrinogen, Antithrombin, D-Dimer	2-5 days	\$194.51

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Flow Cytometry†	FLOW	As appropriate, 1 mL whole blood, cavitory fluid, or bone marrow in EDTA or tissue aspirate in sterile no-additive tube (WTT) 	Peripheral blood Samples must have had CBC within previous 48 hours; please submit results with sample. If a CBC is not submitted with a peripheral blood sample, a Comprehensive CBC will be added and performed by ZRL for an additional charge due to the time sensitive nature of this test. For tissue aspirate submissions, please call to consult on sample preparation and submission	3-7 days	\$241.55
Flow Cytometry with CBC†	FLOWCBC	LTT Peripheral blood submissions only. For Flow Cytometry: 1 mL EDTA whole blood (LTT). For CBC: 2 mL EDTA whole blood (LTT) 	ZRL will perform a Comprehensive CBC using additional blood included in submission. This test code is designed for flow cytometry testing on whole blood only. Use test code FLOW for other sample types and add on CBC as desired.	3-7 days	\$293.23
Hemophilia Panel, Canine/Feline†	HEMO	○ BTT, WTT 2-3 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs. 	aPTT, PT, TCT, Factor VIII:C, Factor IX:C, vWF:Ag	3-5 days	\$161.94

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Iron, Serum/Plasma, Canine†	IRON	● ● RTT, GRNTT 0.5 mL separated serum or heparinized plasma 		3-5 days	\$88.35
Iron Profile†	IRONPRO	● ● RTT, GRNTT 0.5 mL serum or heparinized plasma 	Iron, TIBC, and Ferritin	7-10 days	\$150.14
Platelet Surface Associated Antibody†	PBA	● LTT 1 mL EDTA whole blood 		4-7 days	\$154.77
Protein C†	PROC	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs. 		2-3 days	\$124.87
PT & aPTT	4101	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) 	For weekend and holiday shipping recommend freezing plasma and sending on ice.	8 AM next day	\$26.75

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
von Willebrand factor (vWF:Ag) [†]	4106	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT). Freeze. Ship on ice packs. 		3-5 days	\$116.43
Buffy Coat	6295	● LTT 1 mL EDTA whole blood 		1-2 days	\$113.66
D-Dimer	4104	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 	Semiquantitative D-Dimer assay	1-2 days	\$42.80
Direct Coombs	2701	● LTT 2 mL EDTA whole blood 		1-2 days	\$66.83
Fibrinogen, Canine/Feline	4103	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 		2-3 days (3-4 days for feline samples)	\$26.75

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Hemostasis Panel, Canine/Feline†	6560	● ○ BTT, WTT 2-3 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 	aPTT, PT, TCT, vWF:Ag	3-5 days	\$131.61
Technician Blood Smear Review	SMREV	● LTT 2 unstained, air-dried slides; include 2 mL EDTA whole blood, if possible (for in-lab preparation of smears)  Blood  Slides	Morphologic review of RBC, WBC, and platelets; Manual WBC Differential, and visual platelet estimate. If indicated based on internal lab criteria, a Pathologist Review will be included.	8 AM next day If pathologist review added, TAT is delayed	\$18.69
Coagulation Panel, Canine/Feline (Cornell)†	COAGFA	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 	aPTT, PT, TCT	2-3 days	\$109.69
Clotting Factor FIX†	FACTORIX	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 		2-3 days	\$95.66

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Clotting Factor FVIII [†]	FACTORVIII	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 		2-3 days	\$95.66
Clotting Factor FX [†]	FACX	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 		2-3 days	\$95.66
Erythropoietin (EPO) [†]	50227	● ● SST, RTT 1-2 ml separated serum in SST or aliquotted into no-additive tube (WTT)		5-7 days	\$194.51
<i>Babesia</i> Blood Smear [†]	BABBLDSMR	● LTT 2 mL EDTA whole blood 	Giemsa blood smear examination for <i>Babesia</i> organisms (available for export animals only)	3-5 days	\$82.62
Clotting Factor FXII [†]	FACTORXII	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 		2-3 days	\$95.66

Hematology/Coagulation (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Low Molecular Weight Heparin†	LMWHEPARIN	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 	Anti-Xa activity of LMWH	2-3 days	\$124.30
Coagulation Panel and Fibrinogen, Canine/Feline†	25001390	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 	aPTT, PT, TCT, and Fibrinogen	2-3 days	\$118.13
ZRL™ Coagulation Panel I	COAG	● ● LTT, BTT 1 mL EDTA whole blood and 0.5 mL separated citrated plasma 	PT, aPTT, Platelet Count, Total Plasma Protein	8 AM next day	\$99.99
ZRL™ Coagulation Panel II	25001391	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs 	PT, aPTT, Fibrinogen, D-Dimer	2-3 days	\$96.30

Chemistry

Chemistry Panels

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Feline Hyperthyroid ClinChem	25000507	 ● SST or RTT 1 mL serum 	BUN, Creat, K, Phos, Alb, ALT, SDMA, TT4	8 AM next day	\$24.42
Metabolic ClinChem	25000512	 ● SST or RTT 2 mL serum 	Glu, BUN, Creat, BUN:Creat Ratio, TP, ALP, ALT, Chol, Na, K, Na:K Ratio, Trig, Fructosamine, TT4	1-3 days	\$36.11
Renal ClinChem	25000479	 ● SST or RTT 2 mL serum 	Glu, Na, K, Cl, BUN, Creat, BUN:Creat Ratio, Ca, P, CO2, AG, TP, ALB, Chol, Osmol(c), SDMA	8 AM next day	\$23.66
Mature Cat ClinChem	25000482	 ● SST or RTT 2 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, AST, GGT, CK, TBili, Chol, TT4, Fructosamine	1-2 days	\$35.14
Critical Care ClinChem, Canine/Feline	25000488	 ● SST or RTT 1 mL serum 	Glu, BUN, Creat, BUN:Creat Ratio, TP, Alb, Na, K, Na:K Ratio, Cl, CO2, Anion Gap, TBili, Osmol(c)	8 AM next day	\$11.42
Liver ClinChem	25000510	 ● SST or RTT 1 mL serum 	Glu, BUN, TP, Alb, Glob, Alb:Glob Ratio, AST, ALT, ALP, GGT, TBili, Chol	8 AM next day	\$11.42
Mini Renal ClinChem	25000513	 ● SST or RTT 0.5 mL serum 	BUN, Creat, K, Phos, Alb	8 AM next day	\$9.27
NSAID ClinChem	25000514	 ● SST or RTT 0.5 mL serum 	BUN, Creat, BUN:Creat Ratio, ALT	8 AM next day	\$9.27

Chemistry (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Phenobarbital ClinChem	25000515	● RTT 1 mL serum, separated 	Glu, Na, K, Creat, Ca, TP, Alb, ALT, ALP, TBili, Phenobarbital RTT serum preferred for phenobarbital testing. SST serum may affect phenobarbital results.	1-2 days	\$38.17
Pre-Anesthetic ClinChem	25000516	● ● SST or RTT 0.5 mL serum 	Glu, Na, K, Creat, Ca, TP, ALT, TBili	8 AM next day	\$9.57
ClinChem 18	CHEM18	● ● SST or RTT 1 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, TBili, Chol	8 AM next day	\$21.35
ClinChem 18 with SDMA	25001624	● ● SST or RTT 1 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, TBili, Chol, SDMA	8 AM next day	\$31.69
ClinChem 25	1000	● ● SST or RTT 1 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, TBili, Chol, CO2, Anion Gap, Mg, AST, GGT, CK, Osmol(c)	8 AM next day	\$28.09
ClinChem 25 with SDMA	25001625	● ● SST or RTT 1 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, TP, Alb, Glob, Alb:Glob Ratio, ALT, ALP, TBili, Chol, CO2, Anion Gap, Mg, AST, GGT, CK, Osmol(c), SDMA	8 AM next day	\$34.77

Chemistry (cont'd)

Individual Chemistry Tests

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Triglycerides	1023	● ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.38
SDMA	7037	● ● SST or RTT 0.5 mL serum 		8 AM next day	\$18.90
Bile Acids Pre/Resting	6180	● ● SST or RTT 0.5 mL serum 		1-2 days	\$29.39
Bile Acids Post	6181	● ● SST or RTT 0.5 mL serum 		1-2 days	\$29.39
Free (Ionized) Calcium	IONISTAT	● GRNTT 0.5 mL lithium heparinized whole blood 	Ensure that the sample is treated anaerobically and that the correct ratio of heparin anticoagulant to blood is achieved (do not underfill GRNTT).	1-2 days	\$53.50
Free (Ionized) Calcium (Mich. State Univ.)†	6304	● RTT 0.75 mL serum, separated 		3-6 days	\$83.85

Chemistry (cont'd)

Individual Chemistry Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Osmolality†	OSMOLAL	  RTT or GRNTT 1 mL separated serum or heparinized plasma 		2-3 days	\$100.71
Albumin	1001	  SST or RTT 0.5 mL serum 		8 AM next day	\$7.46
Canine C-reactive Protein (CRP)†	CRP	   RRT, GRNTT or LTT 1 mL serum or plasma (heparinized or EDTA) 		5-7 days	\$149.84
High-Sensitivity Cardiac Troponin I†	TROPONIN	  SST or RTT 0.5 mL non-hemolyzed serum (frozen) 	Non-canine species' reports will not contain reference interval or interpretive comments. Sample should arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	4-5 days	\$143.40
Corticosteroid-Induced Alk Phos (CIALP)†	CIALP	   SST, RTT or GRNTT 0.5 mL serum or heparinized plasma 		2-3 days	\$156.16
NT-proBNP†	PROBNP	   LTT, SST or RTT 1 mL EDTA plasma (preferred) or serum 		3-7 days	\$179.18
ALT	1002	  SST, RTT 0.5 mL serum 		8 AM next day	\$9.19

Chemistry (cont'd)

Individual Chemistry Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
ALP (Alk Phos)	1003	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
AST	1005	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
BUN	1006	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Chloride	1007	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
Calcium (Total Calcium)	1008	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Cholesterol	1009	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Creatinine	1010	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Creatinine Kinase (CK)	1011	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.46

Chemistry (cont'd)

Individual Chemistry Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
GGT	1013	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
Glucose	1014	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Magnesium	1016	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
Phosphorus	1017	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Potassium	1018	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$9.19
Sodium	1019	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
CO2	1020	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
Total Bilirubin	1021	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86

Individual Chemistry Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Total Protein	1022	 ● SST or RTT 0.5 mL serum 		8 AM next day	\$7.86
Glomerular Filtration Rate (Iohexol Clearance)[†]	GFRIC	 ● SST or RTT 0.5 mL serum (3 samples required) 	Serum samples should be taken two, three, and four hours following a single injection of iohexol (300 mg iodine equivalents/kg body weight). Each sample should yield at least 0.5 mL serum.	6-8 days	\$205.19

Urine

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Urinalysis	3000	 YTT 5 mL urine in YTT/sterile container 		8 AM next day	\$17.80
Urinalysis with Urine Culture & Sensitivity	25001629	 YTT/sterile container Urinalysis: 5 mL urine Urine C&S: 1 mL urine 		Urinalysis: 8 AM next day Urine C&S: 1-5 days	\$86.28
Urine Protein:Creatinine Ratio	1555	 YTT 1 mL urine in YTT/sterile container 		8 AM next day	\$17.80

Urine (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Urinalysis with Reflex UPC	25000521	YTT 5 mL urine in YTT/sterile container 	A UPC will be performed automatically if the urine meets the required criteria.	8 AM next day	\$24.41
Urinalysis with Reflex UPC upgrade	25001702	YTT 5 mL urine in YTT/sterile container 	Use this code to upgrade a core panel urinalysis to include reflex UPC		\$6.62
Urine Electrolyte Panel (for Fractional Excretion) [†]	FREXCRE	YTT 2 mL urine in YTT/sterile container AND 2 mL separated serum or heparinized plasma 	Cl, Creat, K, Na Concurrent measurement of serum creatinine and electrolytes is needed for determination of fractional excretion.	3-5 days	\$124.30
Stone Analysis [†]	7032	Dry stones in sterile container with no additive 		4-9 days	\$115.31

See the complete Directory of Services online at zoetisreflabs.com/DOS

Endocrinology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Total T4	5102	● SST or RTT 0.5 mL serum 		8 AM next day	\$17.80
Free T4	5103	● SST or RTT 0.5 mL serum 		8 AM next day	\$20.79
TSH	5106	● SST or RTT 0.5 mL serum 		8 AM next day (1-2 days for feline samples)	\$16.88
Thyroid Panel	25000484	● SST or RTT 1 mL serum 	TT4, FT4, TSH	8 AM next day (1-2 days for feline samples)	\$30.90
Free T4 by ED†	6330	● RTT 0.5 mL serum, separated and frozen 	Ship frozen on ice.	5-7 days	\$126.55
Thyroglobulin Autoantibody†	6437	● RTT 0.5 mL serum, separated		3-5 days	\$99.58
Premium Thyroid Panel, Canine†	6545	● RTT 2 mL serum, separated and frozen 	TT4, TT3, FT4 by ED, TSH, TgAA, T4AA, and T3AA Ship frozen on ice.	5-7 days	\$158.00
Premium Thyroid Panel + TSH, Feline†	6550	● RTT 2 mL serum, separated and frozen 	TT4, TT3, FT4 by ED, TSH Ship frozen on ice.	5-7 days	\$154.77

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
OFA Thyroid Panel, Canine†	K9THYROID	● RTT 2 mL serum, separated and frozen 	TT4, TT3, FT4 by ED, TSH, TgAA, T4AA, and T3AA Ship frozen on ice. Animal must not have received thyroid therapy for 3 months prior to sampling. A completed OFA Thyroid Registry form must accompany the sample. This may be faxed or emailed to your clinic on request to the laboratory, or may be downloaded from the OFA website at the following link: www.ofa.org . Please note that OFA Registry requires prepayment by the animal owner of \$15.00* for the registry service. This fee is not included in the price shown to the right.	2-3 weeks	\$155.76
Fructosamine	1024	● ● SST or RTT 0.5 mL serum 		1-3 days	\$23.68
Insulin:Glucose Ratio†	MSUIG	● RTT 1 mL serum, separated and frozen 	Ship frozen on ice.	3-7 days	\$149.84
Malignancy (Hypercalcemia) Panel†	6555	● ● RRT and LTT 1 mL serum AND 0.5 mL EDTA plasma, both separated and frozen. 	PTH, PTHrp, Free (Ionized) Calcium Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	5-7 days	\$164.75
Parathyroid Panel†	6306	● RTT 1 mL serum, separated and frozen 	PTH, Free (Ionized) Calcium Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	5-7 days	\$128.27
Parathyroid Hormone–Related Protein (PTHrP)†	PTHRP	● LTT 1 mL EDTA plasma, separated and frozen 	Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	5-7 days	\$133.29

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Vitamin D (25-hydroxyvitamin D3)[†]	VITD	● RTT 0.75 mL serum, separated and frozen 	Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	4-10 days	\$137.07
Vitamin D Profile[†]	VITP	● RTT 1.5 mL serum, separated and frozen 	PTH, Free (Ionized) Calcium, and 25-hydroxyvitamin D Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	3-9 days	\$147.56
Cortisol (Baseline/ Resting)	5101	○ ● SST or RTT 0.5 mL serum 		8 AM next day (1-2 days for feline/equine samples)	\$16.88
ACTH Stimulation (2 samples)	6100	○ ● SST or RTT 0.5 mL serum each sample (2 samples required) 		8 AM next day (1-2 days for feline samples)	\$32.10
ACTH Stimulation (3 samples)	6101	○ ● SST or RTT 0.5 mL serum each sample (3 samples required) 		8 AM next day (1-2 days for feline samples)	\$48.14
Cortisol (Single Sample, Post-ACTH)	CORTPOST	○ ● SST or RTT 0.5 mL serum 	This test code is intended to support submission of a single, post-ACTH cortisol serum sample when other samples for dynamic testing have been submitted on another occasion.	8 AM next day (1-2 days for feline samples)	\$24.10
Dexamethasone Suppression (2 samples)	6103	○ ● SST or RTT 0.5 mL serum each sample (2 samples required) 		8 AM next day (1-2 days for feline samples)	\$32.10

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Dexamethasone Suppression (3 samples)	6104	●● SST or RTT 0.5 mL serum each sample (3 samples required) 		8 AM next day (1-2 days for feline samples)	\$53.50
Urine Cortisol:Creatinine Ratio	3310	● YTT 1 mL urine in YTT/sterile container 		8 AM next day (1-2 days for feline samples)	\$73.56
Adrenal Panel (with ACTH Stimulation), Canine/Feline†	ACTHADR	● RTT 2 mL serum each, separated (2 samples) 	Baseline and post-ACTH Cortisol, Estradiol, Androstenedione, Progesterone, 17-Hydroxyprogesterone, Testosterone Requires two samples. Testing may be performed on canines and neutered felines.	12 days	\$303.35
17-Hydroxyprogesterone, Pre & Post-(ACTH Stim)†	17HPROG	● RTT 0.5 mL serum, separated 	Requires two samples. Testing may be performed on canines and neutered felines.	7-10 days	\$96.21
Aldosterone Baseline†	ALDOS	●●● LTT or SST, RTT 0.5 mL EDTA plasma (preferred); 0.5 mL serum also accepted. Do not send whole blood. 	Centrifuge EDTA sample immediately and separate EDTA plasma within 30 minutes of collection. Transfer to sterile, no additive tube and label tube EDTA plasma. Freeze sample and ship on ice.	7-10 days	\$105.20
Aldosterone Post†	ALDOSPOST	●●● LTT or SST, RTT 0.5 mL EDTA plasma (preferred); 0.5 mL serum also accepted. Do not send whole blood. 	Centrifuge EDTA sample immediately and separate EDTA plasma within 30 minutes of collection. Transfer to sterile, no additive tube and label tube EDTA plasma. Freeze sample and ship on ice.	7-10 days	\$101.77

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Endogenous ACTH, Canine†	25001384	- LTT 0.5 mL EDTA plasma (separated and frozen) 	Centrifuge immediately and pipette EDTA plasma into a sterile, no-additive, plastic tube. Glass tubes should not be used. Freeze sample. Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	2-5 days	\$110.82
Reproductive Hormone Panel†	RHP	- LTT or RTT 2 mL serum or plasma (no SST)	Estrogen, Progesterone, Testosterone	5-10 days	\$161.40
Estradiol, Baseline†	ESTRADIOL	- RTT 0.5 mL serum, separated 		7-10 days	\$104.08
Testosterone, Baseline†	TESTOS	- RTT 1 mL serum 		2-9 days	\$101.83
Testosterone Post-HCG/GnRH†	TESTPOST	- RTT, LTT 1 mL serum 		3-8 days	\$93.96
Progesterone	5105	- RTT 0.5 mL serum 	Serum separator gel may affect results.	8 AM next day	\$46.83
Anti-Müllerian Hormone†	5555	- RTT 1 mL serum, separated and frozen 	Ship frozen and on ice. Hemolyzed samples will be rejected. Wait 30 days after spay or remnant removal surgery before testing.	5-8 days	\$155.76
Ovarian Remnant Syndrome†	OVR5	- RTT 0.5 mL serum, separated and frozen 	Anti-Müllerian Hormone, Progesterone Ship frozen on ice Hemolyzed samples will be rejected. Wait 30 days after spay or remnant removal surgery before testing.	8-10 days	\$168.00

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Luteinizing Hormone (LH), Canine/Feline	LH	  SST, RTT 0.5 mL serum  same day		8 AM next day	\$73.56
Pregnancy Test (Relaxin), Canine/Feline	6009	   SST, RTT or LTT 0.5 mL serum or EDTA plasma 	Relaxin degrades rapidly at room temperature. Keep refrigerated until shipment. Ship on ice packs.	1-2 days	\$60.17
Insulin-like Growth Factor†	ILGROFAC	  RTT, LTT 0.75 mL serum or EDTA plasma 		5-10 days	\$146.77
Gastrin†	GASTRIN	 RTT 1 mL serum, separated and frozen 	Fast patient for 12 hours. Freeze sample. Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	3-12 days	\$118.68
Metanephrines, Plasma-free†	METAPLAS	  LTT or GRNTT 1-2 mL EDTA or heparinized plasma, separated and frozen 	Centrifuge and separate plasma within 1 hr of collection. Freeze immediately. Ship on dry ice. Customer service can assist with frozen package pickup.	5-7 days	\$227.62
Metanephrines, Urine Fractionated†	METAUR	 YTT 2.5-4 mL urine in YTT/sterile container 	Freeze immediately. Ship on dry ice. Customer service can assist with frozen package pickup.	5-7 days	\$121.65

GI/Pancreatic

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
ZRL™ Premium Lipase (DGGR Lipase)	1030	  SST, RTT 0.5 mL serum 		8 AM next day	\$13.16
ZRL™ Premium (DGGR Lipase), TLI, Cobalamin, and Folate, Canine	7250	  SST, RTT 2 mL serum  		1-2 days	\$123.04
Pancreatic Lipase Immunoreactivity (PLI), Canine (TX GI)†	PLITX	  SST, RTT 0.5 mL separated serum 		3-5 days	\$132.16
Pancreatic Lipase Immunoreactivity (PLI), Feline (TX GI)†	7240	  SST, RTT 0.5 mL separated serum 		2-5 days	\$132.16
Amylase (Mich. State Univ.)†	1004	  SST, RTT 0.5 mL serum 		2-3 days	\$92.74
PLI, Cobalamin, and Folate, Canine/Feline (TX GI)†	FEPLICOFOL	  SST, RTT 1 mL separated non-hemolyzed serum  		2-5 days	\$132.16
PLI, TLI, Cobalamin, and Folate, Canine (TX GI)†	K9PTCFTX	  SST, RTT 1 mL separated non-hemolyzed serum  		2-5 days	\$168.00
PLI and TLI, Feline (TX GI)†	7253	  SST, RTT 1 mL separated serum 		2-5 days	\$134.87

GI/Pancreatic (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
PLI, TLI, Cobalamin, and Folate, Feline (TX GI)†	7251	● ● SST, RTT 2 mL separated non-hemolyzed serum  		2-5 days	\$168.00
TLI, Canine	6206	● ● SST, RTT 0.5 mL serum, separated 		1-2 days	\$56.20
Trypsin-Like Immunoreactivity (TLI), Feline (TX GI)†	6203	● ● SST, RTT 0.2 mL separated serum 		2-5 days	\$102.95
TLI, Cobalamin, and Folate, Canine	7252	● ● SST, RTT 1 mL separated non-hemolyzed serum  		1-2 days	\$113.66
TLI, Cobalamin, and Folate, Feline (TX GI)†	F7251	● ● SST, RTT 1 mL separated non-hemolyzed serum  		2-5 days	\$132.16
Cobalamin (Vitamin B12)	6207	● ● SST, RTT 1 mL separated serum  		1-2 days	\$40.09
Folate	6208	● ● SST, RTT 1 mL serum  		1-2 days	\$40.09
Cobalamin and Folate	KFCOFO	● ● SST, RTT 2 mL serum  		1-2 days	\$66.83

GI/Pancreatic (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Microbiota Dysbiosis Index, Canine†	DYSINDEX	● Feces 1 gm feces 	Quantifies abundance of <i>Faecalibacterium</i> , <i>Turicibacter</i> , <i>Streptococcus</i> , <i>E coli</i> , <i>Blautia</i> , and <i>C hiranonis</i>	2-3 days	\$125.63
Fecal Occult Blood	7255	● Feces 1-3 gm fresh feces 		1-2 days	\$40.09

Fecal/Parasitology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Ova and Parasite (Centrifugal Fecal Flotation) Test	2320A	● Feces 3-5g fresh feces 	Fecal floatation by sugar solution. Recommended for most comprehensive fecal parasite assessment.	Next day by 5 PM	\$17.64
<i>Giardia</i> Focused O&P	25001611	● Feces 5g fresh feces 	Fecal flotation by zinc sulfate. Recommended for diagnosis of Giardiasis.	Next day by 5 PM	\$11.24
O&P (Centrifugal Fecal Flotation) Panel	25001613	● Feces 6-10 g fresh feces 	Two fecal flotations by both sugar and zinc sulfate for most comprehensive assessment of parasitic infection. Quantification not included.	Next day by 5 PM	\$22.48
<i>Giardia</i> Antigen Test	2321	● Feces 3 gm fresh feces 	<i>Giardia</i> Ag ELISA	Next day by 5 PM	\$13.82
Ova and Parasite (Centrifugal Fecal Flotation) Test and <i>Giardia</i> Antigen Test	2320	● Feces 5 gm fresh feces 	Fecal floatation by sugar solution and <i>Giardia</i> Ag ELISA	Next day by 5 PM	\$20.45

Fecal/Parasitology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Fecal Direct Smear Test	25001610	● Feces 1-3 g fresh feces 	Feces in sealed, leakproof container or plastic bag with excess air expressed	1-3 days	\$8.41
<i>Giardia</i> & <i>Cryptosporidium</i> IFA, Canine/Feline	2404	● Feces 3-5 gm fresh feces 	<i>Giardia</i> Ag ELISA and <i>Cryptosporidium</i> spp. Ag by IFA. Not for use in birds/reptiles.	1-4 days	\$41.48
O&P (Centrifugal Fecal Flotation) with Direct Smear	25001614	● Feces 3-5g fresh feces 	Feces in sealed, leakproof container or plastic bag with excess air expressed	1-3 days	\$19.65
Fecal Sedimentation Test	25001612	● Feces 10 g fresh feces 	Feces in sealed, leakproof container or plastic bag with excess air expressed	1-4 days	\$56.14
McMaster (Fecal Egg Counting) Test	2328	● Feces 5 gm fresh feces 	Quantitative fecal egg count	1-2 days	\$25.48
Centrifugal Fecal Flotation Test (O&P) & McMaster (Fecal Egg Counting) Test	25000487	● Feces 8-10 gm fresh feces 	Fecal floatation by sugar solution and quantitative fecal egg count.	1-2 days	\$25.48
Baermann Test (Lungworm)	BAER	● Feces 10 gm fresh feces 		1-4 days	\$56.14
Heartworm Antigen Test	6001	● ● ● SST, RTT, LTT 0.25 mL serum or EDTA plasma 	DiroCHEK® HW Ag ELISA	8 AM next day	\$11.05
Heartworm Antigen with Heat Treatment	HWHEAT	● ● ● SST, RTT, LTT 0.5 mL serum or EDTA plasma 	DiroCHEK® HW Ag ELISA	1-2 days	\$26.75

Fecal/Parasitology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Heartworm Antigen Test (Alternate Methodology)	25000533	  SST, RTT, LTT 0.5 mL serum or EDTA plasma or whole blood 	Zoetis Witness® Heartworm Ag lateral flow assay. Intended for use as alternative methodology, confirmatory testing after initial HW Ag positive test by different methodology per American Heartworm Society guidelines.	8 AM next day	\$13.35
O&P with HW & Tick	25001627	   SST, RTT, LTT, feces O&P: 3-5 g fresh feces HW: 0.25 mL of serum or EDTA plasma Tick Panel: 0.25 mL of serum or EDTA plasma or whole blood 	O&P: Fecal flotation by sugar solution Tick Panel: Lateral flow assay for <i>Ehrlichia</i> , <i>Anaplasma</i> , <i>Borrelia</i> (Lyme) antibodies. Canines only. HW: DiroCHEK® Ag ELISA	O&P: Next day by 5 PM HW & Tick: 8 AM next day	\$38.68
Modified Knott's Test for Microfilariae (Heartworm)	6225	 LTT 2 mL EDTA whole blood 	Quantification not included.	1-2 days	\$40.09
Modified Knott's Test with Quantification	MODKNOTTSQ	 LTT 2 mL EDTA whole blood 		1-2 days	\$38.96
Feline Heartworm Antibody (ELISA)†	6007	  SST, RTT 1 mL serum 	HW Ab ELISA	5-8 days	\$149.84
Gross Parasite Identification	25001435	Whole parasite (adult worm, larvae, ectoparasite, etc.) in sealed, leakproof container		1-5 days	\$36.07

Microbiology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Aerobic Culture	7156	Culture swab or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-5 days	\$73.03
Anaerobic Culture	7157	Anaerobic tube or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-7 days	\$40.09
Aerobic and Anaerobic Culture	7135	Culture swab and anaerobic tube or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-7 days	\$112.35
Urine Culture and Sensitivity	7140	● YTT/sterile tube 1 mL urine in YTT or sterile container 		1-5 days	\$73.03
Urinalysis with Urine Culture & Sensitivity	25001629	● YTT/sterile container Urinalysis: 5 mL urine Urine C&S: 1 mL urine 		Urinalysis: 8 AM next day Urine C&S: 1-5 days	\$86.28
Hold Urine Culture for 48 hours	25000534		Bacterial culture will be held for an additional 24 hours (48 hours total). This test is intended for use in working up complicated/chronic urinary tract infections and must be ordered at the time the urine culture is initially requested.	2 days	\$0.01
Fungal Culture	7145	Culture swab or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	Up to 26 days for final report	\$73.56
Fecal Culture	7155	● Feces 2 g fresh feces 		2-7 days	\$73.56
Dermatophyte Culture	7160	WTT/sterile tube Plucked hair, nail clippings, skin scrapings or brushings 		12 days for final report	\$73.56

Microbiology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Mycoplasma</i> Culture†	MYCOPLASCU	Culture swab, fluid or tissue in WTT/sterile container.	Refrigerate fluid or tissue submissions and ship on ice packs.	Up to 21 days	\$98.46
Blood Culture	7150	Two blood culture bottles, each inoculated with 3 mLs of blood 	Submit two blood samples, drawn at least one hour apart and from different, disinfected venipuncture sites. Store at room temperature. DO NOT REFRIGERATE.	3-9 days	\$147.07
<i>Brucella canis</i> Culture†	BRUCLCULT	As indicated: 0.5 mL whole blood in blood culture bottle, swab in Amies or Anaerobic transport media, 1-5 mL fluid (fetal stomach contents, vaginal discharge, semen) or 1-5 g tissue (uterus, testicle) in sterile, leakproof container. 	Note: <i>Brucella canis</i> culture is for diagnosis only, not for freedom-from-disease testing. PCR is preferred due to higher sensitivity and safety. Submit blood in culture bottles only; otherwise, samples will be rejected. For best sensitivity, collect three blood culture samples within 24 hours. Each vial incurs a separate charge. Store and ship blood culture bottles and swabs at room temperature. Keep tissues and other fluids refrigerated and ship with ice packs.	7-10 days	\$110.82
<i>Mycobacterium</i> Culture†	MYCO	As indicated: tissue aspirate, lymph node, skin biopsy, or other tissue sample in sterile, leakproof container. 	Refrigerate fluid or tissue submissions and ship on ice packs. Culture for <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> no longer included in this offering. PCR is recommended to identify <i>M. avium</i> .	60 days	\$109.69
Acid-Fast Stain	ACIDFAST	Culture swab or fluid/tissue in WTT/sterile container.		1-4 days	\$45.44

Microbiology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Fungal Susceptibility 1 Drug†	FUNGALSUS1		Add on fungal susceptibility testing for one antifungal drug.	1-2 weeks	\$143.71
Fungal Susceptibility 2 Drugs†	FUNGALSUS2		Add on fungal susceptibility testing for two antifungal drugs.	1-2 weeks	\$227.33
Fungal Susceptibility 3 Drugs†	FUNGALSUS3		Add on fungal susceptibility testing for three antifungal drugs.	1-2 weeks	\$310.94
Skin Culture and Sensitivity (Dermatology)	25001434	Culture swab or fluid/tissue 	Culture and AMS designed for skin lesions, including ear infections. Refrigerate fluid or tissue submissions and ship on ice packs.	2-5 days	\$66.84

Serology/Infectious Diseases

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Tick Panel Screening Test	6002	● ● ● SST, RTT or LTT 0.25 mL of serum or EDTA plasma or whole blood 	Lateral flow assay for <i>Ehrlichia</i> , <i>Anaplasma</i> , <i>Borrelia</i> (Lyme) Antibodies Canines only.	8 AM next day	\$15.71
FeLV/FIV Rapid Test	6005	● ● ● SST, RTT or LTT 0.25 mL of serum or EDTA plasma or whole blood 	Lateral flow assay for FeLV Ag and FIV Ab with confirmation of positive FeLV results by ViraCHEK® ELISA	8 AM next day	\$16.88
O&P with HW & Tick	25001627	● ● ● ● SST, RTT or LTT and feces O&P: 3-5g fresh feces HW: 0.25 mL of serum or EDTA plasma Tick Panel: 0.25 mL of serum or EDTA plasma or whole blood 	O&P: Fecal flotation by sugar solution Tick Panel: Lateral flow assay for <i>Ehrlichia</i>, <i>Anaplasma</i>, <i>Borrelia</i> (Lyme) Antibodies HW: DiroCHEK® Ag ELISA, Ova and Parasite	O&P: Next day by 5 PM HW & Tick: 8 AM next day	\$38.68
Cryptococcus Antigen Titer by Latex Agglutination	7216	● ● SST, RTT 0.5 mL serum or CSF 		1-2 days	\$100.32
Coccidioides Antibody Screening Test	25001690	● ● SST or RTT 1 mL serum	Lateral flow assay assessing IgG and IgM Abs combined.	2-3 days	\$50.56
Coccidioides Titer AGID	6129	● ● SST or RTT 1 mL serum 	IgG, IgM assessed via AGID. Titer provided for IgG if positive.	5-7 days	\$71.40
Blastomyces Quantitative Antigen EIA†	BLASTANT	● ● ● ○ SST, RTT, LTT or WTT. As indicated: 0.5 mL of urine, serum or plasma (separated), 0.8 mL CSF in sterile no-additive tube (WTT), or 1.2 mL BAL fluid in sterile no-additive tube (WTT). 		2-5 days	\$152.39

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Fungal Titer Panel AGID[†]	6130	●● SST or RTT 1 mL serum 	<i>Coccidioides</i> (IgG/IgM), <i>Blastomyces</i> (IgG), and <i>Histoplasma</i> (IgG). If indicated, can substitute <i>Aspergillus</i> (IgG) and/or <i>Cryptococcus</i>	3-6 days	\$168.53
Vector Serology Panel, Canine[†]	EXTENTICK	●● SST or RTT 2 mL serum 	<i>Babesia canis</i> , <i>B gibsoni</i> , <i>Ehrlichia canis</i> , <i>Rickettsia rickettsii</i> , <i>Bartonella henselae</i> , <i>B vinsoni</i> , <i>B koehlerae</i> (by IFA); <i>Borrelia</i> (Lyme), <i>Anaplasma</i> , <i>Ehrlichia</i> , and heartworm (by rapid test)	10-14 days	\$196.61
Tick Serology Panel	7185	●● SST, RTT 3 mL serum 	<i>Ehrlichia canis</i> (IFA), <i>Anaplasma phagocytophilum</i> (IFA), <i>Borellia burgdorferi</i> (Cornell Multiplex Antibody Test) [†]	2-7 days	\$160.49
<i>Toxoplasma gondii</i> ELISA[†]	TOXAB189	●● SST, RTT 0.5 mL serum 	IgG and IgM Ab to <i>Toxoplasma gondii</i> . CSF and aqueous humor also accepted. Do not freeze.	5-7 days	\$98.46
Vaccine Titer (Qualitative), Canine	6145	●● SST, RTT 1 mL serum 	Qualitative CDV and parvovirus titer by ELISA	1-3 days	\$53.50
Feline Vaccine Panel 2[†]	7200	● RTT 1 mL serum 	Herpesvirus, calicivirus, parvovirus (panleukopenia) Ab	6-10 days	\$137.78
Rabies Titer for Export[†]	7205E	● RTT 2 mL serum 	FAVN-OIE completed form must accompany sample submission.	6-7 weeks	\$177.14

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Vaccine Titer (Quantitative), Canine(Cornell)†	DPVAC	●● SST, RTT 1 mL serum 		7-10 days	\$96.34
Core Vaccine Titer Panel (includes Rabies, non-export), Canine†	6160	● RTT 2 mL serum 	Ab titers for canine distemper, canine adenovirus-2, canine parvovirus, and rabies NOT FOR EXPORT TESTING.	5-6 weeks	\$195.16
Feline Infectious Peritonitis Virus (FIP) IFA†	25001570	●○ RTT, WTT 1 mL effusion fluid in RTT or sterile, no additive tube (WTT). 	For detection of feline coronavirus antigen in cavitary effusions.	3-4 days	\$100.98
Leptospira MAT, 5 Serovar†	6164	● RTT 0.5 mL serum 	Detection of antibodies to <i>Leptospira interrogans</i> serovars <i>pomona</i> , <i>hardjo</i> , <i>icterohaemorrhagiae/copenhageni</i> , <i>grippityphosa</i> , and <i>canicola</i>	Up to 10 days	\$115.05
Leptospira MAT, 5 Serovar & PCR†	6163	●● RTT, LTT For MAT: 0.5 mL serum in RTT; For PCR: 5 mL Urine; OR 1 mL EDTA whole blood (LTT); OR 1 gm tissue (e.g., kidney and/or liver); OR 1 mL aqueous humor; OR 0.5 ml CSF 	Detection of antibodies to <i>Leptospira interrogans</i> serovars <i>pomona</i> , <i>hardjo</i> , <i>icterohaemorrhagiae/copenhageni</i> , <i>grippityphosa</i> , and <i>canicola</i>	Up to 10 days	\$154.77
Leptospira Antibodies (IgM), Canine	6008	●●● SST, RTT, LLT 0.5 mL serum or EDTA plasma or whole blood 	Detects IgM for the following canine serovars: <i>canicola</i> , <i>icterohaemorrhagiae</i> , <i>grippityphosa</i> , <i>pomona</i>	1-3 days	\$37.51
Feline Coronavirus (IFA)	CORONAIFA	●● SST, RTT 1 mL serum 	Detects IgG antibodies against Feline coronavirus. Positive results reported as a titer.	2-3 days	\$100.32

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Brucella canis</i> IFA	BRUCIFA	  SST, RTT 1 mL serum 		1-4 days	\$100.32
Neurology Infectious Disease Panel†	NEUROID	  SST or RTT 2 mL serum 	<i>E canis</i> , <i>R rickettsii</i> , <i>B burgdorferi</i> (IFA); <i>Blastomyces</i> IgG, <i>Histoplasma</i> IgG, <i>Coccidioides</i> IgG/IgM; <i>Toxoplasma</i> IgG/IgM, <i>Cryptococcus neoformans</i> antigen, <i>Neosporum caninum</i> IgG/IgM, <i>A phagocytophilum</i> , <i>Aspergillus</i> IgG	3-5 days	\$569.61
Lyme Multiplex Test, Canine†	LYMEMPLX	 2 mL serum, separated 		5-7 days	\$129.92
<i>Anaplasma phagocytophilum</i> (IFA)	ANATITER	  SST or RTT 1 mL serum 	Canine only	2-3 days	\$53.50
<i>Aspergillus</i> Titer AGID†	ASP	  SST or RTT 1 mL serum 	IgG	3-5 days	\$117.56
Australia Export Completion Panel†	AUSECPN	  SST, RTT 2 mL serum 	<i>Brucella canis</i> , <i>Leishmania infantum</i> , <i>Leptospira interrogans</i> serovar <i>canicola</i> and <i>Ehrlichia canisthen</i> Appropriate FAVN forms must accompany submission. See online DOS for more comprehensive instructions.	9-12 days	\$175.42
<i>Brucella canis</i> Slide AGGL/AGID II†	6315	 0.5 mL serum, separated 		3-5 days	\$126.55
<i>Neospora caninum</i> IFA†	NEO	  SST or RTT 1 mL serum IgG, IgM 		3-5 days	\$124.30

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Rabies Screen Titer (not for export)†	7205	● RTT 1 mL serum 	NOT FOR EXPORT TESTING.	4-5 weeks	\$131.04
<i>Trypanosoma cruzi</i> (Chagas Disease) IFA Titer†	TCRUIFA	● ● SST, RTT 1 mL serum 		3-5 days	\$108.43
<i>Aspergillus</i> Galactomannan Antigen EIA†	ASPGUR	● ● ● ○ SST, RTT, LTT or WTT As indicated: 0.8 mL of serum or EDTA plasma (separated), CSF, urine, or BAL fluid in sterile no-additive tube (WTT). 		2-5 days	\$161.40
<i>Bartonella</i> IFA†	6025	● RTT 2 mL serum 	Detects antibodies against <i>Bartonella henselae</i> , <i>B vinsonii</i> subsp <i>berhoffii</i> , and <i>B koehlerae</i>	Up to 4 weeks	\$154.77
Comprehensive (PCR and Serology) Vector Panel, Canine†	K9FCOMP	● ● RTT, LTT 2 mL serum in RTT AND 2 mL whole blood in LTT 	<i>Babesia canis</i> , <i>B gibsoni</i> , <i>E canis</i> , <i>R rickettsii</i> (RMSF), <i>Bartonella henselae</i> , <i>B vinsonii</i> , <i>B koehlerae</i> (by IFA); Lyme, <i>Anaplasma</i> , <i>Ehrlichia</i> , and heartworm (by rapid assay); PCR for <i>Babesia</i> , <i>Bartonella</i> , <i>Anaplasma</i> , <i>Ehrlichia</i> , <i>Rickettsia</i> , and hemotropic <i>Mycoplasma</i> organisms	10 days	\$312.20
<i>Toxoplasma gondii</i> ELISA (Canine) & <i>Neospora caninum</i> IFA†	K9TOXOPL	● ● SST, RTT 1 mL serum 	IgG and IgM Ab to <i>Toxoplasma gondii</i> . CSF and aqueous humor also accepted. Do not freeze.	7-10 days	\$131.45
Canine Distemper Virus Titer (Cornell)†	DISTEMP	● ● SST or RTT 1 mL serum 	Testing also performed on CSF	7-10 days	\$115.05
<i>Ehrlichia canis</i> (IFA)	EHRCH	● ● SST, RTT 1 mL serum 	Detects IgG antibodies against <i>Ehrlichia canis</i> . Positive results reported as a titer. Canine only.	2-3 days	\$53.50

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
FIV by Western Blot & ELISA†	FIVWB	● ● RTT, LTT 1 mL serum or EDTA plasma 		4-7 days	\$155.76
<i>Histoplasma</i> Quantitative Antigen EIA†	HISTOANT	○ ● ● ● SST, RTT, LTT or YTT As indicated: 0.5 mL of urine, serum or plasma (separated), 0.8 mL CSF in sterile no-additive tube (WTT), or 1.2 mL BAL fluid in sterile no-additive tube (WTT). 		2-5 days	\$152.39
Canine Adenovirus Type 1 Antibody (VN)†	K9ADNE1	○ ● SST, RTT 0.5 mL serum 		4 days from run date	\$89.75
<i>Leishmania</i> Titer IFA†	LEISH	○ ● SST, RTT 1 mL serum 		2-5 days	\$120.93
Lyme (<i>Borrelia</i>) Titer IFA†	LYMEIFA	○ ● SST, RTT 1 mL serum 		2-3 days	\$100.71
<i>Pythium</i> Serology†	OOPYTHIUM	● RTT 0.5 mL serum 		3-5 days	\$154.63
Rabies Antibody Endpoint (Not for Export)†	7206	● RTT 1 mL serum 	NOT FOR EXPORT TESTING	4-5 weeks	\$163.01
<i>Rickettsia rickettsii</i> (RMSF) IFA†	RMSFIFA	● RTT 1 mL serum 		10 days	\$101.77

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Feline Leukemia Virus (FeLV) (ELISA)	25000531	   SST, RTT, LTT 0.5 mL serum or EDTA plasma or whole blood 		Next day by 8 AM	\$20.08
Babesia IFA†	BABESIAIFA	  SST or RTT 1 mL serum 	<i>Babesia canis</i> , <i>B gibsoni</i>	10 days	\$119.25
Comprehensive (PCR and Serology) Vector Panel, Felinet†	FELVECTPNL	  RTT, LTT 2 mL serum AND 2 mL EDTA whole blood 	<i>Bartonella henselae</i> , <i>B vinsonii</i> , <i>B koehlerae</i> (by IFA); <i>Borrelia</i> (Lyme), <i>Anaplasma</i> , <i>Ehrlichia</i> , and heartworm (by rapid assay); PCR for <i>Babesia</i> , <i>Bartonella</i> , <i>Cytauxzoon</i> , <i>Anaplasma</i> , <i>Ehrlichia</i> , <i>Rickettsia</i> , and hemotropic <i>Mycoplasma</i> organisms	7-10 days	\$305.77
Canine Influenza Virus Titer†	K9FLUAB	 RTT 0.5 mL serum 	HAI (antibody detection) specific for H3N8	7-10 days	\$104.08
Tick Panel Screening Test + Heartworm Antigen Test	25001389	   0.5 mL of serum or EDTA plasma or whole blood 	<i>Ehrlichia</i> , <i>Anaplasma</i> , <i>Borrelia</i> (Lyme) by rapid assay; Heartworm Ag by DiroCHEK® ELISA. Canines only.	8 AM next day	\$22.18
New Zealand Export Panel I†	NZECPN	  SST, RTT 2 mL serum 	<i>Leptospira canicola</i> (by MAT), heartworm antigen (by ELISA) For EXPORT TESTING. Include patient microchip number and date of sample collection for a seamless experience.	8-12 days	\$118.41
New Zealand Export Panel II†	NZECPN2	  SST, RTT 2 mL serum 	<i>Babesia gibsoni</i> (by IFA), <i>Brucella canis</i> (by SAT/AGID) For EXPORT TESTING. Include patient microchip number and date of sample collection for a seamless experience	3-5 days	\$205.19
Canine Parvovirus Fecal Test	60002	 Feces 1 gm fresh feces 		Next day by 5 PM	\$60.17

Clinical Pharmacology/Toxicology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Cyclosporine†	6335	LTT 0.5 mL EDTA whole blood 		3-5 days	\$134.87
Leflunomide Level†	LEFLUNO	RTT, LTT 0.5 mL serum, separated or plasma	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	7-14 days	\$181.29
Levetiracetam (Keppra)†	6321	RTT 0.5 mL serum, separated	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	3-5 days	\$161.40
Quantitative Copper (Blood or Tissue)†	6171	RTT, LTT or GRNTT As indicated: 2 mL serum, whole blood (EDTA or heparin), or 50 mg tissue (fresh, frozen, fixed or in paraffin block)	For copper associated liver disease liver tissue MUST be submitted.	7-10 days	\$204.34
Zinc, Serum/Plasma†	ZINC	RBTT 2 mL RBTT EDTA plasma or RBTT serum, separated 	Plasma or serum is required for this assay. Collect whole blood into an EDTA RBTT, separate and transfer EDTA plasma to a new, labeled RBTT to avoid zinc contamination. Follow a similar protocol for serum collection, but use a serum RBTT.	3-5 days	\$114.19
Anticoagulant (Rodenticide)†	ANTICOAG	LTT 3 mL EDTA whole blood 	Includes brodifacoum, bromadiolone, chlorophacinone, difenacoum, difethialone, diphacinone, and warfarin	6-12 days	\$207.80
Bromide	1025	SST, RTT 0.5 mL serum, separated 	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	1-2 days	\$149.84
Digoxin†	6320	LTT, RTT 0.5 mL serum, separated or EDTA plasma	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	3-5 days	\$128.27

Clinical Pharmacology/Toxicology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Drugs of Abuse†	DOA	●●● SST, RTT, YTT/sterile leakproof container As indicated: 10 mL serum or urine or 10 g liver or kidney	Amphetamine, cocaine, benzoylecgonine, norcocaine, ephedrine, lysergic acid diethylamide, (LSD), methamphetamine, MDMA, nicotine, phentermine, psilocin, delta-9-THC, THC-OH, THC-COOH, methadone, morphine, HU-210, JWH-018	10-14 days	\$307.16
LC/Mass Spectrometry Toxicology Screen†	LCMS	○ WTT or sterile, leakproof container As indicated: 20 mL fluid, 50 g tissue, 50 g feed OR 50 g source material ❄	Toxicology screen for unknown exposure	2-3 weeks	\$260.75
Blood Lead†	6240	●● LTT, GRNTT 0.5 mL EDTA or heparinized whole blood 📄		5-7 days	\$119.81
Zonisamide†	6322	●● LTT, RTT 0.5 mL serum, separated or EDTA plasma	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	6-10 days	\$161.40
Keppra Levels Peak & Trough Samples†	KEPPRA	● RTT 2 samples of 0.5 mL serum, separated each	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	6-10 days	\$247.52
Phenobarbital	1031	● RTT 0.5 mL serum, separated 📄		1-2 days	\$46.83
Gabapentin†	GAB	●● LTT, RTT 0.5 mL EDTA plasma or serum, separated	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	3-5 days	\$150.14
Toxic Heavy Metal Panel†	25001395	●● LTT, GRNTT As indicated: 8 mL EDTA or heparinized whole blood or 3 g tissue (liver or kidney) 📄	Quantitative analysis of arsenic, cadmium, lead, thallium, mercury, selenium	6-12 days	\$229.91

Pathology

Histopathology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Histopathology Simple Single Site	ZN100	Formalin-fixed tissue Also accepted: fresh tissue, prepared histopathology slides	- Single site - No more than 10 cm in any dimension - Not for dermatologic disease or with other criteria of Complex Level 1 or 2	3-7 days	\$95.50
Histopathology Simple Multiple Sites (Up to 5 Sites)	ZN101	Formalin-fixed tissue Also accepted: fresh tissue, prepared histopathology slides	- Simple samples from up to 2-5 unique sites - No more than 10 cm in any dimension - Not for dermatologic disease or with other criteria of Complex Level 1 or 2	3-7 days	\$140.44
Histopathology Complex Level 1	ZN102	Fresh or formalin-fixed tissue	- Skin biopsies for dermatologic disease (without dermatologist consult) - Multiple gastrointestinal biopsies - Bone marrow - Whole organs/major components of organs: eye, spleen, testicles, uterus/ovaries, mammary chains (2 or more connected glands), amputated digit/nail or tail, liver lobe, or lung lobe - Large samples (>10cm in any dimension) - Individual teeth or other small samples containing bone - Simple samples from 6-15 unique sites - Formalin-fixed whole bodies <300 g	3-9 days	\$176.66
Histopathology Complex Level 2	ZN103	Fresh or formalin-fixed tissue	- Mandible, maxilla (all jaws, regardless of size) - Amputated limb - Other large/atypical samples containing bone - Multiple Complex Level 1 samples - Simple samples from >15 sites .	Varies by nature of sample	\$224.63

Pathology (cont'd)

Specialty Histopathology Tests

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Dermatopathology Panel	ZN400	- Formalin-fixed skin biopsies - Detailed history and clinical images are required	- Includes Histopathology & Dermatologist Consult - Addendum with case management guidance from boarded dermatologist - Images can be sent to: referencelabpathology@zoetis.com	Dermatopathology: 3-7 days. Consult provided after dermatopathology.	\$193.90
Liver Panel	ZN500	- At least 3 x 1 cm 14G needle biopsies, 1+ wedge biopsy (ideally multiple), or other larger liver sample - Samples for histologic review should be formalin-fixed - Samples for copper quantitation may be fresh or formalin-fixed - Detailed history is required	- Biopsy report by liver specializing pathologist - H&E, connective tissue, and copper stains - Copper quantitation - Images can be sent to: referencelabpathology@zoetis.com	Histopathology: 3-7 days. Quantitative copper analysis: Additional 3-7 days	\$314.24
Liver Panel & Medical Consult	25001436	- At least 3 x 1 cm 14G needle biopsies, 1+ wedge biopsy (ideally multiple), or other larger liver sample - Samples for histologic review should be formalin-fixed - Samples for copper quantitation may be fresh or formalin-fixed - Detailed history is required	- Biopsy report by liver specializing pathologist - H&E, connective tissue, and copper stains - Copper quantitation - Addendum with case management guidance from boarded internist with liver expertise - Images can be sent to: referencelabpathology@zoetis.com	Histopathology: 3-7 days Quantitative copper analysis and consult: Up to 21 days	\$434.46

Pathology (cont'd)

Specialty Histopathology Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Nephropathology (Renal) Panel	ZN25000541	- 1 or more 14G to 18G core needle biopsy, a wedge biopsy, or other larger renal sample (eg, nephrectomy) - Detailed history is required	- Biopsy report by kidney specializing pathologist - H&E, PAS, trichrome, Jones methenamine silver stains (Congo Red also included, if indicated) - Images can be sent to: referencelabpathology@zoetis.com	3-7 days	\$241.55

Other Histopathology Tests

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
C-Kit Mutation Assay†	6541	Paraffin block (preferred); Formalin-fixed tissue; fresh tissue; or minimum 6 unstained positively charged slides. Must also include the histopathology report. 	C-Kit PCR Exons 8 & 11 This test must be ordered on an existing histopathology accession by calling customer service at 1-888-965-9652 . See specific recommendations made by the pathologist in the existing pathology report. Please include histopathology report.	10-14 days	\$216.43
Melanoma Prognostic Panel	6426	Fixed tissue, paraffin tissue block, or unstained slides 	IHC for Ki-67 and prognostic interpretation This test must be ordered on an existing histopathology accession. See specific recommendations made by the pathologist in the existing pathology report.	7-10 days	\$123.59

Pathology (cont'd)

Other Histopathology Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Complete Muscle Profile†	CM	0.5 x 0.5 x 1.0 cm biopsy from affected, but not end-stage muscle from open biopsy procedure. 	Wrap specimen in a saline moistened (not dripping) gauze sponge, place in dry water-tight container, keep refrigerated, and ship on cold packs. Collect a second smaller biopsy and immersion fix in 10% neutral buffered formalin. For optimal results, keep specimens chilled and ship immediately.	7-10 days	\$232.16
Lymphoid Neoplasia PCR/ PARR (T&B cell) from Histopathology Sample†	6544	Biopsy sample	PARR for lymphoma and lymphoid leukemia This test must be ordered on an existing histopathology accession by calling customer service at 1-888-965-9652 . See specific recommendations made by the pathologist in the existing pathology report.	10-14 days	\$293.86
Mast Cell Tumor Prognostic Panel	6540	Paraffin block, fresh or formalin-fixed tissue, or unstained, non-coverslipped, positively charged slides (minimum 10 slides)	IHC for C-Kit and Ki-67, PCR for C-Kit Exons 8 and 11, and AgNOR special staining This test must be ordered on an existing histopathology accession by calling customer service at 1-888-965-9652 . See specific recommendations made by the pathologist in the existing pathology report. Please include a copy of the original biopsy report.	10-14 days	\$365.40
Melanoma Diagnostic Panel	6425	Fixed tissue, paraffin tissue block, or unstained slides	IHC for melan A, PNL-2, TRP-1, and TRP-2 This test must be ordered on an existing histopathology accession by calling customer service at 1-888-965-9652 . See specific recommendations made by the pathologist in the existing pathology report. Please include a copy of the original biopsy report. Numeric results will be complete within 3-5 days. An interpretation will be provided an additional 1-10 days post numeric result.	3-5 days	\$161.40
Copper, Zinc, Iron Levels on Hepatic Tissue†	COPZNCIRON	Liver may be fresh (minimum 50 mg wet tissue), frozen, fixed, or embedded in a paraffin block	For copper associated liver disease liver tissue MUST be submitted.	1-2 weeks	\$141.55

Pathology (cont'd)

Cytopathology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Cytopathology Simple/ Single Site	7120	LTT As indicated: Unstained, air-dried slides; fluid from a mass in LTT  Slides  Liquid	For the following sample types: - Single lesion/tissue (FNA, swab, impression smear) - Single or multiple lymph nodes - Single joint (slides only) - Fluid from mass lesion (cytology only)	1-2 days	\$101.12
Cytopathology Complex	7201	LTT As indicated: Unstained, air-dried slides and/or fluid in LTT  Slides  Liquid	For the following sample types: - Up to 7 lesions/tissue types (FNA, swab, impression smear) - Multiple joints (slides only) - Bone marrow - BAL/TTW (1 mL minimum EDTA recommended) - CSF (1 mL minimum recommended, aliquot as 0.5 mL LTT and 0.5 mL RTT) - Liquid joint fluid for complete analysis (2 mL LTT minimum per joint recommended) - Cavitary effusion(s) (2 mL LTT minimum per effusion)	1-2 days	\$137.05
Lymphoid Neoplasia PCR/PARR (T&B Cell) from Blood, Fluid, Cytopathology Sample†	6542	LTT As indicated: cytology slides, 1 mL EDTA (LTT) blood, bone marrow or other liquid samples, or aspirated tissue material in EDTA	PCR for Antigen Receptor Rearrangement for lymphoma and lymphoid leukemia May be performed on blood, bone marrow, cavitary effusion, CSF, or tissue aspirate. Associated laboratory results (e.g., cytology report, CBC) MUST be included with submission for testing to proceed.	7-12 days	\$293.86

Clinical Immunology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
2M Antibody Masticatory Muscle Myositis†	6403	● RTT 1 mL serum 	Collect samples prior to immunosuppressive therapy.	7-12 days	\$214.59
Acetylcholine Receptor Antibody/Myasthenia Gravis†	6402	● RTT 1 mL serum 	Collect samples prior to immunosuppressive therapy.	7-12 days	\$214.59
Complete Amino Acid Profile†	COMPAA	● GRNTT 1 mL heparinized plasma, separated and frozen 		7-9 days	\$247.52
IgA, Canine	IGA	● ● SST, RTT 2 mL serum 		3-5 days	\$60.17
Anti-Nuclear Antibody (IFA)	ANA	● ● SST, RTT 0.5 mL serum 	Detects antinuclear IgG antibodies. Positive results reported as a titer. Separate serum within 30 mins of collection	2-5 days	\$53.50
Protein Electrophoresis	6345	● ● ● SST, RTT, YTT/sterile, leakproof container 0.5 mL serum, >10 mL urine 		3-6 days	\$73.56
IgG, IgA, IgM, Canine†	IGGAM	● RTT 1 mL separated serum 		7-10 days	\$169.24
IgG, Canine†	IGG	● RTT 1 mL separated serum 		7-10 days	\$92.93
Allergy Panel, Canine/Feline†	25001385	● ● SST, RTT 3 mL serum		10-14 days	\$349.52

Clinical Immunology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Immunofixation Add-on†	25001431	● ● ● SST, RTT, YTT/sterile leakproof container 1 mL serum, 5-10 mL urine	Must be ordered in addition to Protein Electrophoresis.	3-4 days	\$159.88
Protein Electrophoresis and Immunofixation†	25001430	● ● ● RTT, STT, YTT/sterile leakproof container 0.5 mL serum, >=15 mL urine in YTT/Sterile leakproof container		5-7 days	\$213.98

See the complete Directory of Services
online at zoetisreflabs.com/DOS

Genetic

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Degenerative Myelopathy†	DEGMYE	- LTT 3-7 mL EDTA whole blood or fresh, frozen tissue (tongue/muscle, spleen, kidney, or liver)  Blood  Tissue	UMC Canine DM DNA Testing & Research Form REQUIRED for testing to proceed.	7-14 days	\$148.17
Fanconi Syndrome Test†	FANCONI	- YTT/sterile leakproof container 3-5 mL urine (frozen) 	Ship on ice overnight	1-4 weeks	\$149.02
Centronuclear Myopathy†	CNM	Oral brushing	Interdental/GUM brushes supplied by owner or Cytology Brush supplied by VGL at no additional charge	10-14 days	\$194.51
Methylmalonic Aciduria (Cobalamin Malabsorption)†	COBMAL	- YTT/sterile leakproof container 3-5 mL urine (frozen) 	Ship on ice overnight	5-7 days	\$141.55
Cystinuria Nitroprusside†	CYSTINURIA	- YTT/sterile leakproof container 3-5 mL urine (frozen) 		7-10 days	\$132.16
Congenital (CKCS) Macrothrombocytopenia†	CKCSMACRO	- LTT 1 mL EDTA whole blood AND 3-5 unstained blood smears  Blood  Slides	Beta1-tubulin mutations	7-10 days	\$220.89
Pyruvate Kinase Deficiency DNA Test†	PYRUDNA	- LTT 1-2 mL EDTA whole blood or cheek swab 		1-4 weeks	\$156.58

Nutrition

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Selenium†	SELENIUM	●● LTT, RTT 0.5 mL EDTA whole blood preferred; 0.5 mL serum or EDTA plasma also accepted 		3-5 days	\$105.20
Trace Element Screen†	TMINPAN	● RBTT 2 mL serum from RBTT 	Ca, Cu, Fe (unbound), Mg, Na, K, Phos, Zn Collect blood in an RBTT serum tube to avoid zinc contamination. Separate and transfer serum to a new RBTT tube.	5-7 days	\$92.57
Taurine (Plasma and Whole Blood)†	TAUR	● GRNTT 1 mL separated heparinized plasma AND 2 mL heparinized whole blood 	Freeze separated serum AND whole blood. Ship frozen on ice packs.	10 days	\$205.19
Taurine:Whole Blood†	TAURWB	● GRNTT 2 mL heparinized whole blood 	Ship frozen on ice packs	10 days	\$154.63
Taurine:Plasma†	TAURPLAS	● GRNTT 1 mL separated heparinized plasma 	Ship frozen on ice packs	10 days	\$154.63
Thiamine (Vitamin B1)†	THIAMINE	●● GRNTT, LTT 3 mL EDTA or heparinized whole blood 	Freeze immediately and protect from light. Ship on dry ice. Customer service can assist with frozen package pickup.	5-7 days	\$128.27

Nutrition (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Vitamin E [†]	2331	 SST, RTT, LTT, GRNTT 1.5 mL serum or heparinized or EDTA plasma, separated and protected from light 		3-5 days	\$105.20
Vitamin E and Mineral Panel [†]	VITEMINE	 RBTT and RTT 1 mL EDTA whole blood in RBTT, 1 mL serum in RBBT, separated, AND 1 mL serum in RTT (separated and protected from light) 	Vitamin E, Ca, Cu, Fe, Mg, Phos, Zn, Se Collect whole blood into an EDTA RBTT AND serum into an RBTT serum tube to avoid zinc contamination. Separate and transfer serum to a new RBTT tube. Collect additional serum in a RTT, separate and protect from light. LABEL the serum types (RTT v. RBTT).	8-10 days	\$152.13
Carnitine [†]	CARNITINE	 GRNTT, YTT/Sterile leakproof container 0.5 mL heparinized plasma (separated) OR 5 mL urine 	Freeze plasma or urine within 20 minutes of collection. Ship on dry ice. Customer service can assist with frozen package pickup.	15-21 days	\$206.31
Vitamin A [†]	VITA	 SST, RTT, LTT, GRNTT 1.5 mL serum or EDTA or heparinized plasma, separated 		3-5 days	\$105.20

Add-Ons

You can quickly and easily add any of the tests below to an existing order, provided sufficient sample remains at the lab and is within stability guidelines. If you order electronically, you can place add-on orders through your PIMS or the ZoetisDx portal. If you use paper requisition forms, call customer service at **1-888-965-9652**.

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Anaerobic ID Add-on	A7157	Anaerobic tube or fluid/ tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-7 days	\$34.07
Bile Acid Pre/Resting Add-on	A6180	● ● SST, RTT 0.5 mL serum 		1-2 days	\$24.98
ZRL™ Premium Lipase (DGGR Lipase) Add-on	A1030	● ● SST, RTT 0.5 mL serum 		8 AM next day	\$11.18
FELV/FIV Rapid Test Add-on	A6005	● ● ● SST, RTT, LTT 0.25 mL of serum or EDTA plasma or whole blood 	Lateral flow assay with confirmation of positive FeLV results by ViraCHEK® ELISA	8 AM next day	\$14.35
Fructosamine Add-on	A1024	● ● SST, RTT 0.5 mL serum 		1-2 days	\$20.12
Heartworm Antigen Test Add-on	A6001	● ● ● SST, RTT, LTT 0.25 mL of serum or EDTA plasma 	DiroCHEK® ELISA	8 AM next day	\$9.94
SDMA Add-on	AN7037	● ● SST, RTT 0.5 mL serum 		8 AM next day	\$17.96

Add-Ons (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Tick Panel Screening Test Add-on	A6002	   SST, RTT, LTT 0.25 mL of serum or EDTA plasma or whole blood 	Lateral flow assay for Ehrlichia, Anaplasma, Borrelia (Lyme) Antibodies Canines only.	8 AM next day	\$14.14
Triglycerides Add-on	A1023	  SST, RTT 0.5 mL of serum or EDTA plasma or whole blood 		8 AM next day	\$7.97
TLI Canine Add-on	A6206	  SST, RTT 0.5 mL serum, separated 		1-2 days	\$47.76
Cortisol Add-on	A5101	 RTT 0.5 mL serum, separated 		8 AM next day (1-2 days for feline/equine samples)	\$14.35
Direct Coombs Add-on	A2701	 LTT 2 mL EDTA whole blood 		1-2 days	\$56.82
Feline Heartworm Antibody (ELISA) Add-on†	A6007	  SST, RTT 1 mL serum 	HW Ab ELISA	5-8 days	\$119.87
Free T4 Add-on	A5103	  SST, RTT 0.5 mL serum 		8 AM next day	\$17.67
Giardia Antigen Test, Canine/Feline Add-on	A2321	 Feces 3 gm fresh feces 	Giardia Ag ELISA	Next day by 5 PM	\$11.74

Add-Ons (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Leptospira Antibodies (IgM), Canine Add-on	A6008	 SST, RTT, LTT 0.5 mL serum or EDTA plasma or whole blood 	Detects IgM for the following canine serovars: <i>canicola</i> , <i>icterohaemorrhagiae</i> , <i>grippotyphosa</i> , <i>pomona</i>	1-3 days	\$31.88
Phenobarbital Add-on	A1031	 RTT 0.5 mL serum 		1-2 days	\$39.81
Total T4 Add-on	A5102	 SST, RTT 0.5 mL serum 		8 AM next day	\$15.13
TSH Add-on	A5106	 SST, RTT 0.5 mL serum 		8 AM next day (1-2 days for feline samples)	\$14.35
Urine Culture and Sensitivity Add-on	A7140	 YTT/sterile tube 1 mL urine in YTT or sterile container. 		1-5 days	\$62.08
Urine Protein:Creatinine Ratio Add-on	A1555	 YTT 1 mL urine in YTT/sterile container 		8 AM next day	\$15.13
Urine Cortisol:Creatinine Ratio Add-on†	A3310	 YTT 1 mL urine in YTT/sterile container 		8 AM next day (1-2 days for feline samples)	\$62.53
Coccidioides Titer AGID Add-on	A6129	 SST or RTT 1 mL serum 	IgG, IgM assessed via AGID. Titer provided for IgG if positive	5-7 days	\$57.12

Add-Ons (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Urinalysis Add-on	25001700	● YTT 5 mL urine in YTT/sterile container 			\$15.13
Urinalysis w/ reflex UPC Add-on	25001701	● YTT 5 mL urine in YTT/sterile container 	Use this code when no urine testing was ordered at sample submission, but a urinalysis and reflex UPC is needed after the fact. A UPC will be performed automatically if the urine meets the required criteria.		\$20.76
Free (Ionized) Calcium (Mich. State Univ.) Add-on†	A6304	● RTT 0.75 mL serum, separated 		3-6 days	\$74.15
Reticulocyte Count Add-on	25000525	● LTT 0.5 mL EDTA whole blood 		8 AM next day	\$16.55

Core Panels

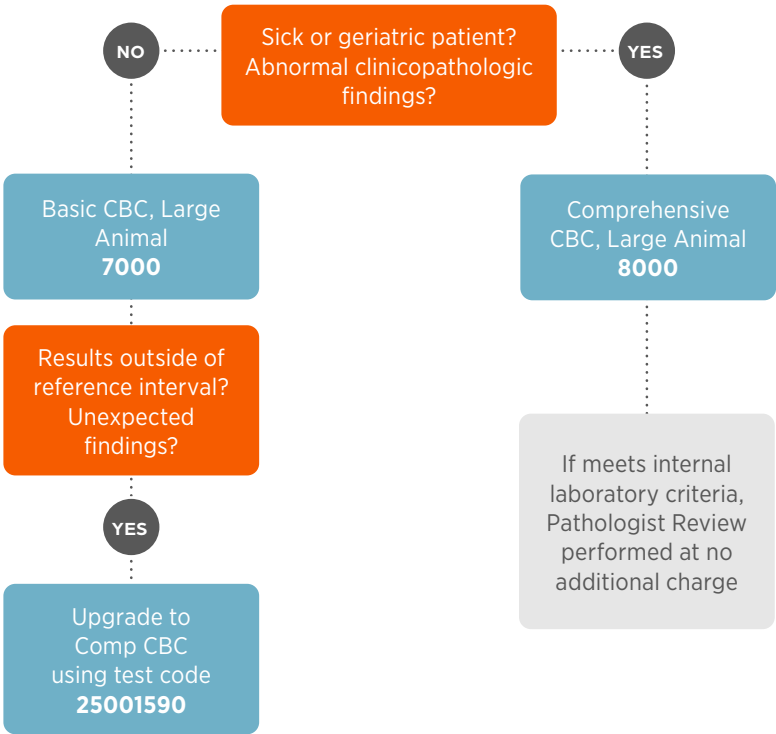

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Large Animal Wellness Panel	EQWP	●●● 1 mL serum; 2 mL EDTA whole blood	Basic CBC, Large Animal ClinChem 24	1-2 days	\$54.66
Exercise Panel, Large Animal	25000489	●●● SST, RTT, YTT 1 mL serum; 5 mL urine in YTT/sterile container	Exercise ClinChem, (Glu, Na, K, Cl, BUN, Creat, BUN, BUN/Creat, AST, CK, UA)	1-2 days	\$28.88
Metabolic Panel, Large Animal	25000494	●● SST, RTT 2 mL serum	Glu, BUN, Creat, BUN:Creat Ratio, TP, Chol, Trig, Endogenous ACTH, Insulin	1-3 days	\$101.88
Pre-anesthetic Panel, Large Animal	25000495	●●● SST, RTT, LTT 1 mL serum; 2 mL EDTA whole blood	Basic CBC, Pre-Anesthetic ClinChem (Glu, Na, K, Creat, Ca, TP, GLDH, Tbili)	1-2 days	\$30.68
Renal Panel I, Large Animal	25000497	●●●● SST, RTT, LTT, YTT 2 mL EDTA whole blood; 1 mL serum; 5 mL urine in YTT/sterile container	Basic CBC, Renal ClinChem (Glu, Na, K, Cl, BUN, Creat, BUN/Creat, Ca, P, CO2, AG, TP, ALB, UA, Reflex UPC)	1-2 days	\$67.02
Renal Panel II, Large Animal	25000498	●●● SST, RTT, YTT 1 mL serum; 5 mL urine in YTT/sterile container	Renal ClinChem, (Glu, Na, K, Cl, BUN, Creat, BUN/Creat, Ca, P, CO2, AG, TP, ALB, UA, Reflex UPC)	1-2 days	\$36.62

Hematology

Choose the CBC option that’s best for your patients.

At Zoetis Reference Laboratories, our CBCs are grounded in quality standard operating procedures developed by a team of board-certified clinical pathologists. Expertly trained technicians produce quality results, collaborating directly with pathologists as needed along the way.

	Basic Test code: 7000	Comprehensive Test code: 8000
	Recommended for wellness screens in non-geriatric, healthy patients	Recommended for sick or geriatric patients
WBC, HGB, RBC, HCT, MCV, MCHC, CHCM, RDW, 5-Part WBC Differential, Platelet Count, MPV, Plasma Protein, Fibrinogen, Plasma Protein:Fibrinogen Ratio	✓	✓
Performed if indicated based on automated results: Spun PCV, Manual WBC Differential, Assessment for Platelet Clumping +/-, Visual Platelet Estimate, and/or Reticulocyte Count	✓	✓
Complete manual smear review by technician		✓
Pathologist review if indicated by laboratory established criteria		✓

Tests listed above are intended for horses and other domestic hoofstock, including: cattle, sheep, goats, pigs, camels, llamas, and alpacas.

Test requirements: 2 mL EDTA whole blood

Hematology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Basic CBC, Large Animal (Healthy Animals)	7000	- LTT 2 mL EDTA whole blood 	RBC, HGB, HCT, MCV, MCHC, CHCM, RDW, WBC, WBC Differential, PLT, MPV, Plasma Protein, Fibrinogen, Plasma Protein:Fibrinogen Ratio. If results indicate, will include a PCV, Manual Differential, and/or Reticulocyte Count (species dependent).	1-2 days	\$28.13
Comprehensive CBC, Large Animal	8000	- LTT 2 mL EDTA whole blood, 	CBC with blood smear review by technician. If results indicate, will include a PCV, Manual Differential, Reticulocyte (species dependent) Count, and/or Pathologist Review.	1-2 days. Pathologist Review may extend turnaround time 24 hrs.	\$40.49
Comprehensive CBC Upgrade, Large Animal	25001590	- LTT 2 mL EDTA whole blood		1-2 Days. Pathologist Review may extend turnaround time 24 hrs.	\$12.36
Pathologist Review	PATH		Comprehensive CBC and blood smear review by pathologist when ordered pre-emptively. Only comprehensive CBCs are eligible for pathologist review.	1-2 days	\$84.26
Technician Blood Smear Review	SMREV	- LTT 2 unstained, air-dried slides; include 2 mL EDTA whole blood, if possible (for in-lab preparation of smears)  Blood  Slides	Morphologic review of RBC, WBC, and platelets, Manual WBC Differential, and visual platelets estimate. If indicated based on internal lab criteria, a Pathologist Review will be included.	8 AM next day	\$18.69
Reticulocyte	RETIC	- LTT 1 mL EDTA whole blood 	RBC, % Reticulocyte, Absolute Reticulocyte (species dependent)	8 AM next day	\$19.47
Buffy Coat	6295	- LTT 1 mL EDTA whole blood 		1-2 days	\$113.66

Hematology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Iron Profile†	IRONPRO	● ● RTT, GRNTT 0.5 mL serum or heparinized plasma 	Iron, TIBC, and Ferritin	7-10 days	\$150.14
PT & aPTT	4101	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) 	For weekend and holiday shipping recommend freezing plasma and sending on ice.	8 AM next day	\$26.75
Antithrombin (AT3)†	ANTTHRO3	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT). Freeze. Ship on ice packs. 		3-5 days	\$120.37
Protein C†	PROC	● ○ BTT, WTT 1 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) Freeze. Ship on ice packs. 		2-3 days	\$124.87
Low Molecular Weight Heparin†	LMWHEPARIN	● ○ BTT, WTT 0.5 mL separated citrated plasma. The plasma should be aliquoted into a plain tube with no additive (WTT) 	Anti-Xa activity of LMWH	2-3 days	\$124.30

Chemistry

ClinChem Panels

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Erythropoietin (EPO) [†]	50227	● ● SST, RTT 1-2 mL separated serum in SST or aliquoted into no-additive tube (WTT). 		5-7 days	\$194.51
ClinChem 18, Large Animal	CHEM18EQ	● ● SST, RTT 1 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Mg, TP, Alb, Alb:Glob Ratio, AST, GGT, TBili, CK	1-2 days	\$16.88
Large Animal ClinChem 24	CHEM24EQ	● ● SST, RTT 1 mL serum 	Glu, Na, K, Na:K Ratio, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Mg, TP, Alb, Alb:Glob Ratio, AST, GGT, TBili, CK, Anion Gap, Phos, GLDH, ALP, Chol	1-2 Days	\$23.38
Exercise ClinChem, Large Animal	25000509	● ● SST, RTT 1 mL serum 	Glu, Na, K, Cl, BUN, Creat, BUN:Creat Ratio, AST, CK	1-2 days	\$11.42
Liver ClinChem, Large Animal	25000511	● ● SST, RTT 1 mL serum 	Glu, BUN, TP, Alb, Glob, Alb:Glob Ratio, AST, GLDH, GGT, TBili, Chol	1-2 days	\$11.42
Renal ClinChem, Large Animal	25000485	● ● SST, RTT 1 mL serum 	Glu, Na, K, Cl, BUN, Creat, BUN:Creat Ratio, Ca, Phos, CO2, Anion Gap, TP, Alb	1-2 days	\$13.17
Pre-Anesthetic ClinChem, Large Animal	25000486	● ● SST, RTT 1 mL serum 	Glu, Na, K, Creat, Ca, TP, GLDH, TBili	1-2 days	\$11.42

Chemistry (cont'd)

Individual Chemistry Tests

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Free (Ionized) Calcium	IONISTAT	- GRNTT 0.5 mL lithium heparinized whole blood 	Ensure that the sample is treated anaerobically and that the correct ratio of heparin anticoagulant to blood is achieved (do not underfill GRNTT).	1-2 days	\$53.50
Free (Ionized) Calcium (Mich. State Univ.)†	6304	- RTT 0.75 mL serum, separated 		3-6 days	\$83.85
LDH†	LDH	- RTT, GRNTT 0.5 mL separated serum or heparinized plasma (effusion fluid and urine also accepted)	Offered for equine, bovine, and ovine species.	3-5 days	\$91.72
Osmolality†	OSMOLAL	- RTT, GRNTT 1 ml separated serum or heparinized plasma 		2-3 days	\$100.71
Serum Amyloid A (SAA), Equine†	SAA	- RTT 1-3 mL serum 		2-3 days	\$123.18
Albumin	1001	- SST, RTT 0.5 mL serum 		1-2 days	\$7.46

Chemistry (cont'd)

Individual Chemistry Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
High-Sensitivity Cardiac Troponin I†	TROPONIN	● ● SST, RTT 0.5 mL non-hemolyzed serum (frozen) 	Non-canine species' reports will not contain reference interval or interpretive comments. Recommend shipping on dry ice. Customer service can assist with frozen package pickup.	4-5 days	\$143.40
ALP (Alk Phos)	1003	● ● SST, RTT 0.5 mL serum 		1-2 days	\$9.19
AST	1005	● ● SST, RTT 0.5 mL serum 		1-2 days	\$7.46
BUN	1006	● ● SST, RTT 0.5 mL serum 		1-2 days	\$9.19
Chloride	1007	● ● SST, RTT 0.5 mL serum 		1-2 days	\$7.86
Calcium (Total Calcium)	1008	● ● SST, RTT 0.5 mL serum 		1-2 days	\$9.19
Cholesterol	1009	● ● SST, RTT 0.5 mL serum 		1-2 days	\$9.19
Creatinine	1010	● ● SST, RTT 0.5 mL serum 		1-2 days	\$9.19

Chemistry (cont'd)

Individual Chemistry Tests (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Creatinine Kinase (CK)	1011	  SST, RTT 0.5 mL serum  		1-2 days	\$7.46
GLDH	1040	  SST, RTT 0.5 mL serum 		1-2 days	\$7.86
GGT	1013	  SST, RTT 0.5 mL serum 		1-2 days	\$7.86
Glucose	1014	  SST, RTT 0.5 mL serum 		1-2 days	\$9.19
Magnesium	1016	  SST, RTT 0.5 mL serum 		1-2 days	\$7.86
Phosphorus	1017	  SST, RTT 0.5 mL serum 		1-2 days	\$9.19
Potassium	1018	  SST, RTT 0.5 mL serum 		1-2 days	\$9.19
Sodium	1019	  SST, RTT 0.5 mL serum 		1-2 days	\$7.86

Urine

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Urinalysis	3000	● YTT 5 mL urine in YTT/sterile container 		8 AM next day	\$17.80
Urine Protein:Creatinine Ratio	1555	● YTT 1 mL urine in YTT/sterile container 		8 AM next day	\$17.80
Urinalysis with Reflex UPC	25000521	● YTT 5 mL urine in YTT/sterile container 	A UPC will be performed automatically if the urine meets the required criteria.	8 AM next day	\$24.41
Urinalysis with Reflex UPC upgrade	25001702	● YTT 5 mL urine in YTT/sterile container 	Use this code to upgrade a core panel urinalysis to include reflex UPC		\$6.62
Urine Electrolyte Panel (for Fractional Excretion) [†]	FREXCRE	● YTT 2 mL urine in YTT/sterile container AND 2 mL separated serum or heparinized plasma 	Cl, Creat, K, Na Concurrent measurement of serum creatinine and electrolytes is needed for determination of fractional excretion.	3-5 days	\$124.30

Endocrinology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Cortisol (Baseline/Resting)	5101	● SST, RTT 0.5 mL serum 		8 AM next day (1-2 days for feline/ equine samples)	\$16.88
Cortisol AM/PM, Equine	AMPMEC	● SST, RTT 2 mL serum (2 samples required) 	Label tubes with collection times	1-2 days	\$32.10
Progesterone	5105	● RTT 0.5 mL serum 		8 AM next day	\$46.83
Total T4	5102	● SST, RTT 0.5 mL serum 		8 AM next day	\$17.80
Free T4	5103	● SST, RTT 0.5 mL serum 		8 AM next day	\$20.79
Free T4 by ED†	6330	● SST, RTT 0.5 mL serum 		5-7 days	\$126.55
Total T3 (TT3), Equine	TT3	● SST, RTT 1 mL serum 		1-2 days	\$40.09
Thyroid Panel	EQTHYROID	● SST, RTT 1.5 mL serum 	TT4, TT3, free T4	1-2 days	\$48.14

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Estrone sulfate, Equine[†]	25001386	● ● SST, RTT PREFERRED: 1 mL serum; 1 mL separated EDTA or heparinized plasma also accepted 		3-10 days	\$113.06
Endogenous ACTH	ENDOACTH	● LTT 1 mL EDTA plasma; separated within 4 hours and shipped frozen 	Sample should arrive to the lab frozen or chilled. Recommend shipping on dry ice. Customer service can assist with frozen package pickup.	1-3 days	\$54.88
Equine Metabolic Panel (ACTH, Insulin, Glucose)	EQCUSHING	● ● ● SST, RTT, LTT 1 mL EDTA plasma (separated within 4 hrs and frozen) AND 1 mL serum (separated within 1 hr)  Plasma  Serum	Endogenous ACTH, Insulin, Glu If unable to separate serum within 1 hr: 1 mL EDTA plasma (separated within 4 hrs and frozen), 1 mL serum, AND 2 mL GRYTT whole blood EDTA plasma for ACTH should arrive to the lab frozen or chilled. Recommend shipping on dry ice. Customer service can assist with frozen package pickup.	1-3 days	\$96.30
Metabolic Syndrome Panel I, Equine[†]	CUSHING	● ● ● SST, RTT, LTT 1 mL EDTA plasma (separated within 4 hrs and frozen) AND 1 mL serum (separated within 1 hr)  Plasma  Serum	Endogenous ACTH, Insulin, Glu, Leptin, T4 EDTA plasma for ACTH should arrive to the lab frozen or chilled. Recommend shipping on dry ice. Customer service can assist with frozen package pickup.	1-3 days	\$200.70
TRH Stimulation Test for Equine Cushing's/PPID	2222	● LTT 1 mL EDTA plasma for each sample (separated within 4 hrs and frozen) 	Baseline and post-TRH ACTH Samples should arrive to the lab frozen or chilled. Recommend shipping on dry ice. Customer service can assist with frozen package pickup.	1-4 days	\$107.00
Insulin-like Growth Factor[†]	ILGROFAC	● ● ● SST, RTT, LTT 0.75 mL serum or EDTA plasma		5-10 days	\$146.77

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Vitamin D (25-hydroxyvitamin D3)[†]	VITD	● RTT 0.75 mL serum, separated and frozen ❄️	Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	4-10 days	\$137.07
GCT Panel II, Equine[†]	EQGCTPII	○ ● SST, RTT 3 mL serum ❄️	Anti-Müllerian Hormone, Inhibin, Testosterone	5-7 days	\$227.33
Anti-Müllerian Hormone, Equine[†]	ANTIMULL	○ ● SST, RTT 1 mL serum ❄️		3-14 days	\$141.56
Pregnancy Panel, Equine[†]	25001387	○ ● SST, RTT 3 mL serum 📄	Estrone Sulfate, Pregnant Mare Serum Gonadotropin, Progesterone	3-10 days	\$152.73
Pregnant Mare Serum Gonadotropin (PMSG)[†]	25001388	○ ● SST, RTT 1 mL serum 📄	Horses only - samples should be taken 50-100 days post-breeding.	3-10 days	\$109.69
Cryptorchid Panel, Equine[†]	EQCRYPTO	● RTT 2 mL serum, separated and frozen ❄️	Testosterone, Equine Anti-Mullerian Hormone male horses only (no donkeys)	7-10 days	\$129.92
Gastrin[†]	GASTRIN	● RTT 1 mL serum, separated and frozen ❄️	Freeze sample. Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	3-12 days	\$118.68
Reproductive Hormone Panel[†]	RHP	● ● LTT, RTT (no SST) 2 mL serum or plasma (no SST)	Estrogen, Progesterone, Testosterone	5-10 days	\$161.40

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Aldosterone Baseline†	ALDOS	●●● LTT or SST, RTT 0.5 mL EDTA plasma (preferred); 0.5 mL serum also accepted. Do not send whole blood. 	Centrifuge EDTA sample immediately and separate EDTA plasma within 30 minutes of collection. Transfer to sterile, no additive tube and label tube EDTA plasma. Freeze sample and ship on ice.	7-10 days	\$105.20
Insulin:Glucose Ratio, Equine	EQINSGLU	●● RTT OR GRYTT 1 mL serum OR 1 ml serum AND 1 mL GRYTT whole blood 	If serum cannot be separated within 1 hr, obtain RTT serum (required for insulin measurement) and GRYTT whole blood for accurate glucose measurement.	1-4 days	\$42.80
Estrogens, Total†	EQUEST	●● LTT, RTT (no SST) 2 mL serum or plasma		3-5 days	\$98.46
Testosterone, Baseline†	TESTOS	● RTT 1 mL serum 		2-9 days	\$101.83
Oral Sugar Test (Insulin Testing), Equine†	EQGLUCOSE	● RTT 1 mL serum. 		3-5 days	\$99.58
Insulin, Equine	5104	● RTT 0.5 mL serum 		1-4 days	\$38.96
Testosterone Post-HCG/GnRH†	TESTPOST	●● RTT, LTT 1 mL serum 		3-8 days	\$93.96
Metanephrines, Plasma-free†	METAPLAS	●● LTT or GRNTT 1-2 mL EDTA or heparinized plasma, separated and frozen 	Centrifuge and separate plasma within 1 hr of collection. Freeze immediately. Ship on dry ice. Customer service can assist with frozen package pickup.	5-7 days	\$227.62

Endocrinology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Metanephrines, Urine Fractionated†	METAUR	● YTT 2.5-4 mL urine in YTT/sterile container 	Freeze immediately. Ship on dry ice. Customer service can assist with frozen package pickup.	5-7 days	\$121.65
Parathyroid Hormone–Related Protein (PTHrP)†	PTHRP	● LTT 1 mL EDTA plasma, separated and frozen 	Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	5-7 days	\$133.29
Vitamin D Profile†	VITP	● RTT 1.5 mL serum, separated and frozen 	PTH, Free (Ionized) Calcium, and 25-hydroxyvitamin D Sample must arrive frozen to the laboratory. Shipping on dry ice is recommended. Customer service can assist with frozen package pickup.	3-9 days	\$147.56

GI/Pancreatic

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Amylase (Mich. State Univ.)†	1004	● ● SST, RTT 0.5 mL serum 		2-3 days	\$92.74
Fecal Occult Blood	7255	● Feces 1-3 gm fresh feces		1-2 days	\$40.09

Fecal/Parasitology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Ova and Parasite (Centrifugal Fecal Flotation) Test	2320A	- Feces 3-5g fresh feces 		Next day by 5 PM (1-2 days for equine samples)	\$17.64
McMaster (Fecal Egg Counting) Test	2328	- Feces 5 gm fresh feces 	Quantitative fecal egg count	1-2 days	\$25.48
Centrifugal Fecal Flotation Test (O&P) & McMaster (Fecal Egg Counting) Test	25000487	- Feces 8-10 gm fresh feces 		1-2 days	\$25.48
Baermann Test (Lungworm)	BAER	- Feces 10 gm fresh feces 		3-5 days	\$56.14
Gross Parasite Identification	25001435	Whole parasite (adult worm, larvae, ectoparasite, etc.) in sealed, leakproof container		1-5 days	\$36.07

Microbiology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Equine Uterine Culture	7154	Culture swab	This offering is intended for breeding soundness exams. For active infections, choose aerobic or anaerobic culture as indicated.	2-5 days	\$66.83
Aerobic Culture	7156	Culture swab or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-5 days	\$73.03
Anaerobic Culture	7157	Anaerobic tube or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-7 days	\$34.07
Aerobic and Anaerobic Culture	7135	Culture swag and anaerobic tube or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-7 days	\$112.35
Mycoplasma Culture[†]	MYCOPLASCU	Culture swab, fluid or tissue in WTT/sterile container.	Refrigerate fluid or tissue submissions and ship on ice packs.	Up to 21 days	\$98.46
Urine Culture and Sensitivity	7140	● YTT 1 mL urine in YTT or sterile container 		1-5 days	\$73.03
Hold Urine Culture for 48 hours	25000534		Bacterial culture will be held for an additional 24 hours (48 hours total). This test is intended for use in working up complicated/chronic urinary tract infections and must be ordered at the time the urine culture is initially requested.	2 days	\$0.01

Microbiology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Blood Culture	7150	Two blood culture bottles, each inoculated with 3 mLs of blood 	Submit two blood samples, drawn at least one hour apart and from different, disinfected venipuncture sites. Store at room temperature. DO NOT REFRIGERATE.	3-9 days	\$147.07
Dermatophyte Culture	7160	WTT/sterile tube Plucked hair, nail clippings, skin scrapings or brushings 		12 days for final report	\$73.56
Fecal Culture	7155	● Feces 2 g fresh feces 		2-7 days	\$73.56
Fungal Culture	7145	Culture swab or fluid/tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	Up to 26 days for final report	\$73.56
<i>Mycobacterium</i> Culture†	MYCO	As indicated: tissue aspirate, lymph node, skin biopsy, or other tissue sample in sterile, leakproof container. 	Refrigerate fluid or tissue submissions and ship on ice packs. Culture for <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> no longer included in this offering. PCR is recommended to identify <i>M. avium</i> .	60 days	\$109.69
Acid-Fast Stain	ACIDFAST	Culture swab or fluid/ tissue in WTT/sterile container		1-4 days	\$45.44
Fungal Susceptibility 1 Drug†	FUNGALSUS1		Add on fungal susceptibility testing for one antifungal drug.	1-2 weeks	\$143.71
Fungal Susceptibility 2 Drugs†	FUNGALSUS2		Add on fungal susceptibility testing for two antifungal drugs.	1-2 weeks	\$227.33

See the complete Directory of Services online at zoetisreflabs.com/DOS

Microbiology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Fungal Susceptibility 3 Drugs†	FUNGALSUS3		Add on fungal susceptibility testing for three antifungal drugs.	1-2 weeks	\$310.94
Skin Culture and Sensitivity (Dermatology)	25001434	Culture swab or fluid/tissue 	Culture and AMS designed for skin lesions, including ear infections. Refrigerate fluid or tissue submissions and ship on ice packs.	2-5 days	\$66.84

Serology/Infectious Diseases

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Coggins AGID, Paper Submission	COGAGID	● ● SST, RTT 1 mL serum 	Completed USDA paper forms required for this submission. Submit a dedicated serum sample; aliquots from other test samples are not permitted.	2-5 days	\$33.42
Coggins ELISA, Paper Submission	COGELISA	● ● SST, RTT 1 mL serum 	Completed USDA paper forms required for this submission. Submit a dedicated serum sample; aliquots from other test samples are not permitted.	1-4 days	\$33.42
Coggins AGID, Electronic Submission	E1560	● ● SST, RTT 1 mL serum 	Completed USDA electronic forms required for this submission. Submit a dedicated serum sample; aliquots from other test samples are not permitted.	2-5 days	\$20.08
Coggins ELISA, Electronic Submission	E1561	● ● SST, RTT 1 mL serum 	Completed USDA electronic forms required for this submission. Submit a dedicated serum sample; aliquots from other test samples are not permitted.	1-4 days	\$20.08

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Aspergillus</i> Titer AGID†	ASP	 SST or RTT 1 mL serum 	IgG	3-5 days	\$117.56
<i>Blastomyces</i> Quantitative Antigen EIA†	BLASTANT	 SST, RTT, LTT or WTT 0.5 mL of urine, serum or plasma (separated), 0.8 mL CSF in sterile no-additive tube (WTT), or 1.2 mL BAL fluid in sterile no-additive tube (WTT) 		2-5 days	\$152.39
<i>Coccidioides</i> Titer AGID†	6129	 SST or RTT 1 mL serum 	IgG, IgM assessed via AGID. Titer provided for IgG if positive.	5-7 days	\$71.40
Equine Viral Arteritis (EVA)†	EVA	 SST, RTT 1 mL serum 		5-9 days	\$149.84
<i>Leptospira</i> MAT, 5 Serovar†	6164	 RTT 0.5 mL serum 	Detection of antibodies to <i>Leptospira interrogans</i> serovars <i>pomona</i> , <i>hardjo</i> , <i>icterohaemorrhagiae/copenhageni</i> , <i>grippityphosa</i> , and <i>canicola</i>	Up to 10 days	\$115.05
<i>Leptospira</i> MAT, 5 Serovar & PCR†	6163	 RTT, LTT For MAT: 0.5 mL serum in RTT; For PCR: 5 mL Urine; OR 1 mL EDTA whole blood (LTT); OR 1 gm tissue (e.g., kidney and/or liver); OR 1 mL aqueous humor; OR 0.5 mL CSF 	Detection of antibodies to <i>Leptospira interrogans</i> serovars <i>pomona</i> , <i>hardjo</i> , <i>icterohaemorrhagiae/copenhageni</i> , <i>grippityphosa</i> , and <i>canicola</i>	Up to 10 days	\$154.77

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Sarcocystis neurona</i> by Western Blot†	SNEURONA	● ● SST, RTT 1 mL serum or 1 mL CSF (RTT) 		5-7 days	\$166.99
<i>Aspergillus</i> Galactomannan Antigen EIA†	ASPGUR	● ● ● ○ SST, RTT, LTT or WTT As indicated: 0.8 mL of serum or EDTA plasma (separated), CSF, urine, or BAL fluid in sterile no-additive tube (WTT). 		2-5 days	\$161.40
<i>Cryptococcus</i> Antigen Titer by Latex Agglutination	7216	● ● SST, RTT 0.5 mL serum or CSF 		1-2 days	\$100.32
Equine Protozoal Myelitis IFA Titers (SarcoFluor™ & NeoFluor™)†	EPMIFAT	● RTT 2 mL separated serum OR 2 mL CSF 	SarcoFluor detects <i>Sarcocystis neurona</i> antibodies; NeoFluor detects <i>Neospora hughesi</i> antibodies.	7-12 days	\$232.56
<i>Histoplasma</i> Quantitative Antigen EIA†	HISTOANT	● ● ● ● SST, RTT, LTT or YTT As indicated: 0.5 mL of urine, serum or plasma (separated), 0.8 mL CSF in sterile no-additive tube (WTT), or 1.2 mL BAL fluid in sterile no-additive tube (WTT). 		2-5 days	\$152.39
Lyme Multiplex Test, Equine†	LYMEMPLXEQ	● RTT 2 mL serum; 1 mL CSF 		5-7 days	\$129.92

Serology/Infectious Diseases (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Pythium</i> Serology†	OOPYTHIUM	● RTT 1 mL serum 		3-5 days	\$154.63
<i>Streptococcus equi</i> ELISA†	STREPEQUI	● RTT 1 mL serum 		5-7 days	\$155.76
Equine Protozoal Myelitis IFA Titer (SarcoFluor™)†	SARCOIFAT	● RTT 2 mL separated serum OR 2 mL CSF 	SarcoFluor detects <i>Sarcocystis neurona</i> antibodies.	7-12 days	\$153.92
West Nile Virus IgM ELISA†	WESTNILE	●● SST, RTT 2 mL serum 	Required information for submission: patient location (town/state), sample collection date, animal ID, species, and reason for submission (e.g. suspicious of clinical disease v. screening for disease).	3-5 days	\$90.59
Caseous Lymphadenitis (<i>Corynebacterium pseudotuberculosis</i>) Titer†	CALYMTR	●● SST, RTT 2 mL serum 		3-5 days	\$88.35
Equine Protozoal Myelitis IFA Titer (NeoFluor™)†	NEOIFAT	● RTT 2 mL separated serum OR 2 mL CSF 	NeoFluor detects <i>Neospora hughesi</i> antibodies.	7-12 days	\$154.63
Potomac Horse Fever (<i>Neorickettsia risticii</i>) IFA†	POTOMAC	○ SST 1 mL serum 	IgG	5-7 days	\$120.93
<i>Rhodococcus equi</i> ELISA†	RHODOCOCCUS	●● SST, RTT 1 mL serum 		3-5 days	\$71.90

Clinical Pharmacology/Toxicology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Drug Screen, Firocoxib†	DGSCRFIRO	  SST, RTT, LTT 10 mL serum or EDTA plasma 		2-4 days	\$373.72
Drug Screen with Tranquilizers, NSAIDS†	DSNSAIDTQ	  SST, RTT, LTT 10 mL serum or EDTA plasma 	Multiple drugs tested, updated periodically. Call Customer Service at 1-888-965-9652 for more information.	7-10 days	\$227.66
Quantitative Copper (Blood or Tissue)†	6171	   RTT, LTT or GRNTT As indicated: 2 mL serum, whole blood (EDTA or heparin), or 50 mg tissue (fresh, frozen, fixed or in paraffin block)	For copper-associated liver disease, liver tissue MUST be submitted.	7-10 days	\$204.34
Selenium and Trace Elements Screen†	SELETREL	  LTT, RBTT 2 mL serum (RBTT) AND 1 mL EDTA whole blood (LTT) 	Se, Ca, Cu, Fe, Mg, Phos, Zn. This test requires both EDTA whole blood (selenium) and RBTT serum (trace minerals) to avoid zinc contamination. Separate and transfer serum to a new, labeled RBTT.	7-10 days	\$141.55
Zinc, Serum/Plasma†	ZINC	 RBTT 2 mL RBTT EDTA plasma or RBTT serum, separated 	Plasma or serum is required for this assay. Collect whole blood into an EDTA RBTT, separate and transfer EDTA plasma to a new, labeled RBTT to avoid zinc contamination. Follow a similar protocol for serum collection, but use a serum RBTT.	3-5 days	\$114.19
Anticoagulant (Rodenticide)†	ANTICOAG	 LTT 3 mL EDTA whole blood 	Includes brodifacoum, bromadiolone, chlorophacinone, difenacoum, difethialone, diphacinone, and warfarin	6-12 days	\$207.80

Clinical Pharmacology/Toxicology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Drug Screen, NSAIDs	DSNSAIDS	   SST, RTT, LTT 10 mL serum or EDTA plasma 	Multiple drugs tested, updated periodically. Call Customer Service at 1-888-965-9652 for more information.	2-4 days	\$149.02
Drugs of Abuse†	DOA	   SST, RTT, YTT/sterile leakproof container As indicated: 10 mL serum or urine or 10 g liver or kidney	Amphetamine, cocaine, benzoylecgonine, norcocaine, ephedrine, lysergic acid diethylamide, (LSD), methamphetamine, MDMA, nicotine, phentermine, psilocin, delta-9-THC, THC-OH, THC-COOH, methadone, morphine, HU-210, JWH-018	10-14 days	\$307.16
LC/Mass Spectrometry Toxicology Screen†	LCMS	 WTT or sterile, leakproof container As indicated: 20 mL fluid, 50 g tissue, 50 g feed OR 50 g source material 	Toxicology screen for unknown exposure	2-3 weeks	\$260.75
Blood Lead†	6240	  LTT, GRNTT 0.5 mL EDTA or heparinized whole blood 		5-7 days	\$119.81
Gabapentin†	GAB	  LTT, RTT 0.5 mL EDTA plasma or serum, separated	Do not ship serum on SST gel barrier. If SST used for collection, transfer serum to WTT.	3-5 days	\$150.14
Toxic Heavy Metal Panel†	25001395	  LTT, GRNTT As indicated: 8 mL EDTA or heparinized whole blood or 3 g tissue (liver or kidney) 	Quantitative analysis of arsenic, cadmium, lead, thallium, mercury, selenium	6-12 days	\$229.91

See the complete Directory of Services online at zoetisreflabs.com/DOS

Pathology

Histopathology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Histopathology Simple, Single Site	ZN100	Formalin-fixed tissue Also accepted: fresh tissue, prepared histopathology slides	- Single site - No more than 10 cm in any dimension - Not for dermatologic disease or with other criteria of Complex Level 1 or 2	3-7 days	\$95.50
Histopathology Simple, Multiple Sites (Up to 5 Sites)	ZN101	Formalin-fixed tissue Also accepted: fresh tissue, prepared histopathology slides	- Simple samples from up to 2-5 unique sites - No more than 10 cm in any dimension - Not for dermatologic disease or with other criteria of Complex Level 1 or 2	3-7 days	\$140.44
Histopathology Complex, Level 1	ZN102	Fresh or formalin-fixed tissue	- Skin biopsies for dermatologic disease (without dermatologist consult) - Multiple gastrointestinal biopsies - Bone marrow - Whole organs/major components of organs: eye, spleen, testicles, uterus/ovaries, mammary chains (2 or more connected glands), amputated digit/nail or tail, liver lobe, or lung lobe - Large samples (>10cm in any dimension) - Individual teeth or other small samples containing bone - Simple samples from 6-15 unique sites - Formalin-fixed whole bodies <300 g	3-9 days	\$176.66
Histopathology Complex, Level 2	ZN103	Fresh or formalin-fixed tissue	- Mandible, maxilla (all jaws, regardless of size) - Amputated limb - Other large/atypical samples containing bone - Multiple Complex Level 1 samples - Simple samples from >15 sites.	Varies by nature of sample	\$224.63

Pathology (cont'd)

Specialty Histopathology Tests

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Dermatopathology Panel	ZN400	- Formalin-fixed skin biopsies - Detailed history and clinical images are required	- Biopsy report by dermatopathologist - Addendum with case management guidance from boarded dermatologist - Images can be sent to: referencelabpathology@zoetis.com	Dermatopathology: 3-7 days. Consult provided after dermatopathology.	\$193.90
Nephropathology (Renal) Panel	ZN25000541	- 1 or more 14G to 18G core needle biopsy, a wedge biopsy, or other larger renal sample (eg, nephrectomy) - Detailed history is required	- Biopsy report by kidney specializing pathologist - H&E, PAS, trichrome, Jones methenamine silver stains (Congo Red also included, if indicated) - Images can be sent to: referencelabpathology@zoetis.com	3-7 days	\$241.55

Pathology (cont'd)

Cytopathology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Cytopathology Simple/ Single Site	7120	- LTT As indicated: Unstained, air-dried slides; fluid from a mass in LTT - Slides - Liquid	For the following sample types: - Single lesion/tissue (FNA, swab, impression smear) - Single or multiple lymph nodes - Single joint (slides only) - Fluid from mass lesion (cytology only)	1-2 days	\$101.12
Cytopathology Complex	7201	- LTT As indicated: Unstained, air-dried slides and/or fluid in LTT - Slides - Liquid	For the following sample types: - Up to 7 lesions/tissue types (FNA, swab, impression smear) - Multiple joints (slides only) - Bone marrow - BAL/TTW (1 mL minimum EDTA recommended) - CSF (1 mL minimum recommended, aliquot as 0.5 mL LTT and 0.5 mL RTT) - Liquid joint fluid for complete analysis (2 mL LTT minimum per joint recommended) - Cavitary effusion(s) (2 mL LTT minimum per effusion)	1-2 days	\$137.05

Clinical Immunology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Complete Amino Acid Profile†	COMPAA	● GRNTT 1 mL heparinized plasma, separated and frozen 		7-9 days	\$247.52
Allergy Panel, Equine†	6307	● ● SST, RTT 3 mL serum		10-14 days	\$379.33
Protein Electrophoresis	6345	● ● ● SST, RTT, YTT/sterile, leakproof container 0.5 mL serum, >10 mL urine 		3-6 days	\$73.56
IgM, Equine	25000540	● ● SST, RTT 2 mL serum 	Radial immunodiffusion (RID)	1-3 days. Preliminary reported at 4 hours after setup. Final results at 24 hours after setup.	\$41.54
IgG, Equine	FOALIGG	● ● SST, RTT 2 mL serum 	Radial immunodiffusion (RID)	1-3 days. Preliminary reported at 4 hours after setup. Final results at 24 hours after setup.	\$41.54
IgG, Equine: Rapid, Semi-Quantitative	FOALIGGRAP	● ● ● SST, RTT, LTT 1 mL fresh whole blood or serum 	Semi-quantitative rapid test	1-2 days	\$51.93

Nutrition

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Selenium†	SELENIUM	●● LTT, RTT 0.5 mL EDTA whole blood preferred; 0.5 mL serum or EDTA plasma also accepted 		3-5 days	\$105.20
Trace Element Screen†	TMINPAN	● RBTT 2 mL serum from RBTT 	Ca, Cu, Fe (unbound), Mg, Na, K, Phos, Zn Collect blood in an RBTT serum tube to avoid zinc contamination. Separate and transfer serum to a new RBTT tube.	5-7 days	\$92.57
Thiamine (Vitamin B1)†	THIAMINE	●● GRNTT, LTT 3 mL EDTA or heparinized whole blood 	Freeze immediately and protect from light. Ship on dry ice. Customer service can assist with frozen package pickup.	5-7 days	\$128.27
Vitamin E†	2331	●●●● SST, RTT, LTT, GRNTT 1.5 mL serum or heparinized or EDTA plasma, separated and protected from light 		3-5 days	\$105.20
Vitamin E and Mineral Panel†	VITEMINE	●● RBTT AND RTT 1 mL EDTA whole blood in RBTT, 1 mL serum in RBTT, separated, AND 1 mL serum in RTT (separated and protected from light) 	Vitamin E, Ca, Cu, Fe, Mg, Phos, Zn, Se Collect whole blood into an EDTA RBTT AND serum into an RBTT serum tube to avoid zinc contamination. Separate and transfer serum to a new RBTT tube. Collect additional serum in a RTT, separate and protect from light. LABEL the serum types (RTT v. RBTT).	8-10 days	\$152.13

Nutrition (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Vitamin A†	VITA	SST, RTT, LTT, GRNTT 1.5 mL serum or EDTA or heparinized plasma, separated 		3-5 days	\$105.20

See the complete Directory of Services online at zoetisreflabs.com/DOS

Add-Ons

You can quickly and easily add any of the tests below to an existing order, provided sufficient sample remains at the lab and is within stability guidelines. If you order electronically, you can place add-on orders through your PIMS or the ZoetisDx portal. If you use paper requisition forms, call customer service at **1-888-965-9652**.

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Anaerobic ID Add-on	A7157	Anaerobic tube or fluid/ tissue 	Refrigerate fluid or tissue submissions and ship on ice packs.	2-7 days	\$34.07
Cortisol Add-on	A5101	● RTT 0.5 mL serum 		8 AM next day (1-2 days for feline/equine samples)	\$14.35
Free (Ionized) Calcium (Mich. State Univ.) Add-on†	A6304	● RTT 0.75 mL serum, separated 		3-6 days	\$74.15
Free T4 Add-on	A5103	● ● SST, RTT 0.5 mL serum 		8 AM next day	\$17.67
Reticulocyte Count Add-on	25000525	● LTT 0.5 mL EDTA whole blood 	Not available in equines.	8 AM next day	\$16.55
Total T4 Add-on	A5102	● ● SST, RTT 0.5 mL serum 		8 AM next day	\$15.13
Triglycerides Add-on	A1023	● ● SST, RTT 0.5 mL serum 		8 AM next day	\$7.97

Add-Ons (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Urine Protein:Creatinine Ratio Add-on	A1555	● YTT 1 mL urine in YTT/sterile container 		8 AM next day	\$15.13
Urinalysis Add-on	25001700	● YTT 5 mL urine in YTT/sterile container 		8 AM next day	\$15.13
Urinalysis with Reflex UPC Add-on	25001701	● YTT 5 mL urine in YTT/sterile container 	Use this code when no urine testing was ordered at sample submission, but a urinalysis and reflex UPC is needed after the fact. A UPC will be performed automatically if the urine meets the required criteria.		\$20.76

Avian, Exotic & Small Mammal

Core Panels

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Basic Mammal Panel†	25001452	●●● LTT slides 0.1 mL EDTA whole blood, slides, 0.2 mL serum or plasma 	CBC, Basic Mammal Chem Panel, EPH	4-5 days	\$220.87
Mini Mammal Panel†	25001461	●● LTT, GRNTT, slides 0.1 mL EDTA whole blood, slides, 0.1 mL heparinized plasma 	CBC, Electrophoresis	4-5 days	\$132.24
CBC Automated Count Manual Diff Mammal†	25001443	● LTT, slides 0.1 mL EDTA whole blood, slides 	Automated count and manual diff.	3-5 days	\$107.00
Well Bird Panel Package†	25001468	●●● RTT, LTT, GRNTT, slides 0.1 mL EDTA whole blood, slides; 0.3 mL plasma or serum 	CBC, Basic Avian Chem Panel, Bile acids, EPH	4-5 days	\$168.30
Mini Avian Panel †	25001459	●● LTT, GRNTT 0.1 mL EDTA whole blood, slides, 0.1 mL heparinized plasma 	CBC, Electrophoresis	4-5 days	\$126.22
Advanced Reptile Panel†	25001448	●● RTT, GRNTT, slides 0.1 mL heparinized whole blood, slides, 0.3 mL plasma or serum 	CBC, Advanced Reptile Chem Panel, EPH	4-5 days	\$175.52

Hematology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Fibrinogen Heat Precipitation Method†	25001457	● LTT 0.1 mL EDTA whole blood 		3-5 days	\$84.15
Mini Elasmobranh Panel†	25001460	● GRNTT, 2 slides 0.1 mL heparinized whole blood, 2 slides, 0.1 mL heparinized plasma 	CBC, Electrophoresis	4-5 days	\$126.22
Elasmobranh CBC and Diff†	25001455	● GRNTT, slides 0.1 mL heparinized whole blood, slides 		3-5 days	\$107.00
Basic Reptile Panel†	25001454	● ● RTT, GRNTT, slides 0.1 mL heparinized whole blood, slides, 0.25 mL serum or plasma 	CBC, Basic Reptile Chem Panel, EPH	4-5 days	\$164.69
Mini Reptile Panel†	25001462	● GRNTT, 2 slides 0.1 mL heparinized whole blood, 2 slides, 0.1 mL heparinized plasma 		4-5 days	\$126.22
Reptile CBC and Diff†	25001447	● GRNTT, slides 0.1 mL heparinized whole blood, slides 	By gold standard hemocytometer/Natt & Herrick's method	3-5 days	\$107.00
CBC Hemocytometer Cnt Man Diff Reptile†	25001444	● GRNTT, slides 0.1 mL heparinized whole blood, slides 	Automated count and manual diff.	3-5 days	\$107.00

Hematology (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Mini Teleost Panel†	25001463	● GRNTT, 2 slides 0.1 mL heparinized whole blood, 2 slides, 0.1 mL heparinized plasma 	CBC, Electrophoresis	4-5 days	\$126.22
Teleost CBC and Diff†	25001465	● GRNTT, slides 0.1 mL heparinized whole blood, slides 		3-5 days	\$107.00

Chemistry

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Lipoprotein Chemistry Panel†	25001458	● GRNTT 0.1 mL heparinized plasma 		4-5 days	\$110.60
Adv Avian Chem Panel†	25001437	● GRNTT 0.3 mL heparinized plasma 	Amylase, AST, BUN, Creat, Ca, Chol, Cl, CO2, CPK, GGT, Glu, Lipase, Mg, Phos, Potassium, Sodium, TP, Trig, Uric Acid, GLDH	4-5 days	\$146.66
Basic Avian Chemistry Panel†	25001450	● GRNTT 0.2 mL heparinized plasma 	AST, Ca, Glu, TP, Uric Acid, CPK, Phos	4-5 days	\$109.40

Chemistry (cont'd)

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Adv Mammal Chem Panel†	25001438	● ● RTT, GRNTT 0.3 mL serum or heparinized plasma 	ALT, AlkPhos, BUN, Crea, Glu, Ca, Na, Phos, Potassium, Cl, Mg, TP, Alb, AST, Amylase, CPK, TBili, GGT	4-5 days	\$146.66
Basic Mammal Chemistry Panel†	25001451	● ● RTT, GRNTT 0.2 mL serum or heparinized plasma 	ALT, BUN, Crea, Glu, Phos, Ca, TP	4-5 days	\$109.40
Adv Reptile Chem Panel†	25001439	● GRNTT 0.3 mL heparinized plasma 	AlkPhos, Amy, Anion Gap, AST, BUN, CPK, Ca, Chol, Cl, CO2, GGT, Glu, K, Lipa, Mg, Na, Osmolality, Phos, TP, Trig, Uric Acid, GLDH	4-5 days	\$146.66
Basic Reptile Chemistry Panel†	25001453	● GRNTT 0.25 mL heparinized plasma 	AlkPhos, AST, CPK, Ca, Cl, GGT, Glu, K, Na, Phos, TP, Trig, Uric Acid	4-5 days	\$129.83
Bile Acids †	25001442	● GRNTT 0.1 mL heparinized plasma 		3-5 days	\$96.17
Elasmobranch Chemistry Panel†	25001456	● GRNTT 0.3 mL heparinized plasma 	Anion gap, AST, BUN, Ca, Chol, Cl, CO2, CPK, GGT, Glu, K, Mg, Na, Osmolality, Phos, TP, Trig, Uric Acid	4-5 days	\$140.65
Teleost Chemistry Panel†	25001466	● GRNTT 0.3 mL heparinized plasma 	Anion gap, AST, BUN, Ca, Chol, Cl, CO2, CPK, GGT, Glu, K, Mg, Na, Osmolality, Phos, TP, Trig, Uric Acid	3-5 days	\$140.65

Endocrinology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
T4, Total (Mammals Only)†	25001464	● GRNTT 0.1 mL heparinized plasma 		3-5 days	\$104.59

Microbiology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Sex Determination (Psittacine)†	25001539	● GRNTT 0.1 mL whole heparinized whole blood		7-10 days	\$84.15

Serology/Infectious Diseases

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Aspergillus Panel PLUS †	25001440	● GRNTT 0.3 mL heparinized plasma 	Antibody (both assays), EPH + Galactomannan, Gliotoxin	3-5 days	\$228.41
Aspergillus Panel – PenguinPLUS †	25001449	● GRNTT 0.3 mL heparinized plasma 	Hydroxybutyrate, EPH, Gliotoxin	4-5 days	\$174.31

Clinical Immunology

Test Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Protein Electrophoresis (EPH) †	25001446	GRNTT 0.1 mL heparinized plasma 		3-5 days	\$99.78

See the complete Directory of Services online at zoetisreflabs.com/DOS

PCR

Tests

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Adult Equine Diarrhea PCR Panel†	25001469	● Feces Minimum 2 g feces in a clean leakproof container	<i>Salmonella</i> spp, <i>Clostridium difficile</i> enterotoxin A, <i>Clostridium difficile</i> cytotoxin B, <i>Clostridium perfringens</i> type A, <i>Clostridium perfringens</i> type C, Equine coronavirus	5-7 days	\$223.58
Anaplasma/Ehrlichia PCR†	25001470	● LTT EDTA whole blood (minimum 0.5 mL)	All species of <i>Anaplasma</i> and <i>Ehrlichia</i>	3-5 days	\$105.79
Anemia PCR Panel, Canine†	25001471	● LTT EDTA whole blood (minimum 0.5 mL)	<i>Anaplasma/Ehrlichia</i> combo, <i>Babesia</i> spp, <i>Hepatozoon</i> spp, <i>Leptospira</i> spp, <i>Rickettsia</i> spp <i>Mycoplasma haemocanis</i> , <i>Mycoplasma haemoparvum</i>	5-7 days	\$196.61
Anemia PCR Panel, Feline†	25001472	● LTT EDTA whole blood (minimum 0.5 mL)	<i>Anaplasma</i> , <i>Bartonella</i> , <i>Cytauxzoon felis</i> , <i>Ehrlichia</i> , feline hemotropic <i>Mycoplasma</i> , FeLV, FIV	5-7 days	\$191.00
Babesia spp (genus) PCR†	25001473	● LTT EDTA whole blood (minimum 0.5 mL)		3-5 days	\$117.41
Bartonella spp (genus) PCR†	25001474	● LTT EDTA whole blood (minimum 0.5 mL), synovial fluid (minimum 0.25 mL)		3-5 days	\$117.41
Blood Bank Disease PCR Panel, Canine†	25001475	● LTT EDTA whole blood (minimum 0.5 mL)	<i>Anaplasma/Ehrlichia</i> combo, <i>Babesia</i> spp, <i>Hepatozoon</i> spp, <i>Rickettsia</i> spp, <i>Bartonella</i> spp, <i>Leishmania</i> spp, <i>Borrelia burgdorferi</i> , <i>Mycoplasma haemocanis</i> , <i>Mycoplasma haemoparvum</i>	5-7 days	\$224.70
Bordetella bronchiseptica PCR†	25001476	○ WTT Nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage, respiratory tissue		3-5 days	\$105.79

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Borrelia burgdorferi</i> (Lyme) PCR†	25001477	LTT EDTA whole blood (minimum 0.5 mL), synovial fluid (minimum 0.25 mL)		3-5 days	\$117.41
<i>Brucella</i> spp (genus) PCR†	25001478	WTT, LTT, YTT Fresh affected tissue, body fluids, swabs, EDTA whole blood (0.5 mL minimum), urine		3-5 days	\$124.15
<i>Campylobacteri coli</i> PCR†	25001480	Feces 1 g feces, fecal swab (two required) or GI tissue	Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	3-5 days	\$105.79
<i>Campylobacteri jejuni</i> PCR†	25001479	Feces 1 g feces, fecal swab (two required) or GI tissue.	Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	3-5 days	\$105.79
Canine Adenovirus PCR†	25001481	WTT, Culture swab Nasopharyngeal or conjunctival swab, transtracheal wash, feces, fresh affected tissue		3-5 days	\$105.79
Canine Puppy Diarrhea PCR w O&P, Giardia	25001623	Feces O&P: 3-5g fresh feces <i>Giardia</i> : 3g fresh feces Diarrhea Panel: 1 g feces, fecal swab (two required) or GI tissue.	Diarrhea Panel: Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	O&P & <i>Giardia</i> : Next day by 5 PM Diarrhea Panel: 5-7 days	\$113.31

See the complete Directory of Services online at zoetisreflabs.com/DOS

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Adult Canine Diarrhea PCR Panel†	25001618	Sterile leakproof container PREFERRED: Submit at least 1 g feces in a clean leak-proof container. Accepted: Fecal swab, please submit two.	<i>Campylobacter jejuni/coli</i> , <i>Salmonella spp.</i> , <i>Lawsonia intracellularis</i> , <i>Clostridium difficile</i> enterotoxin A, <i>Clostridium difficile</i> cytotoxin B, <i>Clostridium perfringens</i> enterotoxin, <i>Giardia intestinalis</i>	5-7 days	\$208.41
Canine Distemper Virus (CDV) PCR†	25001482	● LTT, Culture swab 0.5 mL EDTA whole blood (preferred), fresh tissue, CSF, nasopharyngeal swab, bronchoalveolar lavage or transtracheal wash		3-5 days	\$117.41
Canine Herpesvirus 1 (CHV-1) PCR†	25001483	Culture swab Fresh affected tissue (e.g. liver), nasopharyngeal or corneal swab		3-5 days	\$105.79
DNA Sequencing/ Identification	25001497				\$186.33
Canine Influenza PCR†	25001484	Culture swab Nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage, respiratory tissue	Influenza A subtypes	3-5 days	\$105.79
Canine Mycoplasma PCR†	25001485	Culture swab Nasopharyngeal swabs, nasal swab, transtracheal wash, bronchiolar lavage, respiratory tissue	<i>Mycoplasma canis</i> and <i>Mycoplasma cynos</i>	3-5 days	\$105.79
Canine Neurological Disease, Central Nervous System PCR Panel†	25001486	○ WTT/Sterile Container CSF- 500uL minimum or fresh tissue	<i>Toxoplasma gondii</i> , <i>Cryptococcus neoformans</i> , <i>Neospora caninum</i> , <i>Borrelia burgdorferi</i> (Lyme disease), Canine distemper virus (CDV)	3-5 days	\$177.32

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Canine Parvovirus (CPV) PCR†	25001487	● Feces 1 g feces, whole blood EDTA, fecal swab (two required) or GI tissue	Detects all CPV-2 subtypes. Additional testing is available to distinguish subtypes. Please call the laboratory for more information on CPV subtyping. This PCR is available as an individual test or as part of the Canine Diarrhea Panel. For parvovirus testing on cats, please see Feline panleukopenia PCR. Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	3-5 days	\$117.41
Canine Puppy Diarrhea PCR Panel†	25001488	● Feces 1 g feces, fecal swab (two required) or GI tissue	<i>Campylobacter jejuni/coli</i> , <i>Salmonella</i> spp, <i>Lawsonia intracellularis</i> , <i>Clostridium difficile</i> toxins A & B, <i>Clostridium perfringens</i> enterotoxin, <i>Giardia intestinalis</i> , Rotavirus, <i>Cryptosporidium</i> spp, Canine parvovirus, and coronavirus Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	5-7 days	\$214.59
Canine Reproductive/ Abortion PCR Panel†	25001489	Placenta, fetal tissue in a sterile, leakproof container 	<i>Brucella</i> spp, <i>Neospora caninum</i> , <i>Toxoplasma gondii</i> , Canine herpesvirus, <i>Leptospira</i> spp, <i>Mycoplasma</i> spp, <i>Ureaplasma</i> spp	5-7 days	\$164.69
Canine Respiratory PCR Panel†	25001490	Culture swab Affected tissue, deep nasal swab, needle aspirates, bronchoalveolar lavage	<i>Bordetella bronchiseptica</i> , <i>Mycoplasma canis</i> , <i>Mycoplasma cynos</i> , Canine adenovirus, Influenza A (all subtypes), Canine distemper virus, coronavirus, Canine parainfluenza virus, <i>Streptococcus zooepidemicus</i>	5-7 days	\$208.41
<i>Chlamydia</i> spp (genus) PCR†	25001491	For CATS: corneal scraping, eye/corneal swab. For AVIAN species: choanal/cloacal swab. For CATTLE: vaginal scraping		3-5 days	\$105.79
<i>Chlamydophila felis</i> PCR†	25001492	Culture swab Corneal scraping, corneal or conjunctival swab, fresh affected tissue		3-5 days	\$105.79

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Comprehensive (PCR and Serology) Vector Panel, Canine†	K9FCOMP	● ● RTT, LTT 2 mL serum in RTT AND 2 mL whole blood in LTT 	<i>Babesia canis</i> , <i>B gibsoni</i> , <i>E canis</i> , <i>R rickettsia</i> (RMSF), <i>Bartonella henselae</i> , <i>B vinsonii</i> , <i>B koehlerae</i> (by IFA); Lyme, <i>Anaplasma</i> , <i>Ehrlichia</i> , and heartworm (by rapid assay); PCR for <i>Babesia</i> , <i>Bartonella</i> , <i>Anaplasma</i> , <i>Ehrlichia</i> , <i>Rickettsia</i> , and hemotropic <i>Mycoplasma</i> organisms	10 days	\$312.20
Comprehensive (PCR and Serology) Vector Panel, Feline†	FELVECTPNL	● ● RTT, LTT 2 mL serum AND 2 mL EDTA whole blood 	<i>Bartonella henselae</i> , <i>B vinsonii</i> , <i>B koehlerae</i> (by IFA); <i>Borrelia</i> (Lyme), <i>Anaplasma</i> , <i>Ehrlichia</i> , and heartworm (by rapid assay); PCR for <i>Babesia</i> , <i>Bartonella</i> , <i>Cytauxzoon</i> , <i>Anaplasma</i> , <i>Ehrlichia</i> , <i>Rickettsia</i> , and hemotropic <i>Mycoplasma</i> organisms	7-10 days	\$305.77
Coronavirus – Pan/Consensus PCR†	25001493	● ● Feces, LTT Feces, fecal swab, GI tissue, effusion, EDTA whole blood (0.5 mL minimum), or airway specimens	Universal coronavirus detection	3-5 days	\$106.73
<i>Cryptococcus neoformans</i> PCR†	25001494	Culture swab Swab of affected tissue, needle aspirates, airway wash fluid, effusion, or CSF	Swabs of affected tissue, deep nasal passages, or needle aspirates applied to swabs should be submitted in a sterile, no additive tube.	3-5 days	\$105.79
<i>Cryptosporidium</i> spp (genus) PCR†	25001495	● Feces 1 g feces, fecal swab (two required) or GI tissue.	Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	3-5 days	\$117.41
<i>Cytauxzoon felis</i> PCR †	25001496	● LTT EDTA whole blood (minimum 0.5 mL)		3-5 days	\$105.79
<i>Ehrlichia</i> spp (genus) PCR†	25001498	● LTT EDTA whole blood (minimum 0.5 mL), spleen		3-5 days	\$117.41
<i>Encephalitozoon cuniculi</i> PCR†	25001499	● ● RTT, YTT As indicated: kidney (fresh or frozen) or phacoemulsified lens material in sterile, no- additive container or urine in YTT/sterile, leakproof container		3-5 days	\$105.79

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Equine Abortion/ Reproduction PCR Panel†	25001500	● RTT, Culture swab Preputial wash, vaginal swab, vaginal wash, vaginal tissue, fetal tissue, abomasum, placenta	<i>Bartonella</i> spp, <i>Candida albicans</i> , Equine arteritis virus, EHV1, EHV4, <i>Leptospira</i> spp, <i>Salmonella enterica</i> , <i>Streptococcus equi</i> subsp <i>zooepidemicus</i>	5-7 days	\$174.31
Equine Foal Diarrhea PCR Panel†	25001501	● Feces Feces, GI tissue. Minimum 2 g feces in a clean leakproof container	<i>Salmonella</i> spp, <i>Clostridium difficile</i> enterotoxin A, <i>Clostridium difficile</i> cytotoxin B, <i>Clostridium perfringens</i> type A, <i>Clostridium perfringens</i> Type C, rotavirus, coronavirus	5-7 days	\$203.77
Equine Herpes Virus type 1 PCR†	25001502	● LTT, Culture swab EDTA whole blood, nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage, respiratory tissue		3-5 days	\$105.79
Equine Herpes Virus type 4 PCR†	25001503	● LTT, Culture swab EDTA whole blood, nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage, respiratory tissue		3-5 days	\$105.79
Equine Influenza PCR†	25001504	Culture swab Nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage, respiratory tissue	Influenza type A	3-5 days	\$106.73

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Equine Respiratory PCR Panel II†	25001506	Culture swab Nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage, respiratory tissue	EHV 1, EHV 4, Influenza Type A, <i>Streptococcus equi</i> subsp <i>equi</i> , Equine arteritis virus, Equine rhinitis virus A and B	5-7 days	\$193.24
Equine Tickborne Disease PCR Panel†	25001507	● LTT EDTA whole blood (minimum 0.5 mL), tissue	<i>Anaplasma</i> spp, <i>Ehrlichia</i> spp, <i>Borrelia burgdorferi</i> , <i>Rickettsia</i> spp, <i>Bartonella</i> spp, <i>Hepatozoon</i> spp, If Equine Piroplasmosis (<i>Babesia caballi</i> , <i>Theileria equi</i>) is suspected specimens must be submitted to USDA NVSL for testing.	5-7 days	\$171.90
Eubacteria Universal DNA – 16S rRNA PCR†	25001508	● RTT, Culture swab Affected tissue or body fluids, bacterial isolate	Universal Bacterial PCR	3-5 days	\$105.79
Feline Calicivirus PCR†	25001509	Culture swab Conjunctival swab, oropharyngeal swab, nasopharyngeal swab		3-5 days	\$105.79
Feline Coronavirus PCR†	25001510	● LTT 0.5 mL EDTA whole blood	Test for FIP diagnosis, pan-coronavirus PCR	3-5 days	\$106.73
Feline Diarrhea PCR Panel†	25001511	● Feces 1 g feces, fecal swab (two required) or GI tissue	<i>Campylobacter jejuni/ coli</i> , <i>Salmonella</i> spp, <i>Clostridium difficile</i> enterotoxin A, <i>Clostridium difficile</i> cytotoxin B, <i>Clostridium perfringens</i> enterotoxin, Feline parvovirus (Panleukopenia), <i>Trichomonas foetus</i> , coronavirus Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	5-7 days	\$190.44

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Feline Diarrhea PCR[†] with O&P, <i>Giardia</i>	25001626	● Feces - O&P: 3-5g fresh feces <i>Giardia</i>: 3g fresh feces - Diarrhea Panel: 1 g feces, fecal swab (two required) or GI tissue 	Feline PCR Diarrhea Panel, Ova and Parasite, and <i>Giardia</i> antigen ELISA Diarrhea Panel: Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	O&P & <i>Giardia</i> : Next day by 5 PM Diarrhea Panel: 5-7 days	\$123.65
Feline Hemotropic (blood) <i>Mycoplasma</i> PCR[†]	25001512	● LTT EDTA whole blood (minimum 0.5 mL), spleen	<i>Mycoplasma haemofelis</i> and <i>Mycoplasma haemominutum</i>	3-5 days	\$106.73
Feline Herpes and <i>Chlamydomphila felis</i> PCR Combo[†]	25001513	Culture swab Corneal or conjunctival scraping, conjunctival swab, oronasal swab		3-5 days	\$111.23
Feline Herpesvirus PCR[†]	25001514	Culture swab Corneal scraping, oropharyngeal, nasopharyngeal, or conjunctival swab		3-5 days	\$117.41
Feline Immunodeficiency Virus FIV PCR[†]	25001515	● LTT 0.5 mL EDTA whole blood or bone marrow		3-5 days	\$117.41
Feline Leukemia Virus (FeLV) PCR[†]	25001516	● LTT 0.5 mL EDTA whole blood or bone marrow		3-5 days	\$117.41
Feline Neurological Disease PCR Panel[†]	25001517	CSF (0.5 mL minimum) or fresh tissue	<i>Toxoplasma gondii</i> , <i>Cryptococcus neoformans</i> , Feline infectious peritonitis virus (FIP), Feline panleukopenia virus (FPV), Feline immunodeficiency virus (FIV)	3-5 days	\$202.23

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
Feline Ocular PCR Panel†	25001518	Culture swab Corneal or conjunctival scraping, conjunctival swab, oronasal swab	Feline herpesvirus, <i>Chlamydomphila felis</i> , Feline calicivirus	5-7 days	\$132.85
Feline Panleukopenia (Parvovirus) PCR†	25001519	●● LTT, Feces As indicated: Fecal swab, feces or GI tissue in sterile, leakproof container, or 0.5 mL EDTA whole blood		3-5 days	\$117.41
Feline Respiratory PCR Panel 1†	25001520	As indicated: nasal swab, oropharyngeal swab, airway wash fluid or fresh respiratory tissue in a sterile, leakproof container.	Feline herpesvirus, <i>Chlamydomphila felis</i> , <i>Bordetella bronchiseptica</i> , <i>Mycoplasma</i> spp, Influenza A, Feline calicivirus	5-7 days	\$201.11
Fever of Unknown Origin PCR Panel, Canine†	25001521	●● RTT, LTT EDTA whole blood (minimum 0.5 mL), affected tissues	<i>Anaplasma/Ehrlichia</i> combo, <i>Babesia</i> spp, <i>Bartonella</i> spp, <i>Brucella</i> spp, <i>Hepatozoon</i> spp, <i>Leptospira</i> spp, <i>Neospora caninum</i> , <i>Rickettsia</i> spp, <i>Toxoplasma gondii</i> , <i>Trypanosoma cruzi</i> , <i>Leishmania</i> spp	5-7 days	\$214.59
Fever of Unknown Origin PCR Panel, Feline†	25001522	●● LTT, Feces, AND oral/nasal/ocular swab 0.5 mL EDTA whole blood, oral/nasal/ocular swab AND fecal swab or feces in sterile, leakproof container	<i>Anaplasma/Ehrlichia</i> combo, <i>Bartonella</i> spp, <i>Cryptococcus neoformans</i> , <i>Cytauxzoon felis</i> , Feline calicivirus, Feline pan-coronavirus, <i>Mycoplasma haemofelis</i> , <i>Mycoplasma haemominutum</i> , Feline panleukopenia virus, FeLV, FIV, <i>Salmonella enterica</i> , <i>Toxoplasma gondii</i>	4-7 days	\$252.79
Francisella tularensis (Tularemia) PCR†	25001523	● LTT Fresh tissue (liver, spleen, lymph node), EDTA whole blood (0.5 mL minimum), respiratory secretions		3-5 days	\$106.73
Fungal Sequencing and PCR on Tissue Block†	FUNGSEQPCR	One paraffin block and two unstained slides		21 days	\$393.28

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Giardia intestinalis</i> PCR†	25001524	● Feces 1 g feces, fecal swab (two required) or GI tissue	Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	3-5 days	\$105.79
<i>Helicobacter</i> spp (genus) PCR†	25001525	● Feces 1 g feces, fecal swab (two required) or GI tissue	Submit feces in a clean, leakproof container. Use sterile swab for fecal swab. Submit fecal swab or GI tissue in sterile, no additive tube.	3-5 days	\$117.41
<i>Leishmania</i> spp (genus) PCR†	25001526	● LTT Preferred samples include skin lesion, bone marrow, lymph node aspirates, conjunctival swabs, spleen (fresh tissue), and EDTA whole blood (0.5 mL minimum).		3-5 days	\$105.79
<i>Leptospira</i> MAT, 5 Serovar & PCR†	6163	● ● RTT, LTT For MAT 0.5 mL serum in RTT; For PCR: 3 mL Urine; OR 1 mL EDTA whole blood (LTT); OR 1 gm tissue (e.g., kidney and/or liver); OR 1 mL aqueous humor; OR 0.5 mL CSF	Detection of antibodies to <i>Leptospira interrogans</i> serovars <i>pomona</i> , <i>hardjo</i> , <i>icterohaemorrhagiae/copenhageni</i> , <i>grippityphosa</i> , and <i>canicola</i>	Up to 10 days	\$154.77
<i>Leptospira</i> spp (genus) PCR†	25001527	● ● LTT, YTT 0.5 mL EDTA whole blood and/or urine. As indicated: fresh kidney, liver, placenta or fetal tissue in a sterile, leakproof container. 	For increased diagnostic sensitivity please send both Blood and Urine. Whole blood is the recommended sample during week 1 of infection. Urine is recommended later in infection. Note: blood and urine cannot be pooled. Additional charges incurred if both urine and blood are submitted for analysis.	3-5 days	\$106.73
<i>Listeria</i> spp (genus) PCR†	25001528	Culture swab Brain (fresh), CNS swab, CSF (minimum 0.5 mL)		3-5 days	\$105.79

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Mycobacterium</i> spp (genus) PCR†	25001529	Culture swab Affected tissue preferred, body fluids, swabs, feces, bacterial isolate		3-5 days	\$117.21
<i>Mycoplasma</i> spp (genus) PCR†	25001530	● LTT, Culture swab Affected tissue, body fluids, or swabs from affected sites		3-5 days	\$105.79
<i>Neospora caninum</i> PCR†	25001531	● ● LTT, Feces As indicated: 0.5 mL EDTA whole blood, 0.5 mL CSF, or feces or fresh tissue (brain, fetus) in a sterile, leakproof container		3-5 days	\$105.79
<i>Nocardia</i> spp (genus) PCR†	25001532	Culture swab Fresh tissue, swabs from affected sites		3-5 days	\$105.79
Pan-Fungal PCR†	25001533	Culture swab Affected fresh tissue, fluids, swab	Detects presence of fungal or yeast organism but does not speciate. Further identification is achieved through Sanger sequencing of the PCR amplicon.	3-5 days	\$106.73
PCR Formalin-Fixed Paraffin Embed Tissue†	25001534	Formalin fixed paraffin embedded tissue. Please submit 2-3 sliced scrolls in 1.5 mL micro-centrifuge tube.		3-5 days	\$93.18
<i>Rhodococcus equi</i> PCR†	25001535	● ● LTT, Feces, Culture swab Fresh tissue, nasal or oropharyngeal swab, transtracheal wash, bronchiolar lavage, feces, EDTA whole blood (minimum 0.5 mL)		3-5 days	\$117.41

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Rickettsia</i> spp (genus) PCR†	25001536	● LTT EDTA whole blood (minimum 0.5 mL), fresh tissue		3-5 days	\$105.79
Ringworm, PCR, Canine/Feline†	25001616	Sterile leakproof container Lesion biopsy, lesion swab, or plucked hairs that include roots and attached epithelial cells	<i>Microsporum canis</i> , <i>Trichophyton mentagrophytes</i> (<i>Dermatophytosis</i>)	3-5 days	\$161.09
Ringworm, PCR, Equine†	25001617	Sterile leakproof container Lesion biopsy, lesion swab, or plucked hairs that include roots and attached epithelial cells	<i>Trichophyton mentagrophytes</i> (<i>Dermatophytosis</i>)	3-5 days	\$110.60
<i>Salmonella enterica</i> PCR†	25001537	● Feces Minimum 2 g feces in a clean leakproof container.		3-5 days	\$106.73
SARS-COV-2 PCR†	25001538	● Feces, Culture swab Nasal swab (preferred), feces		3-5 days	\$196.56
<i>Strep equi</i> subsp. <i>zooepidemicus</i> PCR†	25001541	Culture swab Nasal swab, lung tissue, lymph node		3-5 days	\$105.79
<i>Streptococcus equi</i> subsp. <i>equi</i> PCR†	25001540	As indicated: Culture swab, nasal swab, or guttural pouch lavage fluid, lung tissue or lymph node in a sterile, leakproof container.		3-5 days	\$106.73
Tickborne Disease PCR Panel Non-equine†	25001542	● LTT EDTA whole blood (minimum 0.5 mL), Fresh tissue	<i>Anaplasma</i> spp, <i>Ehrlichia</i> spp, <i>Borrelia burgdorferi</i> , <i>Rickettsia</i> spp, <i>Babesia</i> spp, <i>Bartonella</i> spp, <i>Hepatozoon</i> spp, <i>Theileria</i> spp	5-7 days	\$183.70

Tests (cont'd)

Name	Test Code	Sample Requirements	Components / Notes	TAT	Price
<i>Toxoplasma gondii</i> PCR†	25001543	● LTT, Feces Fresh tissue, urine, feces, EDTA whole blood (minimum 0.5 mL)		3-5 days	\$106.73
<i>Tritrichomonas foetus</i> PCR†	25001544	● Feces, Culture swab Preputial wash, vaginal scraping, cat feces		3-5 days	\$106.73
<i>Trueperella pyogenes</i> PCR†	25001545	Culture swab Nasopharyngeal swab, transtracheal wash, bronchoalveolar lavage (BAL), respiratory tissue, abscess, other affected tissues		3-5 days	\$105.79
<i>Trypanosoma cruzi</i> PCR†	25001546	● LTT EDTA whole blood (minimum 0.5 mL)		3-5 days	\$105.79
<i>Ureaplasma</i> spp (genus) PCR†	25001547	Culture swab Reproductive tissue or swabs. Respiratory washes, tissue or swabs		3-5 days	\$105.79
Uveitis PCR Panel, Feline†	25001548	Culture swab Aqueous fluid, vitreous fluid, corneal scraping, conjunctival swab	<i>Toxoplasma gondii</i> , <i>Feline herpesvirus</i> , pan-coronavirus, <i>Cryptococcus neoformans</i> , <i>Bartonella</i> spp, FeLV, FIV	5-7 days	\$168.30
<i>Yersinia enterocolitica</i> PCR†	25001549	● Feces Minimum 2 g feces or GI tissue in a clean leakproof container		3-5 days	\$105.79

Policies

Policies

Species Policy

In order to maintain our high quality standards, we accept samples for core testing (hematology, chemistry, endocrinology, urinalysis) from only the following species: dogs, cats, horses and other domestic hoofstock (cattle, sheep, goats, pigs, llamas, alpacas), rabbits, and ferrets. Exotic species samples are accepted, but are generally analyzed at a third-party specialty laboratory.

For microbiology and parasitology testing, we accept samples from all species, except non-human primates.

For cytopathology, air-dried slides are accepted from all species. Liquid samples are accepted for all species except non-human primates.

For histopathology, formalin-fixed samples can be accepted from any species. Non-formalin fixed (fresh) whole bodies, heads, and spinal cords are not accepted from any species.

Fresh, non-fixed samples from non-human primates will not be accepted for any test. For these species, tissue for histopathology must be formalin-fixed and slides for cytopathology must be air-dried or alcohol-fixed.

Samples from species that fall outside of this policy will be returned to you or will be sent to a third party laboratory with associated charges applied.

.....

Add-on Tests

We make it easy to add tests to samples you’ve already submitted. Simply call customer service at **1-888-965-9652**.

Or, if you order your tests electronically, you can add a test through ZoetisDx or via PIMS.

Sample Retention

After testing is completed, we retain biological specimens as follows:

Item	Retention time
Non-fixed biologic specimens (eg, blood, urine, feces)	1 week
EXCEPTION: citrated plasma in -20°C	2 weeks
Blood smears	3 months
Cytology slides	6 months
Histopathology specimens – wet tissues	1 month
Histopathology specimens – FFPE (formalin-fixed paraffin-embedded) tissues	Minimum 3 years
Histopathology slides	Minimum 3 years

You agree that Zoetis will own and may use for any purpose all data collected in connection with this transaction once such data has been either (i) rendered anonymous in such a way that Your identity is not or is no longer identifiable (“anonymized”) or (ii) changed, transformed, re-arranged or otherwise manipulated into a usable and desired form (“transformed”). Zoetis and its affiliates may use all collected data which has not been anonymized or transformed for internal business purposes, as described in Zoetis’ Privacy Policy available at zoetis.com/privacy-policy.

If applicable, you agree that you have the right to submit all specimens, animals, and/or biological materials, and photographs and/or documentation thereof (collectively “Specimens”) submitted to the applicable Zoetis Reference Lab (“ZRL”) location, and you transfer such right(s) to the Specimens to ZRL. Any test results, diagnoses, or other analyses produced by ZRL resulting from these submissions will become the property of Zoetis; provided, however, that ZRL shall not disclose such information in a manner that identifies you, unless specifically required by state or federal agencies. Specimens may be used for research, teaching and commercial purposes. Specimens will not be returned unless specific arrangements are made, at your expense, in advance of ZRL’s receipt.

Policies (cont'd)

Compromised/Suboptimal Samples

Samples that cannot be processed in a manner that upholds our quality standards may require additional attention or, in some cases, may be rejected. In the event that we receive such a sample, we will attempt to contact you. Examples of suboptimal samples include: lack of clear patient identifying information, damaged or leaking containers, inadequate volume for testing, incorrectly preserved samples, and contaminated samples.

Employee Pet Testing Program

We want to reward you for being a loyal customer of Zoetis Reference Laboratories. That's why we created our Employee Pet Testing Program.

Eligible customers can receive up to 10% of their monthly spend in free employee testing. For example, if a customer spends \$3,000 per month in Zoetis Reference Laboratories tests, they are eligible to receive \$300 in employee pet testing.

Any amount of Employee Pet testing sent in that exceeds 10% of their spend will be billed fully.

All existing customers who are eligible and meet the criteria will be automatically able to participate in this program. Any new Zoetis Reference Laboratories customers will be automatically enrolled in the program for 90 days.

Customers can indicate that a test is for a staff pet by checking a box on the printed PIMS form labeled "Employee Pet."

Who is eligible?

- Any new or existing customer who spends a minimum of \$2,000 per month with Zoetis Reference Laboratories. If a customer's monthly spend drops below \$2,000, they are dropped from the eligibility list the following month.
 - OptimizeDx customers are not eligible.
-

How to Make a Payment

To view invoices and statements or pay online, go to: www.zoetisus.com/billpay

For Zoetis Reference Laboratories billing questions, call **1-888-965-9652**.

Processing & Handling Fee Policy

At Zoetis, it is a priority to provide our valued customers with pricing transparency. A monthly \$55.00 fee will be applied to customer accounts spending \$500 or less per month with Zoetis Reference Laboratories.

If you have questions about this fee, please reach out to your Zoetis representative or contact customer service. You can also ask them for more information about programs that can help you avoid the monthly fee.

Zoetis Terms & Privacy

Zoetis values your trust and respects your privacy. The resources on this link will help you understand how we use your personal information and how you can manage your privacy choices.

To view the full Zoetis Privacy Policy, visit <https://www.zoetis.com/privacy-center>.

Zoetis Reference Laboratories – Test Cancellation Policy

At Zoetis Reference Laboratories, we understand that circumstances may arise where a test needs to be canceled. To ensure clarity and consistency, we have established the following cancellation policy:

Who is eligible?

- If the testing process has not yet begun: The test is eligible for cancellation.
- If the testing process has already begun: The test is not eligible for cancellation.

Cancellation Process

To cancel a test, customers must contact Zoetis Reference Laboratories Customer Service at 1-888-965-9652 directly by phone.

Definition of Testing Process: The testing process is considered to have begun once the order has been received at the laboratory.

Alphabetical Test Listing

Canine & Feline Test Listing

#

2M Antibody Masticatory Muscle Myositis [†] 6403	84
17-Hydroxyprogesterone, Pre & Post-(ACTH Stim) [†] 17HPROG	59

A

Acetylcholine Receptor Antibody/Myasthenia Gravis [†] 6402	84
Acid-Fast Stain ACIDFAST	68
ACTH Stimulation (2 samples) 6100	58
ACTH Stimulation (3 samples) 6101	58
Adrenal Panel (with ACTH Stimulation), Canine/Feline [†] ACTHADR	59
Aerobic and Anaerobic Culture 7135	67
Aerobic Culture 7156	67
Albumin 1001	51
Aldosterone Baseline [†] ALDOS	59
Aldosterone Pre & Post [†] ALDOSPOST	59
Allergy Panel, Canine/Feline [†] 25001385	84
ALP (Alk Phos) 1003	52
ALT 1002	51
Amylase (Mich. State Univ.) [†] 1004	62
Anaerobic Culture 7157	67
Anaerobic ID Add-on A7157	89
<i>Anaplasma phagocytophilum</i> (IFA) ANATITER	73
Anticoagulant (Rodenticide) [†] ANTICOAG	77

Anti-Müllerian Hormone [†] 5555	60
Anti-Nuclear Antibody (IFA) ANA	84
Anti-Platelet Flow Cytometry, Canine [†] PBA	43
Antithrombin (AT3) [†] ANTTHRO3	40
<i>Aspergillus</i> Galactomannan Antigen EIA [†] ASPGUR	74
<i>Aspergillus</i> Titer AGID [†] ASP	73
AST 1005	52
Australia Export Completion Panel [†] AUSECPN	73

B

<i>Babesia</i> Blood Smear [†] BABBLDSMR	46
<i>Babesia</i> IFA [†] BABESIAIFA	76
Baermann Test (Lungworm) BAER	65
<i>Bartonella</i> IFA [†] 6025	74
Basic CBC, Canine/Feline (Healthy, Non-geriatric) 2000	39
Bile Acid Pre/Resting Add-on A6180	89
Bile Acids Post 6181	50
Bile Acids Pre/Resting 6180	50
<i>Blastomyces</i> Quantitative Antigen EIA [†] BLASTANT	70
Blood Culture 7150	68
Blood Lead [†] 6240	78
Blood Typing BLTYP	40
<i>Borrelia</i> (Lyme) (Western Blot) LYMEWB	73

Canine & Feline Test Listing (cont'd)

Bromide 1025	77
<i>Brucella canis</i> Culture† BRUCLCULT	68
<i>Brucella canis</i> Slide AGGL/AGID II† 6315	73
<i>Brucella canis</i> IFA BRUCIFA	73
Buffy Coat 6295	44
BUN 1006	52
C	
Calcium (Total Calcium) 1008	52
Canine Adenovirus Type 1 Antibody (VN)† K9ADNE1	75
Canine C-reactive Protein (CRP)† CRP	51
Canine Diarrhea PCR† with O&P, <i>Giardia</i> 25001623	37
Canine Distemper Virus Titer (Cornell)† DISTEMP	74
Canine Influenza Virus Titer† K9FLUAB	76
Canine Parvovirus Fecal Test 60002	76
Carnitine† CARNITINE	88
Centrifugal Fecal Flotation Test (O&P) & McMaster (Fecal Egg Counting) Test 25000487	65
Centronuclear Myopathy† CNM	86
Chloride 1007	52
Cholesterol 1009	52
C-Kit Mutation Assay† 6541	81
ClinChem 18 CHEM18	49
ClinChem 18 with SDMA 25001624	49

ClinChem 25 1000	49
ClinChem 25 with SDMA 25001625	49
Clotting Factor FIX† FACTORIX	45
Clotting Factor FVIII† FACTORVIII	46
Clotting Factor FXII† FACTORXII	46
Clotting Factor X† FACX	46
CO2 1020	53
Coagulation Panel and Fibrinogen, Canine/Feline† 25001390	47
Coagulation Panel, Canine/Feline (Cornell)† COAGFA	45
Cobalamin and Folate KFCOFO	63
Cobalamin (Vitamin B12) 6207	63
<i>Coccidioides</i> Antibody Screening Test 25001690	70
<i>Coccidioides</i> Titer AGID† 6129	70
<i>Coccidioides</i> Titer AGID Add-on A6129	91
Complete Amino Acid Profile† COMPAA	84
Complete Muscle Profile† CM	82
Comprehensive CBC, Canine/Feline CBCC	39
Comprehensive CBC Upgrade (add to core panel) CBCCUP	39
Comprehensive (PCR and Serology) Vector Panel, Canine† K9FCOMP	74
Comprehensive (PCR and Serology) Vector Panel, Feline† FELVECTPNL	76
Congenital (CKCS) Macrothrombocytopenia† CKCSMACRO	86
Copper, Zinc, Iron Levels on Hepatic Tissue† COPZNCIRON	82
Core Vaccine Titer Panel (includes Rabies, non-export), Canine† 6160	72

Canine & Feline Test Listing (cont'd)

Corticosteroid-Induced Alk Phos (CIALP) [†] CIALP	51
Cortisol Add-on A5101	90

Ova and Parasite (Centrifugal Fecal Flotation) Test 2320A	110

P

Parathyroid Hormone-Related Protein (PTHrP)† PTHRP	109
Pathologist Review PATH	97
Phosphorus 1017	102
Potassium 1018	102
Potomac Horse Fever (<i>Neorickettsia risticii</i>) IFA† POTOMAC	116
Pregnancy Panel, Equine† 25001387	107
Pregnant Mare Serum Gonadotropin (PMSG)† 25001388	107
Progesterone 5105	105
Protein C† PROC	98
Protein Electrophoresis 6345	122

PT & aPTT 4101	98
----------------------------------	----

<i>Pythium</i> Serology† OOPYTHIUM	115
--	-----

Q

Quantitative Copper (Blood or Tissue)† 6171	117
---	-----

R

Reflex Aerobic Culture (Contingent) 25000536	111
Reproductive Hormone Panel† RHP	107
Reticulocyte RETIC	97
Reticulocyte Count Add-on 25000525	125
<i>Rhodococcus equi</i> ELISA† RHODOCOCCUS	116

S

<i>Sarcocystis neurona</i> by Western Blot† SNEURONA	115
Selenium† SELENIUM	123
Selenium and Trace Elements Screen† SELETREL	117
Serum Amyloid A (SAA), Equine† SAA	100
Skin Culture and Sensitivity (Dermatology) 25001434	113
Sodium 1019	102
<i>Streptococcus equi</i> ELISA† STREPEQUI	116

T

Technician Blood Smear Review SMREV	97
Testosterone, Baseline† TESTOS	108

Large Animal Test Listing (cont'd)

Testosterone Post-HCG/GnRH [†] TESTPOST	108
Thiamine (Vitamin B1) [†] THIAMINE	123
Thyroid Panel EQTHYROID	105
Total Bilirubin 1021	103
Total Protein 1022	103
Total T3 (TT3), Equine TT3	105
Total T4 5102	105
Total T4 Add-on A5102	125
Toxic Heavy Metal Panel [†] 25001395	118
Trace Element Screen [†] TMINPAN	123
TRH Stimulation Test for Equine Cushing's/PPID 2222	106
Triglycerides 1023	103
Triglycerides Add-on A1023	125

U

Urinalysis 3000	104
Urinalysis Add-on 25001700	126
Urinalysis with Reflex UPC 25000521	104
Urinalysis with Reflex UPC upgrade 25001702	104
Urine Culture and Sensitivity 7140	111
Urine Electrolyte Panel (for Fractional Excretion) [†] FREXCRE	104
Urine Protein:Creatinine Ratio 1555	104
Urine Protein:Creatinine Ratio Add-on A1555	126

V

Vitamin A [†] VITA	124
Vitamin D (25-hydroxyvitamin D3) [†] VITD	107
Vitamin D Profile [†] VITP	109
Vitamin E [†] 2331	123
Vitamin E and Mineral Panel [†] VITEMINE	123

W

West Nile Virus IgM ELISA [†] WESTNILE	116
---	-----

Z

Zinc, Serum/Plasma [†] ZINC	117
--	-----

Avian, Exotic & Small Mammal Test Listing

A

Advanced Reptile Panel† 25001448	128
Adv Avian Chem Panel† 25001437	130
Adv Mammal Chem Panel† 25001438	131
Adv Reptile Chem Panel† 25001439	131
Aspergillus Panel – PenguinPLUS † 25001449	132
Aspergillus Panel PLUS † 25001440	132

B

Basic Avian Chemistry Panel† 25001450	131
Basic Mammal Chemistry Panel† 25001451	131
Basic Mammal Panel† 25001452	128
Basic Reptile Chemistry Panel† 25001453	131
Basic Reptile Panel† 25001454	128
Bile Acids † 25001442	131

C

CBC Automated Count Manual Diff Mammal† 25001443	130
CBC Hemocytometer Cnt Man Diff Reptile† 25001444	129

E

Elasmobranch CBC and Diff† 25001455	129
Elasmobranch Chemistry Panel† 25001456	131

F

Fibrinogen Heat Precipitation Method† 25001457	129
--	-----

L

Lipoprotein Chemistry Panel† 25001458	130
---	-----

M

Mini Avian Panel † 25001459	129
Mini Elasmobranch Panel† 25001460	129
Mini Mammal Panel† 25001461	130
Mini Reptile Panel† 25001462	129
Mini Teleost Panel† 25001463	130

P

Protein Electrophoresis (EPH) † 25001446	133
--	-----

R

Reptile CBC and Diff† 25001447	129
----------------------------------	-----

S

Sex Determination (Psittacine)† 25001539	132
--	-----

T

T4, Total (Mammals Only)† 25001464	132
Teleost CBC and Diff† 25001465	130
Teleost Chemistry Panel† 25001466	131

Avian, Exotic & Small Mammal Test Listing (cont'd)

Vitamin D (25-Hydroxy) Mammals Only† | 25001467 133

W

Well Bird Panel Package† | 25001468 128

PCR Test Listing

A

Adult Canine Diarrhea PCR Panel† 25001618	137
Adult Equine Diarrhea PCR Panel† 25001469	135
<i>Anaplasma/Ehrlichia</i> PCR† 25001470	135
Anemia PCR Panel, Canine† 25001471	135
Anemia PCR Panel, Feline† 25001472	135

B

<i>Babesia</i> spp (genus) PCR† 25001473	135
<i>Bartonella</i> spp (genus) PCR† 25001474	135
Blood Bank Disease PCR Panel, Canine† 25001475	135
<i>Bordetella bronchiseptica</i> PCR† 25001476	135
<i>Borrelia burgdorferi</i> (Lyme) PCR† 25001477	136
<i>Brucella</i> spp (genus) PCR† 25001478	136

C

<i>Campylobacteri coli</i> PCR† 25001480	136
<i>Campylobacteri jejuni</i> PCR† 25001479	136
Canine Adenovirus PCR† 25001481	136
Canine Puppy Diarrhea PCR w O&P, Giardia 25001623	136
Canine Distemper Virus (CDV) PCR† 25001482	137
Canine Herpesvirus 1 (CHV-1) PCR† 25001483	137
Canine Influenza PCR† 25001484	137
Canine Mycoplasma PCR† 25001485	137

Canine Neurological Disease, Central Nervous System PCR Panel† 25001486	137
Canine Parvovirus (CPV) PCR† 25001487	138
Canine Puppy Diarrhea PCR Panel† 25001488	138
Canine Reproductive/Abortion PCR Panel† 25001489	138
Canine Respiratory PCR Panel† 25001490	138
<i>Chlamydia</i> spp (genus) PCR† 25001491	138
<i>Chlamydophila felis</i> PCR† 25001492	138
Comprehensive (PCR and Serology) Vector Panel, Canine† K9FCOMP	139
Comprehensive (PCR and Serology) Vector Panel, Feline† FELVECTPNL	139
Coronavirus - Pan/Consensus PCR† 25001493	139
<i>Cryptococcus neoformans</i> PCR† 25001494	139
<i>Cryptosporidium</i> spp (genus) PCR† 25001495	139
<i>Cytauxzoon felis</i> PCR † 25001496	139

E

<i>Ehrlichia</i> spp (genus) PCR† 25001498	139
<i>Encephalitozoon cuniculi</i> PCR† 25001499	139
Equine Abortion/Reproduction PCR Panel† 25001500	140
Equine Foal Diarrhea PCR Panel† 25001501	140
Equine Herpes Virus type 1 PCR† 25001502	140
Equine Herpes Virus type 4 PCR† 25001503	140
Equine Influenza PCR† 25001504	140
Equine Respiratory PCR Panel I† 25001505	140

PCR Test Listing (cont'd)

Equine Respiratory PCR Panel II [†] 25001506	141
Equine Tickborne Disease PCR Panel [†] 25001507	141
Eubacteria Universal DNA - 16S rRNA PCR [†] 25001508	141

F

Feline Calicivirus PCR [†] 25001509	141
Feline Coronavirus PCR [†] 25001510	141
Feline Diarrhea PCR Panel [†] 25001511	141
Feline Diarrhea PCR [†] with O&P, <i>Giardia</i> 25001626	142
Feline Hemotropic (blood) <i>Mycoplasma</i> PCR [†] 25001512	142
Feline Herpes and <i>Chlamydomphila felis</i> PCR Combo [†] 25001513	142
Feline Herpesvirus PCR [†] 25001514	142
Feline Immunodeficiency Virus FIV PCR [†] 25001515	142
Feline Leukemia Virus (FeLV) PCR [†] 25001516	142
Feline Neurological Disease PCR Panel [†] 25001517	142
Feline Ocular PCR Panel [†] 25001518	143
Feline Panleukopenia (Parvovirus) PCR [†] 25001519	143
Feline Respiratory PCR Panel 1 [†] 25001520	143
Fever of Unknown Origin PCR Panel, Canine [†] 25001521	143
Fever of Unknown Origin PCR Panel, Feline [†] 25001522	143
<i>Francisella tularensis</i> (Tularemia) PCR [†] 25001523	143
Fungal Sequencing and PCR on Tissue Block FUNGSEQPCR	143

G

<i>Giardia intestinalis</i> PCR [†] 25001524	144
---	-----

H

<i>Helicobacter</i> spp (genus) PCR [†] 25001525	144
---	-----

L

<i>Leishmania</i> spp (genus) PCR [†] 25001526	144
<i>Leptospira</i> MAT, 5 Serovar & PCR [†] 6163	144
<i>Leptospira</i> spp (genus) PCR [†] 25001527	144
<i>Listeria</i> spp (genus) PCR [†] 25001528	144

M

<i>Mycobacterium</i> spp (genus) PCR [†] 25001529	145
<i>Mycoplasma</i> spp (genus) PCR [†] 25001530	145

N

<i>Neospora caninum</i> PCR [†] 25001531	145
<i>Nocardia</i> spp (genus) PCR [†] 25001532	145

P

Pan-Fungal PCR [†] 25001533	145
PCR Formalin-Fixed Paraffin Embed Tissue [†] 25001534	145

R

<i>Rhodococcus equi</i> PCR [†] 25001535	145
---	-----

PCR Test Listing (cont'd)

<i>Rickettsia</i> spp (genus) PCR [†] 25001536	146
Ringworm, PCR, Canine/Feline 25001616	146
Ringworm, PCR, Equine 25001617	146

S

<i>Salmonella enterica</i> PCR [†] 25001537	146
SARS-COV-2 PCR [†] 25001538	146
<i>Strep equi</i> subsp. <i>zooepidemicus</i> PCR [†] 25001541	146
<i>Streptococcus equi</i> subsp. <i>equi</i> PCR [†] 25001540	146

T

Tickborne Disease PCR Panel Non-equine [†] 25001542	146
<i>Toxoplasma gondii</i> PCR [†] 25001543	147
<i>Tritrichomonas foetus</i> PCR [†] 25001544	147
<i>Trueperella pyogenes</i> PCR [†] 25001545	147
<i>Trypanosoma cruzi</i> PCR [†] 25001546	147

U

<i>Ureaplasma</i> spp (genus) PCR [†] 25001547	147
Uveitis PCR Panel, Feline [†] 25001548	147

Y

<i>Yersinia enterocolitica</i> PCR [†] 25001549	147
--	-----
